ACKNOWLEDGMENT

I wish to offer my sincere thanks and gratitude to ***Professor Dr. Samira Mahmoud Hassan***, Professor of Pharmacology, Faculty of Medicine, Ain Shams University, for giving me the honor of working under her supervision, her kind continuous guidance, persistent efforts, continuous encouragement, valuable help and her keen interest throughout the present work.

I am also thankful to ***Professor Dr. Hoda Abd El Galel Salam***, Professor of Pharmacology, Faculty of Medicine, Ain Shams University, for her sincere help and great cooperation.

I am also much obliged and deeply indebted to ***Dr. Laila Allam Besheer***, Assistant professor of Pharmacology, Ain Shams University, who gave me much of her time, her experience, her patience with valuable assistance and

instructions which were of much help in the practical part of this work.

I am also deeply grateful to *M. Mohamed Anwar*, Technician of Pharmacology department, Faculty of Medicine, Al-Azhar University, for his cooperation and help.

LIST OF TABLES

Table	Title	Page
Table (1) :	Composition of physiological salt solutions (gm/L)	21
Table (2) :	Effect of graded IV doses of ginseng on the systolic arterial blood pressure in pentobarbitone anaesthetized cats of both sexes	44
Table (3)	Effect of graded IV doses of ginseng on the diastolic arterial blood pressure in pentobarbitone anaesthetized cats of both sexes	45
Table (4)	Effect of graded IV doses of ginseng on the systolic arterial blood pressure in pentobarbitone anaesthetized dogs of both sexes	53
Table (5)	Effect of graded IV doses of ginseng on the heart rate in pentobarbitone anaesthetized dogs of both sexes	56
Table (6)	Effect of graded IV doses of ginseng on the myocardial oxygen consumption in pentobarbitone anaesthetized dogs of both sexes	59

Table	Title	Page
Table (7)	Effect of graded concentrations of ginseng on the force of myocardial contractions of isolated perfused rabbit's heart	61
Table(8)	Effect of graded concentrations of ginseng on the coronary flow rate of isolated perfused rabbit's heart	68
Table (9)	Effect of graded concentrations of ginseng on norepinephrine-induced contraction of isolated rabbit's aortic strip	71
Table (10)	Effect of graded concentrations of ginseng on the amplitude of contractions of isolated rabbit's jejunum	74
Table (11)	Effect of graded concentrations of ginseng on histamine-induced contraction) of isolated tracheal spiral of guinea pigs	80
Table (12) :	Percentage changes produced by graded concentrations of ginseng on the neuromuscular junction of the rat's phrenic nerve	83

LIST OF FIGURES

Figure	Title	Pa
Fig (1)	General structural formula of ginsenosides.	4
Fig (2)	Effect of graded IV doses of ginseng on the systemic arterial blood pressure of anaesthetized cats of both sexes	41
Fig (3a)	Site of action of ginseng in anaesthetized cats under spontaneous respiration	48
Fig (3b)	Site of hypotensive action of ginseng in anaesthetized cat under spontaneous respiration	49
Fig (3c)	Effect of ginseng in graded doses on the arterial blood pressure of spinal cat	50
Fig (4)	Effect of graded IV doses of ginseng on the systemic arterial blood pressure and respiration of pentobarbitone anaesthetized dogs of both sexes	54
Fig (5)	Effect of ginseng on the electrocardiograph of pentobarbitone anaesthetized dogs	57
Fig (6a)	Effect of graded concentrations of ginseng on myocardial contractility in isolated rabbit's heart	61

Figure	Title	Page
ig (6b-d)	Site of action of ginseng on the myocardial contractility in isolated rabbit's heart	65-66
ig (7)	Effect of graded concentrations of ginseng on norepinephrine -induced contraction of isolated rabbit's aortic spiral strip	72
ig (8a)	Effect of graded concentrations of ginseng on tone and rhythmic contractions of isolated rabbit's jejunum	75
ig (8b,c)	Site of action of ginseng on the intestinal contractility of isolated rabbit's jejunum	77,78
ig (9)	Effect of graded concentrations of ginseng on the height of histamine-induced submaximal contraction of isolated guinea pig tracheal spiral strip	81
ig. (10)	Effect of graded concentrations of ginseng on neuromuscular junction (rat's phrenic nerve preparations)	84
