بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

## Acknowledgment

I am deeply grateful for the support and constructive guidance of many people, whose valuable assistance made this study possible.

First and foremost, I wish to express my thanks and profound gratitude *to professor Farouk Lotaief, professor of psychiatry, Ain Shmas University and director of Transcultural Psychiatric Research Unit*. The original suggestion of the subject came from professor **Lotaief**, To whom I am deeply indebted for his valuable suggestions and comments, and his deep interest in the subject. I appreciate very much his wisdom, understanding and valuable suggestions.

I sincerely appreciate all the encouragement and support given by *professor Mohamed Refaat El-Fiki, Professor of Psychiatry, Ain Shams University*. His cooperation, creative ideas, constructive criticism and meticulous revision were tremendous, that without which the study would have not been completed.

I am profoundly grateful to ***Dr Safeya Effat, Assistant professor of Psychiatry, Ain Shams University*** for her willingness to work long and irregular hours with me. Without her assistance, support and advice, this work would not have been accomplished.

I wish to extend my thanks to ***Professor Adel Sadek, Professor of Psychiatry and Chairman of the Neuropsychiatry Department, Ain Shams University*** for his faithful guidance, help and support.

I wish also to express my appreciation to ***Dr Mohamed Youssef Lecturer of psychiatry , Ain Shams University*** for his help and encouragement.

My deepest gratitude goes to my beloved husband, for his unfailing assistance, understanding, encouragement and patience.

I am profoundly grateful to ***Dr Safeya Effat, Assistant professor of Psychiatry, Ain Shams University*** for her willingness to work long and irregular hours with me. Without her assistance, support and advice, this work would not have been accomplished.

I wish to extend my thanks to ***Professor Adel Sadek, Professor of Psychiatry and Chairman of the Neuropsychiatry Department, Ain Shams University*** for his faithful guidance, help and support.

I wish also to express my appreciation to ***Dr Mohamed Youssef Lecturer of psychiatry , Ain Shams University*** for his help and encouragement.

My deepest gratitude goes to my beloved husband, for his unfailing assistance, understanding, encouragement and patience.

<b>Table No.</b>	<b>Title</b>	<b>Page</b>
27	Comparison between different groups of depression regarding provocation (Severe events and difficulties 6 months prior to onset of the current episodes or date of the interviews.	120
28	Provocation before onset in different subtypes of unipolar depression in male patients ranking according to frequency.	121
29	Provocation before onset in different subtypes of unipolar depression, in female patients ranking according to frequency.	121
30	Comparison between patients and controls regarding presence of severe events prior to onsets or date of interviews.	123
31	Comparison between male and female patients in different groups of depression regarding number of severe events before onset of the current episodes.	124
32	Comparison between different groups of depression in both sexes regarding number of severe events before of the current episodes.	125
33	Comparison between patients and control groups regarding number of severe events before onset of the current episodes or date of the interviews.	126
34	Comparison between male and female patients in different groups of depression regarding date of severe events before onset of the current episodes.	127
35	Comparison between different groups of depression in both sexes regarding date of severe events before onset of the current episodes.	128
36	Comparison between patients and controls groups regarding date of severe events before onset of the current episodes or time of interviews.	129
37	Comparison between male and female patients in different groups of depression regarding independence of events.	130

<b>Table No.</b>	<b>Title</b>	<b>Page</b>
38	Comparison between different groups of depression in both sexes regarding independence of event.	131
39	Comparison between patients and controls regarding independence of events.	132
40	Frequencies of different types of events in patients and controls.	133
41	Ranking of different types of events in male patients according to frequency.	134
42	Ranking of different types of events in female patients according to frequency.	134
43	Comparison between male and female patients in different groups of depression regarding number of difficulties.	136
44	Comparison between different groups of depression in both sexes regarding number of difficulties	137
45	Comparison between patients and controls regarding number of difficulties.	138
46	Comparison between male and female patients in different groups of depression regarding independence of difficulties.	139
47	Comparison between different groups of depression in both sexes regarding independence of difficulties.	140
48	Comparison between patients and controls regarding independence of difficulties.	141
49	Frequencies of different types of difficulties in patients and controls.	142
50	Ranking of different types of difficulties in male patients according to frequency.	144
51	Ranking of different types of difficulties in female patients according to frequency.	144
52	Rate of humiliation-entrapment loss and danger before onset in patients and controls of both sexes.	145
53	Regression analysis of different factors considered in the provocation ranking according to significance.	148

## ***LIST OF FIGURES***

<b>Figure No.</b>	<b>Title</b>	<b>Page</b>
1	Ranking of different types of events in male and female patients according to frequency.	122
2	Ranking of different types of difficulties in male and female patients according to frequency.	135
3	Frequency of provocation before onset in different subtypes of Unipolar depression in male & female patients.	143
4	Rate of humiliation-entrapment-loss and danger before onset in male patients.	146
5	Rate of humiliation-entrapment-loss and danger before onset in female patients.	147
