ACKNOWLEDGMENT

In the first place, I praise my God and all gratitudes are due to Almighty God who aided and guided me to bring forth this thesis to light. Thank god.

I would like to express my great indebtedness and deep gratefulness to Prof. Dr. Ahmed S. A. Abu El-ata, professor of geophysics, geophysics department, faculty of science, Ain Shams University, who suggested this point of research and for his kind supervision, for doing his best in solving all the problems which I faced during the long run of the research work, the interpretation and guidance in the preparation of this thesis.

I also, acknowledge Prof. Dr. A. M. Sabri, Professor of geophysics, head of geophysics department, faculty of science, Ain Shams University for his help and encouragement.

I special thank and grateful to Prof. Dr. H. A. Deebes, president, of the national research institute of astronomy and geophysics for his encouragement and his kind helps.

I would like to express my thanks to Prof. Dr. A. Gh. Hassaneen, Professor of geoelectricity and head of geoelectricity and geothermic laboratory, national research institued of astronomy and geophysics for his joint supervision, scientific discussions and comments.

The author is grateful to Prof. Dr. F. M. Ahmed ,head of geomagnetism laboratory national research institute of astronomy and geophysics for his encouragement and for all facilities that he offered during the work.

Also, my thanks and appreciation to Dr. S. Sh. Osman and Dr. M. A. Mesbah, for their assistances. Also, the author expresses his thanks and deep gratitude to Mr. M. N. soliman, Mr, M.A. Atia and Mr.A. M. Abass for help in this thesis .

I should also take the chance to express my admiration to Mr. Ahmed Moustafa Abd El Gawad Ain Shams, in offering me, his continual advice and help

I am greatly indebted to Mr. G. M. El-Kady and Mr. F. Shaaban for their assistance in this work. Also my thanks for all staff members of the geoelectricity and geothermic laboratory.

Finally from all my heart I feel indebted to my family for this great help and support to conduct this thesis.
