

# **New Trends in Management of Septic Shock**

*Essay submitted for partial fulfillment of the Master Degree  
of Anaesthesia*

*Presented by*  
**Sherif George Anis**  
M.B.B.Ch.

*Under Supervision of*

*Prof. Dr. Ahmed Gamal Issa*  
Professor of Anaesthesia and Intensive Care  
Faculty of Medicine - Ain Shams University

*Prof. Dr. Nahed Effat Youssef*  
Professor of Anaesthesia and Intensive Care  
Faculty of Medicine - Ain Shams University

*Dr. Sherif Wadie Nashed*  
Lecturer in Anaesthesia and Intensive Care  
Faculty of Medicine - Ain Shams University

1999

## *Acknowledgment*

First; thanks are all due to *God* for blessing this work until it has reached its end as a part of his generous help throughout my life.

I would like to direct special thanks to *Prof. Dr. Ahmed Gamal Issa*, professor of Anesthesia and Intensive Care, faculty of medicine, Ain Shams university, for the great support and encouragement he gave me throughout the whole work. It is a great honor to work under his guidance and supervision.

I am also very grateful to *Prof. Dr. Nahed Effar Youssef*, professor of Anesthesia and Intensive Care, faculty of medicine, Ain Shams university, for her generous help and support; she gave me in each step of this work.

I am deeply indebted to *Dr. Sherif Wadie Nashed*, lecturer in Anesthesia and Intensive Care, faculty of medicine, Ain Shams university, for his close supervision, continuous help and the great effort he has done during the preparation and revision of the whole work.

Sherif George Anis

TO MY FAMILY

## ***Table of contents***

	Page
Introduction	1
<b>Chapter I: Pathophysiology of sepsis</b>	<b>3</b>
-Definition of sepsis	7
-Pathophysiology of septic shock	8
-Septic shock mediators	12
I. Endotoxins	12
II. Cytokines	13
III. Arachidonic acid metabolites	23
IV. Platelet activating factor	26
V. Oxygen free radicals	26
VI. Nitric oxide	27
VII. Coagulation factors	27
VIII. complement	28
-Septic shock cascade	29
-Oxygen consumption, oxygen delivery in septic shock	32
-Haemodynamic alterations in septic shock	35
-Metabolic changes and septic shock	42
<b>Chapter II: Aetiology and different types of sepsis</b>	<b>45</b>
-Clinical manifestations of septic shock	45
-Respiratory infections	48
-Urosepsis	59
-Sepsis from the abdomen	65
-Paranasal sinusitis	77
-Central nervous system infections	79
-Pancreatitis	86
-Wound infections	90
-Trauma and sepsis	91
<b>Chapter III: Outcome prediction of sepsis</b>	<b>97</b>
-Lactic acidosis in sepsis	97

-Haemodynamic predictors in sepsis	111
-Gastric intramucosal pH (pHi)	117
-Inflammatory mediators predict outcome of sepsis	121
-Scoring systems	128
<b>Chapter IV: Recent trends in management of septic shock</b>	135
-Predisposing factors and prevention.	135
-Immediate resuscitation	136
First step: Restoration of blood volume	136
Second step: Restoration of tissue perfusion pressure	139
Third step: Restoration of oxygen delivery	143
Antibiotic therapy	148
-Immunotherapy	150
I. Antibodies to endotoxins	150
II. Anti TNF therapy	151
III. Anti IL-1 therapy	157
IV. Anti IL-6 antibody	159
V. Adhesion molecules antibodies	161
VI. Oxygen free radical scavengers	164
VII. Nitric oxide synthesis inhibitors	165
VIII. Granulocyte colony stimulatory factor	166
IX. Opioid peptides	167
X. Pentoxifylline	167
XI. Steroids	168
XII. Arachidonic acid metabolites inhibitors	169
XIII. Platelet activating factor (PAF) antagonist	171
Summary	173
References	177
Arabic summary	

## ***List of tables***

	Page
Table 1: Effects of TNF- $\alpha$ .....	18
Table 2: Isolated pathogens from blood cultures, empyema fluid or lower respiratory tract specimens....	48
Table 3: Nosocomial UTIs in United States.....	60
Table 4: Number and percent of infections in polytraumatized patients.....	95
Table 5: The APACHE II severity of disease classification system.....	130

## ***List of figures***

	Page
Figure 1: The relationship between sepsis, infection and SIRS.....	4
Figure 2: Proposed scheme for the pathogenesis of human septic shock.....	9
Figure 3: Pathogenic sequences of the events in septic shock.....	11
Figure 4: Direct and indirect effects of TNF on microcirculation.....	19
Figure 5: Arachidonic acid metabolites.....	25
Figure 6: Septic shock cascade.....	31
Figure 7: Relationship between oxygen consumption and oxygen delivery in septic shock.....	32
Figure 8: Relationship between oxygen delivery and oxygen extraction ratio in septic shock.....	33
Figure 9: Principal hemodynamic alterations in septic shock.....	37
Figure 10: Parameters determining cardiac output.....	39
Figure 11: Interorgan glucose homeostasis and regulation of glucose-alanine metabolic cycle in sepsis...	44
Figure 12: Colonization of the oropharynx with gram negative aerobic bacilli (GNAB) in different groups of subjects.....	50
Figure 13: The most common isolated pathogens in nosocomial infections and gastric colonization in ICU patients.....	68
Figure 14: Cellular lactate production.....	99
Figure 15: Cellular transport of lactate.....	102
Figure 16: Schematic representation of vascular counter-current system.....	109
Figure 17: Effect of dobutamine on different haemodynamic parameters.....	144

# ***Introduction***
