

LAPAROSCOPIC URETHRAL SLING OPERATION FOR URINARY STRESS INCONTINENCE

Thesis By

Ahmed Mohamed Abd-Alla El-Attar

Assistant Lecturer in Obstetrics and Gynecology (Ain Shams University)

Master Degree in Obstetrics and Gynecology

In Partial Fulfillment For The Degree of

MD of Obstetrics and Gynecology

Supervised By

Professor Dr. Mohammad Nagy El- Makhzangy

Professor of Obstetrics and Gynecology

Ain Shams University

Professor Dr. Ahmad Rashed Mohammad Rashed

Professor of Obstetrics and Gynecology

Ain Shams University

Professor Dr. Essam Mohammad Khater

Professor of Obstetrics and Gynecology

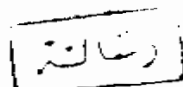

Ain Shams University

Professor Dr. Ismail Osman Abd El-Hafeez

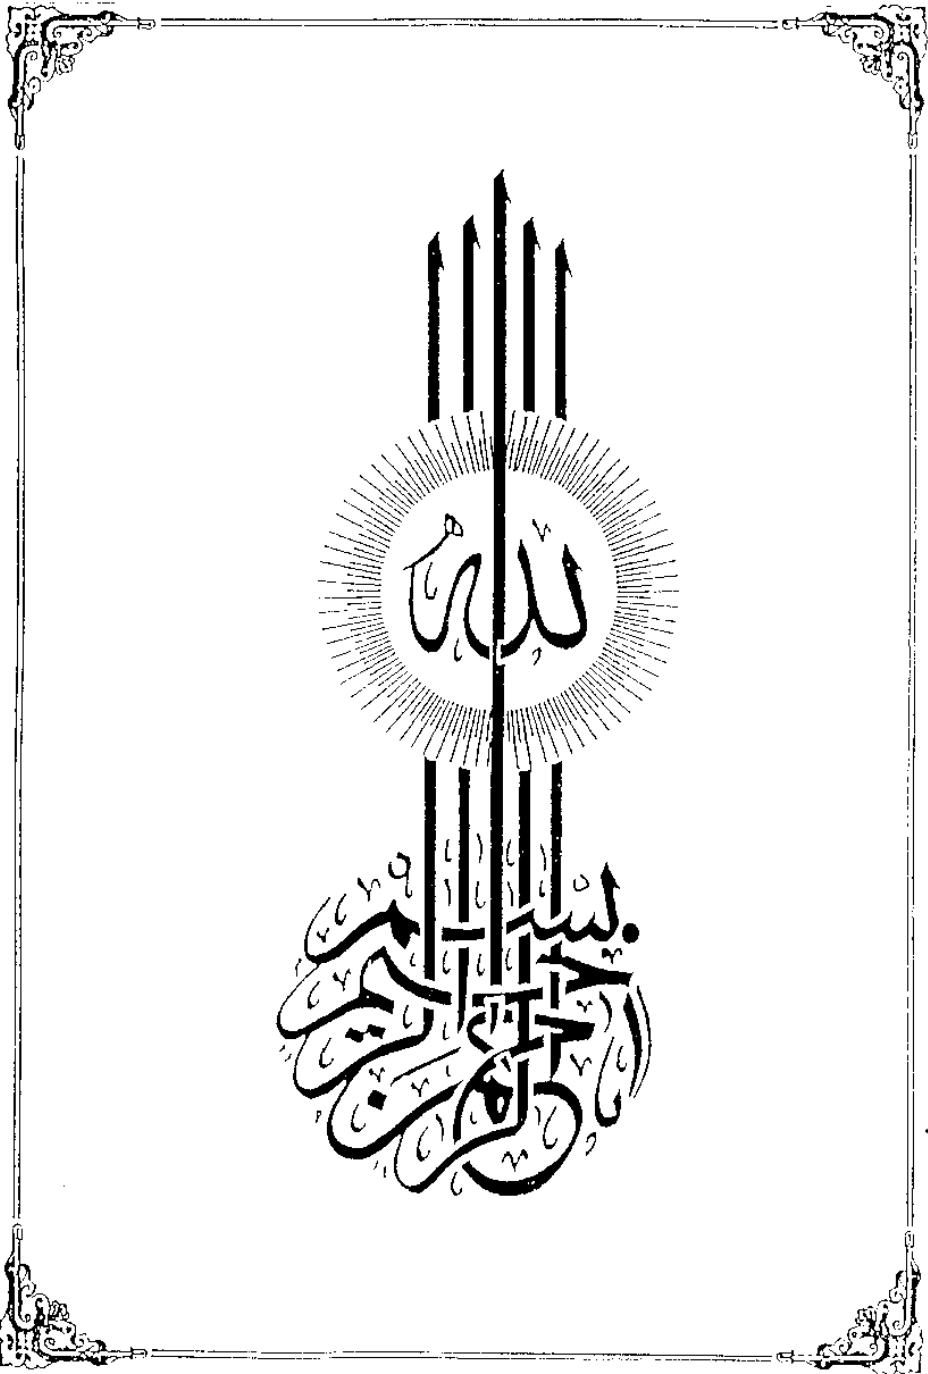

Professor of Urosurgery

Ain Shams University

1999

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْحَكِيمُ

سورة البقرة " آية ٣٢ "

ACKNOWLEDGEMENT

First of all thanks to God.

I am grateful to Professor Mohammad Nagy El-Makhzangy, Professor of Obstetrics and Gynecology, Ain Shams University for his guidance, encouragement, and enthusiastic support as well as his fatherly help.

Words cannot express my extreme thanks to Professor Ahmed Rashed Mohammad Rashed, Professor of Obstetrics and Gynecology, Faculty of medicine, Ain Shams University for her support, encouragement and time for following this work and revising it.

I am indebted to Professor Essam Mohammad Khater, Professor of Obstetrics and Gynecology, Faculty of Medicine, Ain Shams University, for his support, guidance, enthusiasm, and meticulous work without which this work would have not been possible and his. Professor Essam Khater always had such a great influence on my clinical judgment, surgical skills as well as any personal character and behavior.

I was fortunate to accomplish this work under the supervision and guidance of Professor Ismail Osman Abd El-Hafeez, Professor of Urosurgery, Ain Shams University who offered me support, encouragement, and experience.

I would like to express my appreciation to the late Dr. Ibrahim Atef Abd-El Hamid for his devotion and help as the cameraman in the operative part of this work. May his soul rest in piece.

I would like, also to thank Dr. Tarek Elzaiat who set for me a very good example of how to be so understanding and kind with patients. I am very grateful to him as he helped me to understand and perform urodynamic studies. His contributions to this work were invaluable.

On behalf of this teaching center, I would like to thank our kind patients who agreed to be included in this research study.

Last, but not least, words fail to express my deepest gratitude to the members of my family, my mother and my wife for their support and appreciation.

TO MY FAMILY
To Whom I will Be Grateful
Forever

LIST OF ABBREVIATIONS

\$: Dollars

ACOG: American College of Obstetricians and Gynecologists.

AI: Anatomical Incontinence.

ALL: Anterior levator line.

ASM: Anterior suspensory ligament.

ATFP: Arcus tendineus fascia pelvis.

ATLA: Arcus tendineus levator ani.

CMG: Cystometrogram.

cmH₂O: Centimeter water.

CUI: Conventional Urodynamic investigation.

DHIC: Detrusor Hyperreflexia with impaired contractility.

DI: Detrusor Instability.

EAC: Extramural Ambulatory Cystometry.

EMG: Electromyography.

GSUI: Genuine Stress Urinary Incontinence.

IFLA: Inferior fascia of levator ani.

IS: Ischial spine.

LLL: Lateral levator line.

LPP: Leak point pressure.

ml: Milliliter.

MRI: Magnetic Resonance Imaging.

msec: milliseconds.

MUCP: Maximum urethral closure pressure.

MUP: Maximum urethral pressure.

PCM: Pubococcygeus muscle.

P_{det}: Pressure detrusor.

PFE: Pelvic Floor exercises.

PPA: Phenylpropanolamine hydrochloride.

PPUL: Posterior pubourethral ligament.

PTFE: Polytetrafluoroethylene.

PUL: Pubourethral ligament.
PVRV: Post voiding residual volume.
SFLA: Superior fascia of levator ani.
SUI: Stress Urinary Incontinence.
UI: Urge Incontinence.
UI: Urge Incontinence.
um: micrometer.
UVJ: Urethrovessical junction.
VCUG: Voiding cystourethrography.
VLPP: Vesical leak point pressure.
