LIST OF TABLES	PAGE
----------------	------

I) Review of literature.

Table 1: Associated pathology in 62 infertile patients with PCOD (Buttram & Reiter, 1985).	49
Table 2: Clinical presentation in 740 patients with PCOD treated surgically (Cohen, 1979).	109
Table 3: Number of patients submitted to 4 different operative methods of ovarian wedge resection (Cohen, 1979).	112
Table 4: Findings at short-interval second-look laparoscopy: Extent of postoperative adhesion formation after ovarian electro-cautery or Nd:YAG laser photocoagulation.	135

II) RESULTS:

Table 1: The age distribution of the participating patients.	159
Table 2: Type of infertility in the participating patients.	159
Table 3: Menstrual pattern in the participating patients.	160
Table 4: Weight of the participating patients.	160
Table 5: Acne in the participating patients.	160
Table 6: Endometrial hyperplasia in the participating patients.	161
Table 7: Hirsutism in the participating patients.	161
Table 8: Pregnancy outcome in the participating patients after operation.	161
