ACKNOWLEDGMENT

I would like to thank all the staff of the Radiodiagnosis Department, Ain Shams University, who encouraged me to do this thesis.

Special thanks to professor Dr. Mohamed Sami El Biblawy, Professor of Radiodiagnosis, Ain Shams University, who supported me all the way from my first day in the field of radiodiagnosis.

My Deepest gratitude to Professor Dr. Ahmed El Domy, Professor of Radiodiagnosis, Ain Shams University, who taught me a lot of his gifted talent both in venography and Doppler studies.

My sincere gratitude also to Dr. Yasser Abdelazim Abbas, Lecturer of Radiodiagnosis, who devoted a lot of his time during the past three years to help me understand the art of MRV.

Lastly but certainly not least I would like to thank Dr. Osama Lotfi, head of the Department of Radiodiagnosis, Egypt Air hospital who helped me a lot and Dr. Mamdouh Labib, vascular surgeon, Egypt Air hospital who believed in our results.

List of Tables

<i>Table No.</i>	<i>Subject</i>	<i>Page No.</i>
1	Cases studied according to sex, number percentage and age range	53
2	Presence or absence of thrombosis in each segment of the lower limb using contrast venography as the gold standard	76
3	Duplex Doppler examination results for each venous segment.	79
4	MRV examination results for each venous segment.	79
5	Sensitivity, specificity, positive predictive value, negative predictive value, and accuracy of duplex Doppler ultrasonography and MRV in each separate segment of the venous system of the lower limb compared with the gold standard, contrast venography	80
