

# PERFORMANCE OF SOME CHICKPEA VARIETIES UNDER DIFFERENT PLANT DENSITIES AND PHOSPHORUS LEVELS

By

EKRAM ALI MEGAWER

B.Sc. Fac. of Agric., Cairo University, Fayoum, 1983

M.Sc. Fac. of Agric. (Agron.) Cairo University, Fayoum, 1991

THESIS

Submitted in Partial Fulfillment of the Requirements  
for the Degree of

DOCTOR OF PHILOSOPHY  
IN  
AGRONOMY

Department of Agronomy  
Faculty of Agriculture, Fayoum  
Cairo University

1998

## APPROVAL SHEET

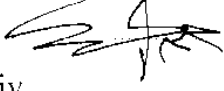

**Title of thesis:** Performance of some chickpea varieties under different plant densities and phosphorus levels.

**By** : Ekram Ali Megawer

**Degree** : Ph. D. Agronomy

**Approved by:**

Prof. Dr. A. A. Abd El-Gawad.   
Prof. of Agronomy, Ain Shams Univ.

Prof. Dr. A. H. El-Hattab.   
Prof. of Agronomy, Cairo Univ.

Prof. Dr. Samia M. M. Hassan   
Prof. of Agronomy, Fayoum, Cairo Univ. (Supervisor)

(Committee in charge)

Date : 7 / 7 / 1998

Deposited in the Faculty Library

Date

Librarian

## ACKNOWLEDGMENT

The author wishes to express her sincere appreciation and gratitude to the supervisor Dr. Samia, M. M. Hassan, Professor of Agronomy, Faculty of Agriculture, Fayoum, and chairman of the supervisory committee for her counsel and guidance throughout this work and writing up the thesis. I appreciate her patience.

My sincere thanks, are extended to Dr. A. M. Khattab, Chief researcher, Field Crops Institute, Agriculture Research Center, Giza, Egypt, for supervision, encouragement and continuous help, during this scientific study.

## CONTENTS

	<b>Page</b>
ABSTRACT.....	1
INTRODUCTION .....	2
REVIEW OF LITERATUR .....	4
MATERIALS AND METHODS .....	48
RESULTS AND DISCUSSION .....	54
I- Growth measurements .....	54
1. Plant height .....	54
2. Root dry weight per plant .....	59
3. Leaf area per plant .....	65
4. Leaf area index .....	70
5. Dry matter accumulation .....	75
6. Leaf area ratio .....	81
7. Crop growth rate .....	86
8. Relative growth rate .....	91
9. Net assimilation rate .....	97
II- Yield and yield components .....	103
1. Plant height at harvest .....	103
2. Number of branches per plant .....	106
3. Total number of pods per plant .....	108
4. Number of mature pods per plant .....	112
5. Number of seeds per plant .....	115
6. Number of seeds per pod .....	119
7. Weight of seeds per plant .....	123
8. Straw weight per plant .....	126
9. Seed index .....	129
10. Seed yield per feddan .....	132
11. Straw yield per feddan .....	138

## LIST OF TABLES

No.	Title	Page
1-	Physical and chemical properties of the experimental fields in two seasons.....	49
2-	Plant height, in cm, at different growth stages, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons) .....	55
3-	Root dry weight, in g, at different growth stages, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons).....	60
4-	Leaf area, in dm <sup>2</sup> , per plant at different growth stages, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons) .....	66
5-	Leaf area index per plant, at different growth stages, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons) .....	71
6-	Total dry matter, in g, per plant, at different growth stages, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons) .....	76
7-	Leaf area ratio per plant, at different growth intervals, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons).....	82

No.	Title	Page
8-	Crop growth rate, g/day, at different growth intervals, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons) .....	87
9-	Relative growth rate, g/g/day, at different growth intervals, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons) .....	92
10-	Net assimilation rate, g/dm <sup>2</sup> /day, at different growth intervals, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons) .....	98
11-	Mean plant height at harvest, in cm, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons).....	104
12-	Mean number of branches per plant, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons).....	107
13-	Mean number of total pods per plant, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons).....	109
14-	Mean number of mature pods per plant, as affected by chickpea varieties, plant density, phosphorus levels and their interactions (combined analysis for 1992/93 and 1993/94 seasons).....	113
15-	Mean number of seeds per plant, as affected by chickpea varieties, plant density, phosphorus levels and their interactions
