Acknowledgment

Sincere gratitude and appreciation is forwarded to Dr. Mohamed Abo El Hoda Darwish, Assistant Professor of Radiodiagnosis, Ain Shams University, for his patience, valuable guidance, continuous support and sincere advise.

I would also like to express my deepest appreciation and supreme gratitude to Dr. Mervat Mohamed Ibrahim, Assistant Professor of Radiodiagnosis, Ain Shams University, for her tremendous help and guidance throughout this work.

I would like to express my gratitude and thanks to Dr. Yasser Abd El-Azeim Abbas, Lecturer of Radiodiagnosis, Ain Shams University, for his continuous supervision and support.

I am also very grateful to Dr. Ahmed Khodir, Lecturer of Radiodiagnosis, Ain Shams University for his kind help.

Finally, special thanks are given to all the staff and members in Radiodiagnosis Department, to my colleagues and my family for their continuous encouragement and offering every possible help.

LIST OF CONTENTS

	Page
1. Introduction and aim of the work	1
2. Anatomical considerations	3
3. Pathophysiology	28
4. Pathology	34
5. Doppler physics and normal Doppler signals of the renal artery	60
6. Materials and Methods	74
7. Results	81
8. Illustrative cases	104
9. Discussion	183
10. Summary and Conclusion	197
11. References	201
12. Arabic Summary	

LIST OF FIGURES

Fig. No.	Title	Page
1	Position of the kidney	4
2	Posterior relations of the kidneys	6
3	Anterior relations of the kidneys	6
4	Internal structure of the kidney	9
5	Renal calyces and pelvis	11
6	Blood supply of the kidney	13
7A,B	Segments of the kidneys and segmental arteries	15
8	Intrarenal arterial supply	16
9	Urinary bladder	21
10	Male urethra	23
11	Longitudinal US scan of the kidney	27
12	Mild hydronephrosis	35
13	Moderate hydronephrosis	37
14	Advanced hydronephrosis	37
15	Types of posterior urethral valves	40
16	Pelvi-ureteric junction obstruction	43
17	Stag horn stone in renal pelvis	45
18A,B,C	US grading of hydronephrosis	59
19	The Doppler effect	60
20	Parabolic velocity profile in a vessel	66
21	A. The flattening of velocity profile in a tapering tube	67
	B. the sharpening of velocity profile in a diverging tube	67
22	Color Doppler display and normal Doppler signals of main renal and segmental arteries	72
23	Normal Doppler signals of segmental arteries	73
24	Normal Doppler signals of interlobar and arcuate arteries	73

25	The path of the Doppler beam and display of the Doppler signal	77
26	Mean RI of the kidneys in the different groups	89
27	The effect of I.V. lasix on RI of intra renal arteries in 4 obstructed kidneys	99
28	The effect of I.V. lasix on RI of intra renal arteries in 8 partially obstructed kidneys	100
29	The effect of I.V. lasix on RI of intra renal arteries in 2 non obstructed kidneys	101
30 A,B	Case 1: Normal duplex Doppler US examination of both kidneys	105
31 A,B,C	Case 2: Right complete obstructive nephrouropathy with elevated RI values	108
32 A,B,C, D,E	Case 3: Non functioning hydronephrotic left kidney, right obstructive nephrouropathy with high RI values of both kidneys	112
33 A,B,C	Case 4: Left obstructive nephrouropathy with high RI values	118
34 A,B,C	Case 5: Bilateral obstructive uropathy with high RI values of both kidneys	122
35 A,B,C	Case 6: Right PUJ obstruction with high RI values	126
36 A,B,C	Case 7: Giant hugely dilated extrarenal pelvis with right PUJ obstruction and high RI values of the right kidney	130
37 A,B,C	Case 8: Bilateral obstructive nephrouropathy with high RI values	134
38 A,B,C	Case 9: Left acute obstructive uropathy. Right partial obstructive uropathy with high RI of the left kidney	138
39 A,B,C	Case 10: Bilateral obstructive nephrouropathy with normal RI values of both kidneys	142
40 A,B	Case 11: Right partial obstructive nephrouropathy with high RI	146

41 A,B	Case 12: Right partial obstructive uropathy with normal RI values	149
42 A,B	Case 13: Left partial obstructive nephrouropathy with normal RI values	152
43 A,B	Case 14: Residual non obstructive dilatation of right kidney with normal RI values	155
44 A,B	Case 15: Right vesicoureteric reflux with normal RI values of the right kidney	158
45 A,B	Case 16: Left 4th degree vesico ureteric reflux with normal RI values	161
46 A,B	Case 17: Functional right PUJ with normal RI values	164
47 A,B,C	Case 18: Neuromuscular dysfunction at right PUJ. Residual non obstructive dilatation of the left kidney with normal RI values	168
48 A,B,C	Case 19: Right obstructive nephrouropathy with marked elevation of RI values after I.V. lasix. Left partial obstructive nephrouropathy with normal RI values before and after I.V. lasix	172
49 A,B,C	Case 20: Left partial obstructive uropathy with normal RI values before and after I.V. lasix	176
50 A,B,C	Case 21: Right partial obstructive uropathy with left non obstructive dilatation. Insignificant decrease in RI values of both kidneys after lasix injection	180

LIST OF TABLES

Tab. No.	Title	Page
1	The distribution of age and sex of the controls	81
2	The RI of intra renal arteries in the control group	82
3	The RI of segmental arteries in comparison with interlobar arteries in the control group	82
4	The RI of segmental arteries as compared with arcuate arteries in the control group	83
5	The RI of interlobar arteries as compared with arcuate arteries in the control group	83
6	The distribution of age and sex of the patients	84
7	The number and causes of non examined kidneys	84
8	The groups of the examined kidneys	85
9	The different causes of obstructive dilatation	86
10	the different causes of non obstructive dilatation	86
11	The RI of segmental arteries in the different groups as compared with normal group	87
12	The RI of interlobar arteries in the different groups, as compared with normal group	87
13	The RI of arcuate arteries in the different groups, as compared with normal group	88
14	The mean RI of the kidneys in different groups as compared with normal group	88
15	The RI of intra renal arteries in group D, as compared with RI values of group B1	90
16	The RI of interlobar arteries in different groups as compared with segmental arteries	91
17	the RI of arcuate arteries in different groups compared with segmental arteries	91
18	The RI of arcuate arteries in different groups as compared with interlobar arteries	92

19	The distribution of mean RI values in different renal groups	93
20	Number of kidneys in different grades of hydronephrosis	94
21	Mean RI of intra renal arteries in moderate hydronephrosis, as compared with mild hydronephrosis	94
22	Mean RI of intra renal arteries in advanced hydronephrosis as compared with mild hydronephrosis	95
23	Mean RI of intra renal arteries in advanced hydronephrosis as compared with moderate hydronephrosis	95
24	the distribution of RI values in completely obstructed kidneys	96
25	Comparison between RI of intra renal arteries in unilaterally obstructed kidneys and RI of contra lateral normal kidneys	97
26	Comparison between RI of intrarenal arteries in unilaterally non obstructed kidneys, and RI of contra lateral normal kidneys	98
