**Impact Of Head Injury Care Self  
Learning Package On  
Performance Of Nurses Working  
At Neurosurgical Departments  
Ain Shams University Hospitals**

Protocol  
Submitted in partial fulfillment of the  
Doctorate  
Of Nursing Science  
(B.N.Sc.)

By

Mahassen Ibrahim Abdel Sattar  
(M. Sc. Nursing 1987)

Under The Supervision Of

Prof. Dr. Samir El Molla  
Prof. Of. Neurosurgery  
Faculty Of Medicine  
Ain Shams University

Assist. Prof. Hoda Zaki  
Assist. Prof. Of  
Medical Surgical Nursing  
High Institute Of Nursing  
Cairo University

Dr. Magda Abdel Aziz  
Lecturer Of Medical Surgical Nursing  
High Institute Of Nursing  
Ain Shams University

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

وَبَسَّالُوْنَاكَ عَنِ الرُّوْحِ قُلِ الرُّوْحُ مِنْ أَمْرِ  
رَبِّي وَمَا أُوتِيتُمْ مِنَ الْعِلْمِ إِلَّا قَلِيلًا.

صدق الله العظيم  
سورة الإسراء  
آية (٨٥)

# **Dedication**

To Whom I will be gratefull  
forever

This thesis is dedicated to  
the  
memory of My Father  
Whose Love and  
encouragement  
enhanced my Spirit and  
strength to fulfill  
this Work

## *Acknowledgement*

*By the Name of God First and Foremost, I feel always thankful and indebted to God the kind and Merciful.*

*My attempts to acknowledge all who has assisted me in the completion of this thesis will necessarily fall short.*

*I am extremely grateful to Prof. Samir El. Molla, Prof. of Neurosurgery, Ain Shams University, whose meticulous view, opinions and expertise were the mainstay of this work, without his enthusiasm and continuous help I would not have been able to start and complete this work.*

*I am deeply indebted to Prof. Lailab Loutfi, Head of Psychiatric Nursing Department and Director of the High Institute of Nursing, Ain Shams University, whose meticulous supervision, expertise flexibility, constructive criticism, fruitful guidance; and encouragement enabled me to meet so many deadlines in completing this work., all are heartily appreciated.*

*With grateful and profound gratitude, I wish to express my appreciation for the expert assistance of prof. Hoda Laki, Prof. of Medical-Surgical nursing, High Institute of Nursing, Cairo University and Deputy Director of Regional Office, Project HCPE - Cairo- Egypt, who devoted much of her time, effort valuable advice, and unlimited help for the perfection of this work, and whose detailed review, correction, meticulous suggestions provided me with an excellent measure of security about the study.*

*I would like to thank Ass.Prof. Magda Abdel Aziz, Head of Fundamentals of Nursing Department, High Institute of Nursing, Ain Shams University, for her help in the preparatory phase of this thesis.*

*I am specially acknowledged all the nurses who participated in this work. Special thanks are also extended to my friend Yasmin El-Fouly, Lecturer, High Institute of Nursing, Cairo University, who devoted much of her effort and directions for the execution and typing of this thesis on the computer with expertise, flexibility and exceptional word processing skills.*

*Last but not least, there are those on whom I depend on for strength and support and those who continued to offer their encouragement and support when I was too busy to give in turn. I would like to thank the most significant individuals in my life; my family.*

*My mother for her continuous blessing, support, and valuable advises.*

*My Sons Baher and Tarek, who offered their help and encouragement; and*

*My loving husband, Mohamed Mahmoud, whose understanding, enormous patience, encouragement, and support behind - the - scene work moved this work smoothly through production.*

*M. F. Abdel Fattar  
September 1994*

## TABLE OF CONTENTS

	Page
Dedication	III
Acknowledgements	IV
List of Tables	VI
List of Figures	VII
<b>CHAPTER (I): Review of Literature</b>	
<b>Part (I)</b>	
- Introduction	1
- Definitions	3
- Epidemiology of head injury	5
- Anatomy and physiology of the head	7
. Scalp	8
. Skull	9
. Contents of the cranial cavity	10
1. The meninges	13
2. The brain	14
The cerebrum	15
Cerebellum	17
The brain stem	18
The premitive structure	19
Reticular : activating system	22
The vascular system	23
The cranial nerves	26
3. The ventricular system	28
- Pathophysiology of head injury	29
A. Pathophysiology events	30
1. Craniospinal buffering capacity	30
- Cerebral perfusion pressure	32
- Metabolic response	33
- Cerebral vasodilatation	34
- Cerebral odema	35

Cont....	Page
. Implementation of the study	150
. Statistical design	152
. Administrative design	154
<b>CHAPTER (III): Data analysis and interepretation</b>	156
<b>CHAPTER (IV): Discussion</b>	184
<b>CHAPTER (V): Conclusion and Recommendations</b>	217
<b>CHAPTER (VI): Summary</b>	221
<b>CHAPTER (VII): References</b>	230
<b>CHAPTER (VIII): Appendices:</b>	
1. Rancho Los Anglos scale	
2. Pre-post test	
3. Observation commentary	
4. The summary of the package	
5. Specific objectives of the 5 parts of the arabic package	
- Thesis proposal	
<b>CHAPTER (VIII): Arabic Summary</b>	

Cont....	Page
- Brain shifts	37
- Haemorrhage	38
B. Effects of increased intracranial pressure and other structures	38
C. mechanism of head injuries	39
- Effects of head injuries	42
A. Scalp injuries	43
B. Skull fractures	45
C. Brain injuries	51
1. Primary injuries	51
2. Secondary injures	53
- Altered states of consciousness	62
. Components of consciousness	62
. The phenomenon of consciousness	63
. Causes of impaired consciousness	65
. Levels of consciousness	66
. Assessment/Monitoring head injury victims	69
- Glasgow coma scale	70
- Vital signs	73
- Degree of injury	77
- Clinical manifistation of head injury	78
- Diagnostic evaluation	79
. X-ray skull films	79
. Computerized axial tomography	79
. Magnatic resonance imaging	82
. Evoked potential studies	82
. Laboratory studies	84
. Continuous cerebral blood studies	85
- Therapeutic management	86
. Medical management	86
. Surgical management	90
- Nursing management	91

Cont....	Page
- Assessment	91
. General assessment	91
. Neurological assessment	93
. Assessment for complications	95
- Potential nursing diagnosis	96
- Planning	97
- Nursing intervention	98
- Evaluation	113
- Rehabilitation	115
<b>Part (II)</b>	
- Teaching-learning process	120
. Definitions	120
. Types of learning	121
. Adult learning and the nurse	122
. Model of andragogy	122
. Competency-based education	123
. Andragogical process	125
. Andragogy and continuing education	125
- Self-learning package	127
. Definitions	127
. Comparison of three different learning approaches	129
. The role of the teacher in self-directed learning	130
. Educational feasibility of self-directed learning	130
. How to use the package.	133
. Keys advantages for choosing self-learning packages	134
<b>Part (III):</b>	
- A summary of the selected arabic researchs	136
<b>CHAPTER (II): Subject and Methods</b>	
. Aim of the study	142
. Research population	142
. Technical design	143
. Operational design	149

## LIST OF TABLES

<b>Tab. No.</b>	<b>Title</b>	<b>Page</b>
A-1	Characteristics of the study group	157
A-2	Correlation study between nursing qualification, total years of experience and department experience in the pre and posttests of the nurses knowledge	159
B-1	Destribution of the nurses regarding their total scores according to results of knowledge tests	160
B-2	Inadequate information (score below 50%) among the nurses knolwedge regarding the 5 parts of the pakage.	162
B-3	Comparison between pre and posttest mean grads and standard deviation (SD) regarding different areas of nurses knowledge.	163
B-4	Inadequate information among nurses' knowledge in the (4) pre-posttests	165
C-1-7	Qualitative data collected by the use of observation commentary checklist on nurses performance throughout the (4) observations	177-183

## LIST OF FIGURES

Fig. No.	Title	Page
1	The skull	10
2	The meninges	13
3	The brain	14
4	The cerebrum	15
5	Diencephalon	19
6	Limbic system	20
7	Circle of Willis	24
8	Venous sinuses	25
9	Brain stem	27
10	Ventricular system	28
11	Diagrammatic representation of the cranial and spinal compartment with expulsion of CSF	31
12	Mean perfusion pressure	32
13	Cerebral vasodilation	34
14	Mechanisms in cerebral oedema	35
15	Mechanisms in head injury	39
16	Epidural, subdural and intracerebral hemorrhage	54
17	Identifying abnormal respiratory patterns	75
18	Nursing qualification	158
19	Inadequate scores (below 50%) of the nurses knowledge	161
20	Mean scores of the nurses' knowledge pre and posttests (I, II, III) regarding the area of anatomy and physiology	168
21	Mean scores of the nurses' knowledge pre and posttests (I, II, III) Regarding the area of definition mechanisms and pathophysiology	169
22	Mean scores of the nurses' knowledge pre and posttests (I, II, III) Regarding the area of the impact of head injury	170

- VIII -

	Cont...	Page
23	Mean scores of the nurses' knowledge pre and posttests (I, II, III) Regarding the area of diagnostic investigation and treatment	171
24	Mean scores of the nurses' knowledge pre and posttests (I, II, III) regarding the area of the nursing process	172
25	Mean scores of the nurses' knowledge pre and posttests (I, II, III) Regarding the total scores gained by the nurses in the pre and posttests (I, II, III).	173
26	Comparative illustration regarding the inadequate information.	174-176
