

Evaluation of Internal Fixation of Diaphyseal Fractures of the Tibia by Unreamed Interlocking Nailing

Thesis Submitted for Partial Fulfilment of the MD Degree in
Orthopaedics

By

Ashraf Mohamed Naguib Mahmoud Salem
MB.B.Ch-M.Sc (Orthopaedics)

Under Supervision Of

Professor Hassan El-Zaher Hassan
Professor Of Orthopaedics
Ain Shams University

Professor
Hussein El-Khateeb
Professor of Orthopaedics
Ain Shams University

Professor
Mohamed Sadek El-Sokkary
Ass. Professor of Orthopaedics
Ain Shams University

**Faculty Of Medicine
Ain Shams University
1996**

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

" إقرأ بسم ربك الذي خلق * خلق الإنسان
من علق * أقرأ وربك الأكرم الذي علم
بالقلم * علم الإنسان ما لم يعلم "

((صدق الله العظيم))

Table of Contents

Introduction.....	1
 Blood Supply of the Tibia.....	 3
• Nutrient Artery.....	3
• Periosteal Blood Supply.....	4
• Venous Drainage.....	8
• Intracortical Perfusion.....	9
• Vascular Response To Plating.....	10
• Vascular Response To Reaming.....	12
• Cortical Blood Flow in Reamed and Unreamed Nailing.....	15
 Biomechanics.....	 17
• Loads Applied to the Tibia In Life.....	17
• Nail Designs and Biomechanics.....	19
• Slotted and Non Slotted Nails.....	24
• Reamed and Unreamed Nails.....	29
• Influence of Design Parameters on the Biomechanics.....	35
 Classification.....	 40
• Ellis Classification.....	41
• Muller Classification.....	41
• Johner and Wruhs Classification.....	44
• Tschernse and Gotzen Classification.....	48
• Gustilo and Anderson Classification Of Open Fractures.....	49

Intramedullary Reaming.....	51
• Effect of Reaming on the Intramedullary Pressure.....	51
• Local Consequences of Intramedullary Pressure Increase.....	54
• Generalized Consequences of Intramedullary Pressure Increase.....	58
• Theories of Lung Dysfunction After Reamed Nailing.....	59
• The Border Line Patient.....	65
Ionizing Radiation.....	70
• Potential Risks with Exposure to Low Dose Radiation.....	71
• How Much Irradiation Is Safe?.....	73
• Radiation Exposure During Closed Nailing.....	75
Material.....	78
• Patients.....	78
• Sex Distribution.....	78
• Age Distribution.....	80
• Fractures.....	83
• Side Distribution.....	83
• Classification.....	85
• Mechanism of Injury.....	90
Methods.....	93
• Admission and Follow Up Sheet.....	93
• Pre-Operative Planning.....	97
• Timing of Surgery.....	99
• Surgical Technique.....	102

• Care of the Wound In Open Fractures.....	120
• Early Post Operative Management.....	121
• Follow Up.....	122
Results.....	125
• Results In The Open Fractures' Group.....	126
• Results In The Close Fractures' Group.....	143
• Assessment of the Total Results.....	155
Case Presentation.....	162
Discussion.....	186
• Conclusion and Clinical Recommendation.....	201
Summary.....	204
References.....	206

List Of Tables

- **Table 3-1:** Classification of open fractures.
- **Table 6-1:** Sex distribution.
- **Table 6-2:** Fractures' side distribution.
- **Table 6-3:** Classification of the fractures included in this series.
- **Table 7-1:** Assessment system.
- **Table 8-1:** Number and percentage of fractures in relation to healing time.
- **Table 8-2:** Relation between age and the average healing time - open fractures.
- **Table 8-3:** Relation between grade of injury and average healing time-open fractures
- **Table 8-4:** Relation between the timing of surgery and average healing time-open fractures.
- **Table 8-5:** Relation between the type of locking and average healing time - open fractures.
- **Table 8-6:** Functional results- open fractures.
- **Table 8-7:** Number of fractures healed at different time periods-closed fractures.
- **Table 8-8:** Relation between age and healing time-closed fractures.
- **Table 8-9:** Relation between severity of injury and healing time-closed fractures.

-
- **Table 8-10:** Relation between type of locking and average healing time- closed fractures.
 - **Table 8-11:** Relation between timing of surgery and healing time. closed fractures.
 - **Table 8-12:** Functional results. closed fractures.
 - **Table 8-13:** Number and percentage of fractures in relation to healing time in the whole series.
 - **Table 11-1:** Comparison between infection rate in this series and other series treated by dynamic compression plating.
 - **Table 11-2:** Comparison between our results and the results of another series treated by external fixation.
 - **Table 11-3:** Comparison between the results in our series and other series treated by reamed interlocking nailing.
 - **Table 11-4:** Comparison between our results and other series treated with the interlocked unreamed nails.
