## ACKNOWLEDGEMENT

It is difficult for me to express my deep feelings and great thanks to my professor and supervisor, **Prof. Dr. Zenab El-Gothamy**, Professor and Head of Department of Dermatology and Venereology, Faculty of Medicine, Ain Shams University. Whatever I might say will stand short of gratitude to her. Her continuous encouragement and sincere advice were the main factors to finish this work in this final form. I am actually indebted to her with many things that will affect my scientific career. She sacrificed a lot of her busy time to revise every step of this work.

I would also like to express my best thanks to **Dr. Mohamed Saber**, Lecturer of Histology, Faculty of Medicine, Ain Shams University for his help and constructive directions.

I would also like to acknowledge the effort done by **Prof. Dr. Abd El-aziz Riad**, Ass. Professor of Hygiene and Industrial Medicine, Tanta University, in the statistical analysis and graphs of this work.

Special words of thanks are to my colleagues and all members of staff of the Dermatology and Venereology Department, Military Medical Academy for their kind help.
