SHALLOW GEOPHYSICAL EXPLORATION FOR DEFINING THE WATER OCCURRENCES IN THE AREA EAST OF THE NILE DELTA, EGYPT

THESIS

Submitted in Partial Fulfilment of the Requirement for the Degree

of

DOCTOR OF PHILOSOPHY

in

Geophysics

By

AHMED MOUSTAFA EL-SAYED ABD EL-GAWAD
B. Sc. (Hons.), M. Sc.

Supervised By

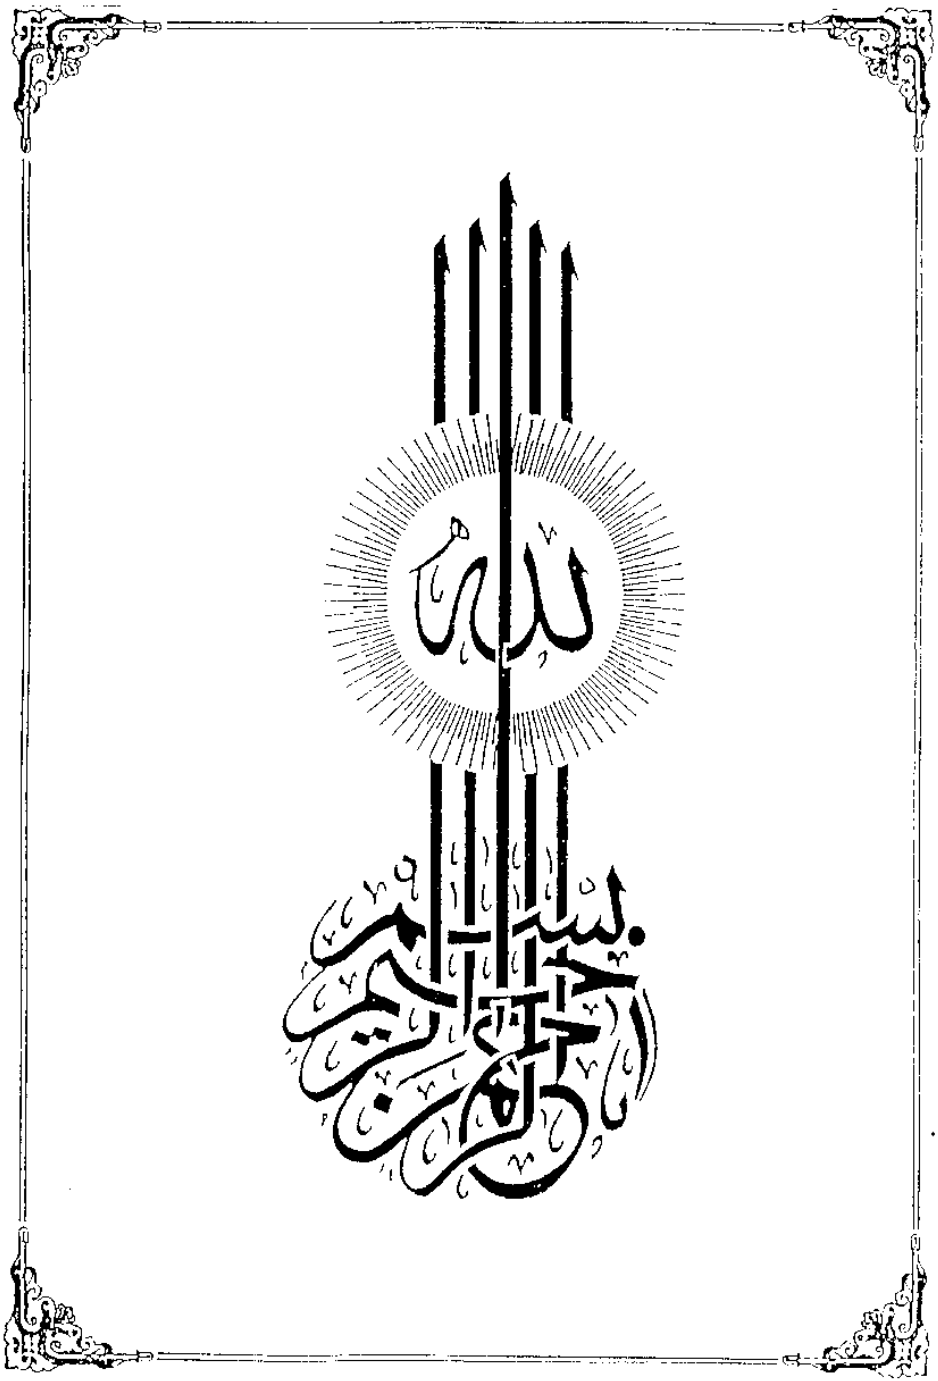
Pro. Dr. Ahmed S.A. Abu El-Ata
Professor of Geophysics
Faculty of Science
Ain Shams University

Prof. Dr. Joseph B. Khalil
Professor and Head of Geological
and Hydrochemical Department
Research Institute for Ground Water

Submitted to
Department of Geophysics
Faculty of Science
Ain Shams University

CAIRO, EGYPT

1997



ACKNOWLEDGEMENTS

I would like to express much deep gratitude to the memory of my **father** and to my **mother, brother** and my **wife** for their great help and permanent care. I am also grateful to the **Ministry of Higher Education** and to the **University of Ain Shams** that gave me a chance to complete my thesis in Austria .

I have great pleasure in expressing my deep gratitude to **Prof. Dr. Ahmed S.A. Abu El-Ata,** Professor of Geophysics, Geophysics Department, Faculty of Science, Ain Shams University, who suggested this point of research and for his kind supervision, and his critical reading of the final manuscript.

My great indebtedness and deep gratefulness is due to **Prof. Dr. Hermann Mauritsch**, Professor of Geophysics, Institute of Geophysyics,University of Leoben, Austria, for doing his best in solving all the problems which I' faced during the long run of the research work and his helpful scientific discussions.

I am particularly indebted to Prof. Dr. **Joseph B. Khalil**, Professor and Head of Geological and Hydrochemical Department, Research institute for Groundwater, for his continuous assistance in the Hydrochemical and ground water evaluation studies presented in this thesis.

I would like to express my deep gratitude to **Dr. Ahmed. S.A. Helaly** Lecturer of Geophysics, Geophysics Department, Faculty of Science, Ain Shams University for his continuous assistance.

I would like to express my deep gratitude to all the stuff members of the Geophysics Department of the Leoben University especially, **Prof. Dr. K. Millahn** (Head of the Department), **Prof. Dr. R. Schmöller**, **Prof. Dr. F. Weber**, **Dr. E. Niesner**, **Dr. G. Sendlhofer** and **Mrs R. Gurtner** for their kind co-operation offered by them.

Finally, I would to express much gratitude to those who directly or indirectly provided help during the progress of this work

ABSTRACT xiii

CHAPTER I : GEOLOGIC SETTING 1

I.1 Introduction 1

I.2 Physiography and Geomorphology 2

I.3 Surface Geology 15

I.4 Subsurface Stratigraphy 24

I.5 Structures 30

I.6 Tectonics 35

I.7 Geologic History 41

1.8 Previous Exploration Activities 46

1.9 Scope of the Present Work 51

CHAPTER II : GRAVITY INTERPRETATION 53

II.1 Introduction 53

II.2 Bouguer Gravity Data 56

II.3 Gravity Separation 59

II.4 Gravity Filtering 64

II.5 Gravity Tectonic Elements 84

II.6 Buried Valleys Determination 87

CHAPTER III : ELECTRICAL RESISTIVITY ANALYSIS 96

III.1 Introduction 96

Page No.

III.2 General Outlines 98
III.3 Measured Field Data 107
III.4 Interpretation of Electrical Data 107
III.4.1 Qualitative interpretation of electrical data 114
III.4.1.1 Iso-apparent electric resistivity contour maps 115
III.4.1.2 Apparent resistivity profiles and pseudo-sections .131
III.4.2 Quantitative interpretation of electrical data 174
III.4.2.1 Interpretation of Vertical Electrical Sounding curves 175
III.4.2.2 Interpretation of geoelectrical cross-sections. 202
III.4.2.3 Interpretation of the Quaternary resistivity maps.. 247
III.4.2.4 Interpretation of the Quaternary isopach maps. .. 250
III.4.2.5 Interpretation of the depth to the aquifer map. 256

CHAPTER IV : HYDROCHEMICAL ASPECTS..... 262

IV.1 Introduction 262
IV.2 Hydrochemical Characteristics 283
IV.2.1 Physical properties 283
IV.2.1.1 pH value 283
IV.2.1.2 Total dissolved solids (T.D.S.) 284
IV.2.1.3 Electrical conductivity (E.C.) 289
IV.2.2 Hydrochemical properties 291
IV.2.2.1 Distribution of major constituents 291
IV.2.2.2 Major ions relationship ..... .302
IV.2.2.2.1 Hypothetical salt combinations 305
IV.2.2.2 2 Ion dominance and chemical types 312
IV.2.2.2 3 Hydrochemical coefficients 314

Page No.

IV.3 Hydrochemical Profiling and Diagrams 321
IV.4 Classification and Origin of Ground Water 341
IV.4.1 Classification according to salinity 341
IV.4.2 Classification according to genesis 342
IV.4.2.1 Sulin's classification 342
IV.4.2.2 Durov's classification 346
IV.4.2.3 Ovitchinkov's classification 351

CHAPTER V: GROUNDWATER QUALITY EVALUATION 357
V.1 Introduction 357
V.2 Evaluation for Drinking and Domestic Uses 358
V.3 Evaluation for Livestock and Poultry Uses 363
V.4 Evaluation for Irrigation Uses..... 363
6.4.1 U. S. salinity laboratory classification (1954) 366
6.4.2 Wilcox classification 370
V.5 Evaluation for Industry Uses..... 373
CHAPTER VI: SUMMARY AND CONCLUSIONS..... 376
REFERENCES 391
ARABIC SUMMARY .....

LIST OF FIGURES

Fig. No.:		Page No.
(1)	Location map of the study area	3
(2)	Isohyetal map of the rainfall values of the study area in mm/year, (after Sallouma, 1983)	4
(3)	Isofree surface evaporation contour map of the study area in cm/year, (after Sallouma, 1983)	5
(4)	Map showing the contour lines of the ground surface in the Eastern Nile Delta region	7
(5)	Geomorphological map of the area east of the Nile Delta (after Shata, 1979)	8
(6)	Hydrographic basins east of the Nile Delta (after El-Fayoumy, 1968)	14
(7)	Surface geologic map of the study area (after Conoco, 1987)	16
(8)	Generalized litho-stratigraphic column of the Nile Delta region (after Schlumberger; 1984)	25
(9)	Composite columnar section of the Nile sediments (after Said, 1981)	31
(10)	Main directions of faulting and north Sinai folds, Egypt (after Youssef, 1968)	32
(11)	Fault belts of the Cairo-Suez Road (after Abd-allah and Bakry, 1994)	36
(12)	Sketch of the structural aspects of the Nubian-Arabian Shield margin in Northern Egypt	37
(13)	Sketch map of major structural elements of Egypt (after El-Shazly, 1977)	39
(14)	Tectonic model of the Nile Delta (after Abu El-Ata and Ibrahim, 1989)	42
(15)	Bouguer gravity anomaly map of the area under study (after G.P.C, 1985)	57

Fig. No.:		Page No.
(16)	Regional gravity anomaly map of the area under study	60
(17)	Residual gravity anomaly map of the area under study	63
(18)	Gravity map filtered with an 8-unit regional filter	71
(19)	Gravity map filtered with a 16-unit regional filter	73
(20)	Gravity map filtered with a 21.3-unit regional filter	74
(21)	Gravity map filtered with an 8-unit residual filter	76
(22)	Gravity map filtered with a 16-unit residual filter	77
(23)	Gravity map filtered with a 21.3-unit residual filter	79
(24)	Gravity map with a 16 to 8 unit band-pass filter	80
(25)	Gravity map with a 21.3 to 16 unit band-pass filter	82
(26)	Gravity map with a 21.3 to 8 unit band-pass filter	83
(27)	Regional tectonic elements of the study area as deduced from the bouguer gravity map	86
(28)	Local tectonic elements of the study area as deduced from the residual gravity map	88
(29)	Gravity and structure profile through the Hames Valley low and San Ardo oil-field high, Bardley Quadrangle	90
(30a)	Geological map of an area near Taltal, Chile, showing location of gravity and seismic refraction profiles and contoured bouguer gravity anomalies (after, Van overmeeren, 1975)	91
(30b)	Profile B-B$^{\backslash}$, Taltal area, Chile	92
(31)	Buried valley trends determined tentatively from the residual gravity anomaly map	94
(32)	Buried valley trends determined tentatively from the 8-unit residual filter gravity map	95
(33)	Some electrode configurations	103
(34)	Vertical Electrical Sounding location map	108
(35)	Iso-apparent resistivity contour map at AB/2= 1.5 m	117
(36)	Iso-apparent resistivity contour map at AB/2= 10 m	118
(37)	Iso-apparent resistivity contour map at AB/2= 20 m	120

Fig. No.: Page No.

(38) Iso-apparent resistivity contour map at AB/2= 50 m 121
(39) Iso-apparent resistivity contour map at AB/2= 100 m 123
(40) Iso-apparent resistivity contour map at AB/2= 150 m 124
(41) Iso-apparent resistivity contour map at AB/2= 200 m 125
(42) Iso-apparent resistivity contour map at AB/2= 300 m 127
(43) Iso-apparent resistivity contour map at AB/2= 500 m 128
(44) Iso-apparent resistivity contour map at AB/2= 600 m 130
(45) Apparent resistivity profiles along profile No. (1) 133
(46) Pseudo-geoelectrical cross section for profile No. (1) 134
(47) Apparent resistivity profiles along profile No. (2) 136
(48) Pseudo-geoelectrical cross section for profile No. (2) 137
(49) Apparent resistivity profiles along profile No. (3) 138
(50) Pseudo-geoelectrical cross section for profile No. (3) 139
(51) Apparent resistivity profiles along profile No. (5) 141
(52) Pseudo-geoelectrical cross section for profile No. (5) 142
(53) Apparent resistivity profiles along profile No. (6) 143
(54) Pseudo-geoelectrical cross section for profile No. (6) 144
(55) Apparent resistivity profiles along profile No. (7) 146
(56) Pseudo-geoelectrical cross section for profile No. (7) 147
(57) Apparent resistivity profiles along profile No. (8) 149
(58) Pseudo-geoelectrical cross section for profile No. (8) 150
(59) Apparent resistivity profiles along profile No. (9) 151
(60) Pseudo-geoelectrical cross section for profile No. (9) 152
(61) Apparent resistivity profiles along profile No. (10) 154
(62) Pseudo-geoelectrical cross section for profile No. (10) 155
(63) Apparent resistivity profiles along profile No. (11) 156
(64) Pseudo-geoelectrical cross section for profile No. (11) 157
(65) Apparent resistivity profiles along profile No. (13) 159
(66) Pseudo-geoelectrical cross section for profile No. (13) 160
(67) Apparent resistivity profiles along profile No. (14) 161

Fig. No.: Page No.

(68) Pseudo-geoelectrical cross section for profile No. (14) 162
(69) Apparent resistivity profiles along profile No. (15) 164
(70) Pseudo-geoelectrical cross section for profile No. (15) 165
(71) Apparent resistivity profiles along profile No. (16) 166
(72) Pseudo-geoelectrical cross section for profile No. (16) 167
(73) Apparent resistivity profiles along profile No. (17) 169
(74) Pseudo-geoelectrical cross section for profile No. (17) 170
(75) Apparent resistivity profiles along profile No. (19) 171
(76) Pseudo-geoelectrical cross section for profile No. (19) 172
(77) Interpretation of Vertical Electrical Sounding No. (2) 192
(78) Interpretation of Vertical Electrical Sounding No. (8) 193
(79) Interpretation of Vertical Electrical Sounding No. (15) 194
(80) Interpretation of Vertical Electrical Sounding No. (22) 195
(81) Interpretation of Vertical Electrical Sounding No. (27) 196
(82) Interpretation of Vertical Electrical Sounding No. (49) 197
(83) Interpretation of Vertical Electrical Sounding No. (53) 198
(84) Interpretation of Vertical Electrical Sounding No. (65) 199
(85) Interpretation of Vertical Electrical Sounding No. (76) 200
(86) Interpretation of Vertical Electrical Sounding No. (80) 201
