EFFECT OF ORAL CONTRACEPTIVES
ON SOME METABOLIC ACTIVITIES
OF FEMALE RATS

By:

Gamal Ramadan Shebl

Supervised by:

Prof. Dr. Nadia Mohamed El-Beih

Date / / 1994

BIOGRAPHY

Name : Gamal Ramadan Shebl

Date and place of birth : 1967, Cairo

Degree awarded : B.Sc., Zoology, 1988

Present position : Demonstrator, Department of
Zoology, Faculty of Science,
Ain Shams University

Date of registration : December 10th, 1990

Note

The present thesis is submitted to Ain Shams University in partial fulfillment of the requirements for the Degree of Master of Science in Physiology.

Besides the research work materialized in this thesis, the candidate has attended five graduate courses for one year in the following topics:

- Endocrinology
- Enzymology
- Haematology
- Statistics
- English language

He has successfully passed the final examinations in these courses.

Prof. Dr. Abdalla M. Ibrahim

Head of Zoology Dept.,
Ain Shams University

ACKNOWLEDGEMENT

I would like to express my gratitude and indebtedness to Prof. Dr. Nadia El-Beih, Prof. of Physiology, Department of Zoology, Faculty of Science, Ain Shams University, for suggesting the subject of this work, direct supervision of the practical work and advice regarding theoretical informations in different fields related to this research. Prof. Dr. Nadia El-Beih is also thanked for providing me with important literatures, valuable criticism and continuous supply with advice concerning technical work. I have been followed by Prof. Dr. Nadia El-Beih throughout this work with great encouragement in the way of handling the thesis in particular.

Thanks are also due to Head and all staff members of Zoology Department, Faculty of Science, Ain Shams University, for continuous encouragement throughout this work.
