سورة البقرة - الآية: ٣٢

ACKNOWLEDGMENT

I would like to express my sincere gratitude and cordial appreciation to all the members of the Orthopaedic and Neurosurgery Departments of Ain Shams University Hospitals, for their help throughout this work,

I am especially grateful to Prof. Dr. Ahmed Samir El-Molla, Head of Neurosurgery Department, Faculty of Medicine, Ain Shams University and Prof. Dr. Mohamed Maziad, Prof. of Orthopaedic Surgery, Faculty of Medicine, Ain Shams University, for their valuable supervision, constructive guidance, continuous encouragement and generous help during preparation of this work,

Sincere thanks and appreciation are due to Prof. Dr., Abd El-Mohsen Arafa, Ass. Prof. of Orthopaedic Surgery, Faculty of Medicine, Ain Shams University and Dr. Atef El-Beltagy, Lecturer of Orthopaedic Surgery, Faculty of Medicine, Ain Shams University, for their supervision, meticulous advice, and fruitful suggestions were of utmost help throughout the work,

I would like to extend my deep thankfulness to all colleagues in our department and different members of staff who have participated in one way or another in the planning, execution, and presentation of this study in its final form.

LIST OF CONTENTS

	Page
Introduction	1
Anatomy	4
Movement of the cervical spine	40
Kinematics	42
Biomechanics	45
Pathophysiology	52
Clinical picture	70
Differential diagnosis	77
Investigations:	
• <i>Radiological</i>	81
• <i>Electrodiagnostic testing</i>	95
Treatment	97
Surgical treatment	102
Principles of bone fusion in anterior cervical spine	128
Material and methods	135
Results	142
Case presentation	168
Discussion	202
Summary and conclusion	215
References	222
Arabic summary	

LIST OF TABLES

	Page
Tables in the review of literature:	
Table (I): Thompson classification for assessment of degeneration of the intervertebral disc by MRI.	90
Table (II): Algorithm for diagnosis and management	97
Table (III): Complications of anterior surgical approach	113
Tables in the results:	
Table (1): Type of operation	142
Table (2 a): Age distribution of studied cases	143
Table (2 b): Mean age in relation to operation	143
Table (3 a): Sex distribution among studied cases	144
Table (3 b): Operation by sex	145
Table (4): Preoperative investigations	146
Table (5 a): Frequency of disc level affected	147
Table (5 b): Relation between disc level and sex	148
Table (5 c): Relation between disc level operated and type of operation	149
Table (6 a): Incidence of insured patients in this thesis	150
Table (6 b): Operation type by insurance	151
Table (7 a): Relation between the disease and occupation	151
Table (7b): Occupation by operation if it is disease related or not	152
Table (8 a): Operative duration of complaint	153
Table (8 b): Mean duration of complaint in relation to operation	153
Table (9): Incidence of myelopathy pre and postoperative	154
Table (10): Pre and postoperative score for radiculopathy	156
Table (11 a): Limitation of neck movement	158
Table (11 b): Rate of improvement of neck movement in patients with discectomy (21 cases)	160
Table (11 c): Rate of improvement of neck movement in patients with discectomy and fusion	160
Table (12 a): Patient satisfaction from the results of surgery	161
Table (12b): Operation by patient satisfaction	162
Table (13 a): Postoperative duration after which the patient return to his preoperative work	163
Table (13 b): Mean return to work in relation to operation	163
Table (14): Postoperative X-ray follow-up	164
Table (15): Postoperative complications	166
