

Acetabular Reconstruction in Hip Arthroplasty

*Thesis submitted for partial fulfillment of the MD
Degree in Orthopedic Surgery*

Presented by
Osama Mohamed El-Sayed Farag
M.B., B.Ph., M.Sc. (Orthop.)

Under the supervision of
**PROF. DR. RAFIK AHMED MOHAMED
SADEK**

*Professor of Orthopedic Surgery
Faculty of Medicine-Ain Shams University*

PROF. DR. AHMED EMAD EL-DIN RADY
*Assistant Professor of Orthopedic Surgery
Faculty of Medicine-Ain Shams University*

DR. NASSER HUSSEIN ZAHER
*Lecturer of Orthopedic Surgery
Faculty of Medicine-Ain Shams University*

**Faculty of Medicine
Ain Shams University
1999**

بسم الله الرحمن الرحيم

" قالوا سبحانك لا علم لنا

إلا ما علمتنا أنك أنت

العليم الحكيم "

صدق الله العظيم

(سورة البقرة الآية ٣٢)

Acknowledgment

First and foremost thanks are for the God. I would like to express my deep gratitude and sincere thanks to Professor, Dr. Rafik Ahmed Mohamed Sadek, Professor of Orthopedic Surgery, Faculty of Medicine, Ain Shams University and nothing would be too much for what he had actually done through his wise guidance. It was really good luck for me to be under the supervision of Prof. Dr., Rafik Sadek.

I would like also to offer my most grateful thanks to Assistant Professor, Dr. Ahmed Emad El-Din Rady, for his assistance and great help, without which this work would have never been completed.

It is my pleasure to express my heartiest thanks to Dr. Nasser Hussein Zaher, Lecturer of Orthopedic Surgery, for his great help and guidance, which are unforgettable.

Finally, I am grateful and deeply indebted to my parents, my brothers and my wife and for every person who by a way or another helped during this thesis.

Osama El-Sayed

	Page No.
<i>Introduction and Aim of the Work</i>	I-III
<i>Review of Literature</i>	I
Anatomy	1-24
Biomechanics and Biomaterials	25-28
Pathology of Acetabular Deficiency	59-72
Bone Grafts	72
-Autogenous bone grafts	72-75
-Allograft	75-87
-Bone graft substitutes	87-93
-Devices used for acetabular reconstruction	93-107
Complications	108-121
<i>Patients and Methods</i>	122-152
<i>Results</i>	153-164
<i>Discussion</i>	165-176
<i>Summary</i>	177-180
<i>Case Presentation</i>	181-218
<i>References</i>	219-230
<i>Arabic Summary</i>	

List of Tables

	<i>Page No.</i>
<i>Table (1): Muscles of the hip joint.</i>	19
<i>Table (2): Classification of acetabular deficiencies.</i>	60
<i>Table (3): No. of patient in 1ry and revision THR.</i>	122
<i>Table (4): No. of patient as regard preoperative diagnosis.</i>	123
<i>Table (5): Sex distribution.</i>	123
<i>Table (6): Mean age.</i>	123
<i>Table (7): Harris hip scoring system.</i>	153
<i>Table (8): Postoperative pain scoring.</i>	156
<i>Table (9): Postoperative limping scoring.</i>	157
<i>Table (10): Postoperative support scoring.</i>	158
<i>Table (11): Postoperative walking distance.</i>	158
<i>Table (12): Postoperative absence of deformity.</i>	159
<i>Table (13): Postoperative range of motion.</i>	159
<i>Table (14): Postoperative reactive line formation.</i>	160
<i>Table (15): Postoperative migration.</i>	160
<i>Table (16): Postoperative graft fate.</i>	161
<i>Table (17): Results in relation to diagnosis.</i>	161
<i>Table (18): Results in relation to method of defect reconstruction.</i>	161
<i>Table (19): Method of defect reconstruction and radiological evaluation.</i>	162
<i>Table (20): Results in relation to size of graft</i>	162

and type of defect.

Table (21): End radiological results versus type of the graft used. 162

Table (22): Preoperative hip score in relation to postoperative outcome after 2 years. 163

Table (23): Hip score at 1 month in relation to after 2 years. 163

Table (24): Hip score at 3 months in relation to after 2 years. 163

Table (25): Results in relation to allograft. 164
