

A Study of Hematological Indices and Iron Status in Infants and Children with Down Syndrome

Thesis
Submitted for partial fulfillment of
Master Degree in Pediatrics

By

Mona Monis Zaky

M.B. B.Ch.

Supervisors

Dr.

Farida El-Baz Mohamed

Assist. Professor of Pediatrics

1996

To the memory
of my beloved
Father, To the
best MUM in the
World

To my Dear Husband, my
husband parents for their
continuous help and support,
and to my Dear Children

Acknowledgment

I would like to express my sincere thanks and deepest gratitude to Prof. Dr. Farida El-Baz Mohamed, Assist. Professor of Pediatrics, Ain-Shams University, who offered me the magnificent encouragement, generous support, and useful comments with continued supervision throughout this study.

I wish to express my deepest gratitude to Dr. Eman Ahmed Zaky, Lecturer of Pediatrics, Ain Shams University, who offered much of her time for providing me with precious guidance, which is beyond acknowledgment. I wish to thank her for her cardinal support during planning and throughout this work.

I would like to express my sincere thanks to Dr. Hoda Mohamed El-Gindi, Lecturer of Clinical Pathology, Ain Shams University, who kindly offered me much of her time and experience providing me with her helpful advice, and proper suggestions.

I express my deepest gratitude to Dr. Tarek Abdel- Gawad, Assist. Professor of Pediatrics, Ain Shams University, who offered me much of his experience, and guidance. He provided me with great help in facilitating and performing echocardiographic examination of the studied cases.

CONTENTS

	<i>Page</i>
Intoduction	1
Aim of the work	2
CHAPTER I: Down Syndrome	3
Prevalence of Down syndrome.	3
Down syndrome and maternal age.....	4
Pathogenesis of Down syndrome.....	5
Dermatoglyphics in Down syndrome.....	7
Clinical picture.....	7
Congenital malformations commonly encountered among Down syndrome patients	11
Cardiovascular anomalies.	13
Dermatoglyphic indicators of congenital heart defects in Down syndrome patients.....	14
Radiological findings in Down syndrome.	14
Immunological aspects of Down syndrome:	15
- Susceptibility to infection in Down syndrome.	15
- Immunoglobulins in Down syndrome	16
- Others immunological derangements in Down syndrome and its possible causes.	17
Metabolic disorders in Down syndrome.	19
Endocrine abnormalities in Down syndrome	20

CONTENTS (CONT.)

	<i>Page</i>
Other hormonal changes in Down syndrome:	21
Vitamin D status in Down syndrome.	21
Biochemical disorders in children with Down syndrome.	22
Enzymatic disorders	23
Superoxide dismutase, cerebral function and mentality ...	24
Risk of recurrence and genetic counselling.....	26
Life expectancy and cause of death in Down syndrome..	29
Investigations:	
Pre-natal diagnosis of Down syndrome:	29
I. Maternal biochemical screening parameters.	30
II. Sonography.	33
Post-natal investigations:	34
I. Cytogenetic studies.....	34
II. MRI studies in Down syndrome.	38
Management:	
1- Cell therapy	39
2- Vitamins and neurotransmitters.	40
3- Dietary and oral zinc supplementation.	40
4- Facial plastic surgery	41

CONTENTS (CONT.)

	<i>Page</i>
5- Health supervision for children with Down syndrome.	42
Chapter II:Hematological Changes in Down Syndrome .	44
I. Hematological disorders in Down syndrome	45
1. Changes in red blood cells	45
Hematological indices in Down syndrome	46
Erythrocyte membrane changes in Down syndrome .	47
2. Changes in hemoglobin	48
3. Changes in white blood cells	48
Non-specific immunity in Down syndrome	50
Neutrophils.....	51
Lymphocytes	52
II. Down syndrome and leukemia	55
a.Pathogenesis of leukemia in Down syndrome	57
b.Clinical picture of leukemia in children with Down syndrome	59
c.Ultrastructural and ultracytochemical characters in megakaryoblastic leukemia in children with Down syndrome	60
d. Cytogenetic studies of leukemia in Down syndrome	60

CONTENTS (CONT.)

	<i>Page</i>
e.Management of acute leukemia with Down syndrme.	62
Transient myeloproliferative disorder (TMD)	64
a.Mechanism responsible for TMD.....	65
b.In utero diagnosis of TMD in fetuses affected by Down syndrome	67
c.TMD and AMKL.....	70
4. Changes in platelets	72
Chapter III:Red Blood Cell Macrocytosis	73
Macrocytosis.....	74
Definition of macrocytosis	74
Macrocytosis in pregnancy	79
Macrocytosis as an indicator of human disease	81
Macrocytosis in different pathologic conditions	83
Macrocytosis in Down syndrome	89
Mechanism of macrocytosis in Down syndrome.....	91
Subjects & Methods..	94
Results	106
Discussion	179
Recommendations	211
Summary	212
References	215

LIST OF TABLES

	<i>Page</i>
Table (1): Diagnostic clinical criteria of Down syndrome (DS)	9
Table (2): Congenital malformations commonly encountered among patients with Down syndrome ..	12
Table (3): Risk of Down syndrome in relation to maternal age	28
Table (4): Health supervision for children with Down syndrome.....	43
Table (5): Hematologic and clinical features of transient myeloproliferative disorder and acute leukemia in Down syndrome patients.....	71
Table (6): Age appropriate norms for MCV	75
Table (7): Causes of macrocytosis	82
Table (8): Normal values of serum iron	97
Table (9): Normal values of total iron binding capacity .	98
Table (10): Classification of studied groups into the chronological subgroups	107
Table (11): Statistical comparison between studied groups, as regards sex distribution	109

LIST OF TABLES (CONT.)

	<i>Page</i>
Table (29): Statistical comparison between studied subgroups aged <2 years, regarding parameters of iron status	161
Table (30): Statistical comparison between studied subgroups aged ≥ 2 years, regarding parameters of iron status	164
Table (31): Statistical correlation between SI, TIBC with blood indices (MCV, MCH, and MCHC) among studied groups	167
Table (32): Statistical correlation between serum ferritin and blood indices in studied groups	175
