Acknowledgment

-All Thanks to God-

I wish to express my deepest gratitude and thanks to **Prof. Dr. Mahmoud El Shirbiny** for his help and expert supervision. He has been very kind, generous with scientific advice and a strong motivating force to produce an accurate research. For him I will remain humbly grateful.

I wish also to thank **Dr. Nabil Farag** the driving force behind this work whose interest in the subject of the research has been of great help. I wish to thank him for his valuable time and for his patience.

Finally, I would like to thank all persons who helped in this work and the patients of our research.

Contents

* Introduction & Aim of the Work.	1
* Review of Literature.	3
<u>* Normal coronary anatomy:</u>	3
• Left coronary artery	3
• Left anterior descending artery	4
• Left Circumflex artery	5
• Right coronary artery	6
• Distribution of the coronary arteries to specific regions of the left ventricular myocardium	8
<u>* Risk factors for coronary artery disease:</u>	11
1. Hypertension	12
2. Diabetes Mellitus	15
3. Dyslipidemia	19
• Hypertriglyceridemia	21
• Hypercholesterolemia	24
• Apolipoproteins	27
• Familial Hypercholesterolemia	29
• Lipoproteins	31
4. Tobacco use	34
5. Obesity	38
6. Oral contraceptives	40
7. Non modifiable risk factors	44
• Family history	44
• Gender	47
8. Other risk factors	49
• Plasma Homocyst(e)ine	49
• Haemostatic factors	51
• Physical activity	53
• Type A personality and stress	55
• Alcohol	57

• Coffee consumption	59
• Hyperuricemia	60
• Low Circulating levels of antioxidants	61
* <u>Myocardial infarction with normal coronaries:</u>	62
• Coronary arterial spasm	65
• Coronary thrombosis with recanalization	68
• Coronary artery emboli	71
• Coronary aneurysms	73
• Small vessel disease	74
• Congenital coronary artery anomalies	76
• Platelet aggregates	78
• Hyperthyroidism	80
• Relationship of MINC to other cardiac conditions	81
* <u>Angiographic appearance of coronary atherosclerosis:</u>	82
• The ACC/AHA task force on lesion morphology	82
• Assessing procedural risk using specific lesion morphologic criteria	84
• Thrombolysis in myocardial infarction (TIMI) flow	88
• Left ventriculography	90
* <u>Myocardial infarction in young adults:</u>	92
* Patients & Methods	98
* Results	108
* Discussion	135
* Summary	155
* References	157-195
* Arabic summary	٢٤١

List of Tables

Table	Title	Page
Table (1)	American college of cardiology/American heart association classification of lesion type.	83
Table (2)	Thrombolysis in myocardial infarction (TIMI) flow.	88
Table (3)	Prevalence of risk factors.	109
Table (4)	Types of dyslipidemia.	111
Table (5)	Type of infarction.	112
Table (6)	Relation between risk factors and type of infarction.	115
Table (7)	Comparison between group I and group II as regard age, CK, MB.	116
Table (8)	Comparison between echocardiography of group I and group II.	118
Table (9)	Coronary angiographic findings.	120
Table (10)	Distribution of coronary artery disease.	121
Table (11)	Prevalence of coronary artery affection in both groups.	122
Table (12)	Types of lesions in both groups	123
Table (13)	Comparison between group I and group II as regard EF by LV angiography.	127
Table (14)	Relation between risk factors and coronary angiographic findings.	128
Table (15)	Relation between type of infarction and coronary angiographic findings.	129
