Head of Chemistry Departement

## ACKNOWLEDGEMENT

First and foremost , I would like to thank God for giving me the opportunity and will-power to accomplish my ph.D.

I would like to express my deepest gratitude to Dr . M.F.EL- Shahat professor of inorganic and analytical chemistry faculty of science Ain shams university for suggesting the field of the present work , for . his valuable guidance and helpful discussions throughout the period of research .

Indebtness is deeply acknowledged to Dr A. Ahmed Abd-EL Khalek professor of physical chemistry and chemical kinetics and vice deen of faculty of science Cairo university at beni- suef branch for suggesting the plane, continuous valuable guidance , supervision, useful discussion and criticism during this work .

Sincere thanks are extended to Dr. N.A.Gabr head of laboratory sector of N.C.C for providing the facilities by chemicals and instruments during the period of this research .

My deepest gratitude should be directed to all colleagues in computer department of N.C.C. about their help .

## CONTENTS

LIST OF FIGURES .....	
LIST OF TABLE .....	
SUMMARY .....	
CHAPTER I.....	
1 - Mechanism of Electron - Transfer .....	2
2 - N-bromosuccinimide as an oxidizing agent .....	8
3 - Oxidation of organic compounds by ( NBS ) .....	8
4 - Oxidation of inorganic compounds by ( NBS ) .....	14
5 - Chromium (III) complexes .....	18
6 - Electronic structures of chromium (III) complexes .....	20
7 - Kinetic oxidation of CrIII complexes .....	22
8 - Kinetic aspects of analytical chemistry .....	22
AIM OF PRESENT WORK .....	29
CHAPTER II.....	30
EXPERIMENTAL .....	30
1 - Chemicals and solutions .....	30
2 - Kinetic procedures .....	31
3 - Analysis of Kinetic data .....	32
CHAPTER III .....	35
RESULTS AND DISCUSSION .....	35
PART I . Oxidation of Cr III - by N-bromosuccinimide .....	35

Oxidation product .....	35
Stoichiometry of the reaction .....	35
Kinetics of $[\text{Cr}^{\text{III}}]$ reaction by N-bromosuccinimide in aqueou solution .....	
Effect of chromium (III) concentration .....	36
Effect of N-bromosuccinimide concentration .....	37
Effect of pH .....	38
Effect of ionic strength on the reaction rate .....	39
Effect of temperature .....	40
Discussion .....	41
Kinetic in methanol - water solvent mixtures .....	48
PART II .....	
Oxidation of $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$ by N-bromosuccinimide .....	
Oxidation product .....	52
Stoichiometry of the reaction .....	52
Kinetics of $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$ reaction by N-bromosuccinimide .....	
Effect of complex concentration .....	53
Effect of N-bromosuccinimide concentration .....	54
Effect of pH.....	55
Effect of ionic strength on the reaction rate .....	57
Effect of temperature .....	57
Discussion .....	59
PART III .....	

Oxidation of $[\text{Cr}^{\text{III}}(\text{en})_3]^{3+}$ by N-bromosuccinimide .....	
Oxidation product .....	66
Kinetics of $[\text{Cr}^{\text{III}}(\text{en})_3]^{3+}$ reaction by NBS in aqueous solution .....	66
Effect of complex concentration .....	66
Effect of N-bromosuccinimide concentration .....	67
Effect of pH.....	68
Effect of ionic strength on the reaction rate .....	70
Effect of temperature .....	70
Discussion .....	72
Kinetics of $[\text{Cr}^{\text{III}}(\text{en})_3]^{3+}$ reaction by NBS in MeOH- H <sub>2</sub> O solven.....	76
Discussion .....	79
PART IV .....	
Kinetic determination of ammonia .....	
Oxidation product .....	83
Effect of ammonia added .....	83
Effect of pH.....	83
Effect of interfering ions.....	85
Discussion .....	85
CONCLUSION .....	88
REFERENCES .....	90
TABLE APPENDEX (Tables 1 - 22 ) .....	
ARABIC SUMMARY .....	

## LIST OF FIGURES

### Part I

**Fig. 1** Change in absorbance as a function of time for the reaction between  $\text{Cr}^{\text{III}}$  and NBS

**Fig. 2** Pseudo-First order plots for the reaction at different  $\text{Cr}^{\text{III}}$  concentrations

**Fig. 3 , 4.** Pseudo-first order plots for the reaction at different NBS concentrations .

**Fig. 5** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  at  $30^{\circ}\text{C}$  .

**Fig. 6** Pseudo - first order plots for the reaction at  $\text{pH}=7.0$ .

**Fig. 7** Pseudo -first order plots for the reaction at  $\text{pH}=7.4$  .

**Fig . 8** Pseudo -first order plots for the reaction at  $\text{pH}=7.7$  .

**Fig. 9** Pseudo - first order plots for the reaction at  $\text{pH}=8.0$  .

**Fig. 10** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  at different pH Values .

**Fig. 11** Plots of slope  $(1/a)$  versus  $[\text{H}^+]^+$  at  $30^{\circ}\text{C}$ .

**Fig. 12** Plots of intercept  $b/a$  versus  $[\text{H}^+]^+$  at  $30^{\circ}\text{C}$ .

**Fig. 13** Pseudo - first order plots for the reaction at different values of ionic strength .

**Fig. 14** Pseudo - first order plots for the reaction at  $T=35^{\circ}\text{C}$ .

**Fig. 15** Pseudo - first order plots for the reaction at  $T=40^{\circ}\text{C}$ .

**Fig. 16** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  at different temperatures.

**Fig. 17** Plots of  $([\text{H}^+] + K_h / K_h K_2 k_4)$  versus  $[\text{H}^+]$  at  $30^{\circ}\text{C}$ .

**Fig. 18** Plots of  $(K_1 [\text{H}^+] + K_h K_2) / K_h K_2 k_4$  versus  $[\text{H}^+]$  at  $30^{\circ}\text{C}$  .

**Fig. 19** Pseudo - first order plots for the reaction at different methanol -water

solvent mixtures.

**Fig. 20** Plots of  $k_{\text{obs}}^{-1}$  versus [ methanol ] / [ water ].

## Part II

**Fig. 21** Change in absorbance as a function of time in the reaction between [ Cr (Hedta ) (H<sub>2</sub>O ) ] and NBS.

**Fig.22** Variation of absorbance versus time at different complex concentrations.

**Fig. 23** Plots of  $-\log [ \text{Cr VI} ] / dt$  versus  $-\log [ \text{complex} ]$  .

**Fig. 24** Plots of absorbance versus time at different NBS concentrations.

**Fig. 25** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  at  $T=30^{\circ}\text{C}$ .

**Fig. 26** Variation of absorbance with time at  $\text{pH}= 6.0$  .

**Fig. 27** Variation of a bsorbance with time at  $\text{pH}= 6.2$ .

**Fig. 28** Variation of absorbance with time at  $\text{pH}= 6.4$ .

**Fig. 29** Variation of absorbance with time at  $\text{pH}= 6.8$ .

**Fig. 30** Plots of  $k_{\text{obs}}^{-1}$  versus  $[\text{NBS}]^{-1}$  at different pH values .

**Fig. 31** Plots of slope (1/a) versus  $[\text{H}^{+}]$  at  $30^{\circ}\text{C}$  .

**Fig. 32** Plots of intercept (b/a) versus  $[\text{H}^{+}]$  at  $30^{\circ}\text{C}$ .

**Fig.33**Variation of absorbance versus time at different values of ionic strength

**Fig. 34** Variation of absorbance with time at  $\text{Temp.} = 20^{\circ}\text{C}$ .

**Fig. 35** Variation of absorbance with time at  $\text{Temp.} = 25^{\circ}\text{C}$ .

**Fig. 36.** Variation of absorbance with time at  $\text{Temp.} = 35^{\circ}\text{C}..$

**Fig. 37** Variation of absorbance with time at  $\text{Temp.} = 40^{\circ}\text{C}$ .

**Fig. 38** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  at different pH values.

**Fig. 39** Plot of  $([\text{H}^+] + K_2 / K_2 K_4 k_6)$  versus  $[\text{H}^+]$  for the reaction of  $[\text{Cr}^{\text{III}}\text{Hedta}[(\text{H}_2\text{O})]]$  with NBS at  $30^\circ\text{C}$ .

**Fig. 40** Plot of  $(K_3 [\text{H}^+] + K_2 K_4) / K_2 K_4 k_5$  versus  $[\text{H}^+]$  at  $30^\circ\text{C}$ .

### Part III

**Fig. 41** Change in absorbance as a function of time for the reaction between  $[\text{Cr}(\text{en})_3]^{3+}$  and NBS .

**Fig. 42** Variation of absorbance against time at diff.  $[\text{Cr}(\text{en})_3]^{3+}$  .

**Fig. 43** Plots of  $-\log$  rate against  $-\log [\text{Cr}(\text{en})_3]^{3+}$  at  $30^\circ\text{C}$  .

**Fig. 44** Variation of absorbance versus time at different  $[\text{NBS}]$  concentrations .

**Fig. 45** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  for the reaction of  $[\text{Cr}(\text{en})_3]^{3+}$  with NBS at  $30^\circ\text{C}$  .

**Fig. 46** Variation of absorbance of  $[\text{Cr}(\text{en})_3]^{3+}$  with time at  $\text{pH} = 7.0$  .

**Fig. 47** Variation of absorbance of  $[\text{Cr}(\text{en})_3]^{3+}$  with time at  $\text{pH} = 7.7$  .

**Fig. 48** Variation of absorbance of  $[\text{Cr}(\text{en})_3]^{3+}$  with time at  $\text{pH} = 7.9$  .

**Fig. 49** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  at different pH values .

**Fig. 50** Plots of the slope  $(1/k_1)$  versus  $[\text{H}^+]$  at  $30^\circ\text{C}$  .

**Fig. 51** Plots of the intercept  $(k_2/k_1)$  versus  $[\text{H}^+]$  at  $30^\circ\text{C}$  .

**Fig. 52** Variation of absorbance versus time at different values of ionic strength

**Fig. 53** Variation of absorbance of  $[\text{Cr}(\text{en})_3]^{3+}$  with time at  $T = 25^\circ\text{C}$  .

**Fig. 54** Variation of absorbance of  $[\text{Cr}(\text{en})_3]^{3+}$  with time at  $T = 35^\circ\text{C}$  .

**Fig. 55** Variation of absorbance of  $[\text{Cr}(\text{en})_3]^{3+}$  with time at  $T = 40^\circ\text{C}$  .

**Fig.56** Plots of  $[\text{NBS}]^{-1}$  versus  $k_{\text{obs}}^{-1}$  for the reaction of  $[\text{Cr}(\text{en})_3]^{3+}$  with NBS at diff . temperatures.

**Fig.57** Variation of absorbance with time in presence of different wt% MeOH at 25 Co.

**Fig.58** Variation of absorbance with time in presence of MeOH at 30°C.

**Fig.59** Variation of absorbance with time in presence of MeOH at 35°C

**Fig.60** Variation of absorbance with time in presence of MeOH at 40°C.

**Fig.61** Plots of  $-\log k_{\text{obs}}$  versus  $D^{-1}$  at 35 and 40°C.

**Fig.62** Plots of  $k_{\text{obs}}^{-1}$  versus  $[\text{MeOH}]/[\text{H}_2\text{O}]$  for the reaction at 30°C.

**Fig.63** Variation of absorbance with time in presence of EtOH at 25°C.

**Fig.64** Variation of absorbance with time in presence of EtOH at 30°C.

**Fig. 65** Variation of absorbance with time in presence of EtOH at 35°C.

**Fig.66** Variation of absorbance with time in presence of EtOH at 40°C.

**Fig.67** Variation of absorbance with time in presence of n-PrOH at 25°C.

**Fig.68** Variation of absorbance with time in presence of n-PrOH at 30°C.

**Fig.69** Variation of absorbance with time in presence of n-PrOH at 35°C.

**Fig.70** Variation of absorbance with time in presence of n-PrOH at 40°C.

#### Part IV

**Fig.71** Change of absorbance after definite time with mg -NH<sub>3</sub> for the oxidation of  $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$  by NBS .

**Fig.72** Variation of absorbance with time for the oxidation of  $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$  by NBS in presence of different mg NH<sub>3</sub> .

**Fig. 73** Effect of pH on  $k_{\text{obs}}$  for the oxidation of  $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$  by NBS in presence of different mg  $\text{NH}_3$ .

**Fig.74** Calibration curve for the kinetic determ. of  $\text{NH}_3$ .

**Fig.75** Effect of mg -  $\text{Cu}^{2+}$  on the absorbance of  $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$  in presence of  $\text{NH}_3$ .

## LIST OF TABLES

### PART I

Table I . Stoichiometric results for the oxidation of  $\text{Cr}^{\text{III}}$  - by NBS .

Table II . Variation of  $k_{\text{obs}}$  with different  $[\text{Cr}^{\text{III}}]$  concentrations .

Table III . Variation of  $k_{\text{obs}}$  with different [NBS] concentrations .

Table IV . Variation of  $k_{\text{obs}}$  with pH at different [NBS] concentrations .

Table V . Variation of  $1/a$  and  $b/a$  with  $[\text{H}^+]$  .

Table VI . Effect of ionic strength on the reaction rate .

Table VII . Variation of  $k_{\text{obs}}$  with different [NBS] concentrations at different temperatures .

Table VIII . Values of  $k_4$   $K_2$  at different temperatures .

Table IX . Values of  $k_{\text{obs}}$  at different MeOH- $\text{H}_2\text{O}$  solvent mixtures.

### PART II.

Table X . Stoichiometric results for the oxidation of  $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$  by N-bromosuccinimide.

Table XI . Variation of initial rate with  $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$  concentration .

Table XII . Values of  $k_{\text{obs}}$  with [NBS] concentration at  $30^\circ\text{C}$  .

Table XIII . Effect of pH on  $k_{\text{obs}}$  for the oxidation of  $[\text{Cr}^{\text{III}}(\text{Hedta})(\text{H}_2\text{O})]$  by NBS .

Table XIV . Variation of the slope ( $1/a$ ) and intercept ( $b/a$ ) with  $[\text{H}^+]$  .

Table XV . Effect of ionic strength on the reaction rate .

Table XVI . Variation of initial rate with different concentrations of NBS at different temperatures .

Table XVII . Values of a and b at different temperatures .

### PART III

Table XVIII . Variation of initial rates with  $[\text{Cr}(\text{en})_3]^{3+}$  .

Table XIV . Variation of initial rates with  $[\text{NBS}]$  .

Table XX . Effect of pH on  $k_{\text{obs}}$  for the oxidation of  $[\text{Cr}(\text{en})_3]^{3+}$  by NBS .

Table XXI . Dependence of the slope  $1/k_1$  and intercept  $k_2/k_1$  on pH .

Table XXII . Effect of ionic strength on the reaction rate at  $30^\circ\text{C}$  .

Table XXIII . Variation of initial rates with  $[\text{NBS}]$  at different temperatures .

Table XXIV . Values of  $k_1$  at different temperatures .

Table XXIVI . Effect of MeOH on  $k_{\text{obs}}$  at different temperatures .

Table XXIVII . Thermodynamic activation parameters at different MeOH -  
H<sub>2</sub>O solvent mixtures .

Table XXIVIII . Effect of solvents on  $k_{\text{obs}}$  at wt% = 20 and  $T = 30^\circ\text{C}$  .

Table XXX . Thermodynamic activation parameters at different solvents .

Table XXXI . Effect of mg -  $\text{NH}_3$  on the rate of oxidation of  $[\text{Cr}^{\text{III}}(\text{Hedta})$   
(H<sub>2</sub>O)] by NBS .

Table XXXII . Effect of pH on  $k_{\text{obs}}$  in presence of  $\text{NH}_3$  for the reaction of  
 $[\text{Cr}^{\text{III}}(\text{Hedta}) (\text{H}_2\text{O})]$  and NBS .

Table XXXIII . Kinetic determination of  $\text{NH}_3$  .

## SUMMARY
