

*Human Herpes Virus-6 in
Acute Childhood Leukemia and
Malignant Lymphoma*

*Thesis submitted for partial fulfillment of the
Master Degree in Pediatrics*

Presented by

Mohamed Abdel Aziz Fahmy Hagra

MB, B.Ch, Ain Shams University

Under the supervision of

Prof. Dr.

Galila Mohamed Mokhtar

Professor of Pediatrics

Faculty of Medicine-Ain Shams University

Ass. Prof. Dr.

Azza Abdel Gawad Tantawy

Assistant Professor of Pediatrics

Faculty of Medicine-Ain Shams University

Ass. Prof. Dr.

Aisha Hafez Mohamed

Assistant Professor of Microbiology and Immunology

Faculty of Medicine-Ain Shams University

Faculty of Medicine
Ain Shams University

1999

Acknowledgment

*First and foremost, I would like to express my deep feelings of gratitude to Prof. Dr. **Galila Mokhtar**, Professor of Pediatrics, Ain Shams University, for her tremendous support and guidance that enabled me to accomplish this work. I am deeply grateful to her that words are never enough to express.*

*I would like to express my sincere feelings of appreciation and admiration to Ass. Prof. Dr., **Azza Abdel Gawad**, Assistant Professor of Pediatrics, Ain Shams University, for her guidance, meticulous revision and valuable comments that guided me through this work.*

*I would also like to extend my thanks and feelings of gratitude to Ass. Prof. Dr., **Aisha Hafez**, Assistant Professor of Microbiology and Immunology, Ain Shams University for her guidance and support throughout this work.*

*My thanks and appreciation go to Dr. **Amany Saleh**, Lecturer of Microbiology and Immunology, Ain Shams University for her valuable help and support throughout the work.*

Last but not least, I would like to express thanks to my family for their support and unfailing love.

Mohamed Hagra

1. The first part of the document is a list of references. The references are listed in a vertical column on the left side of the page. The references are as follows:

To My Beloved Family

List of Contents

	Page No.
<i>Introduction and Aim of the Work</i>	1
<i>Review of literature</i>	
Human Herpes Virus-6	3
Leukemia in Childhood	31
Lymphoma in Childhood	55
<i>Subjects and Methods</i>	70
<i>Results</i>	84
<i>Discussion</i>	106
<i>Summary, Conclusion and Recommendations</i>	112
<i>References</i>	117
<i>Arabic Summary</i>	

List of Abbreviations

- ALL: Acute lymphoblastic leukemia***
AML: Acute myelogenous leukemia
BMT: Bone marrow transplantation
CALLA: Common acute lymphoblastic leukemia antigen
CrI: Cranial irradiation
DRS: Directly oriented terminal repeats
EBV: Epstein Barr virus
ES: Erythema subitum
GVHD: Graft versus host disease
HCMV: Human cytomegalovirus
HD: Hodgkin's disease
HHV-6: Human herpes virus type 6
IFA: Immunofluorescent assay
IT: Intrathecal
KS: Kaposi sarcoma
NHL: Non-Hodgkin's lymphoma
NK: Natural killer
OM: otitis media
PBMC: Peripheral bone marrow cells
PCL: Primary cerebral lymphoma
PCR: Polymerase chain reaction
VZV: Varicella zoster virus
WBCs: White blood cells
+ve: Positive
-ve: negative

List of Tables

	Page No.
<i>Table(1): Final preparation of PCR mix</i>	78
<i>Table (2): Association between the presence of HHV-6 in diseased children and controls</i>	84
<i>Table (3): Prevalence of HHV-6 in different studied groups of ALL</i>	85
<i>Table (4): Prevalence of HHV-6 in different studied groups of lymphomas.</i>	85
<i>Table (5): Morphological and immunophenotypical types of ALL in the newly diagnosed cases</i>	86
<i>Table (6): Morphological and immunophenotypical types of ALL in patients in remission</i>	86
<i>Table (7): Prevalence of HHV-6 in leukemia and lymphoma</i>	87
<i>Table (8): Prevalence of HHV-6 in different types of lymphoma</i>	88
<i>Table (9): Comparison of the Hemoglobin level in in the studied groups using T test.</i>	89
<i>Table (10): Comparison of the Platelets count in the studied groups using T test.</i>	92
<i>Table (11): Comparison of the WBCS count in the studied groups using T test.</i>	95
<i>Table (12): Comparison of the ALT in the studied groups with using T test.</i>	97
<i>Table (13): Association of Otitis media and HHV-6 infection in the studied group</i>	99
<i>Table (14): Association of Hepatomegaly and HHV-6 infection in the studied group</i>	101

<i>Table (15): Association of blood and blood products transfusion and HHV-6 infection in the studied group</i>	<i>103</i>
<i>Table (16): Comparison of the chest infection in the studied groups</i>	<i>104</i>
<i>Table (17): Comparison of the regularity of the course of therapy in the groups in remission</i>	<i>105</i>

List of Figures

	<i>Page No.</i>
<i>Figure (1): Genetic relationship of HHV-6 to other herpes virus.</i>	4
<i>Figure (2): HHV-6 genomic and genetic structure.</i>	10
<i>Figure (3): HHV-6 gene blocks.</i>	12
<i>Figure (4): Types of childhood cancers.</i>	32
<i>Figure (5): Peripheral blood film and bone marrow from a patient with L2 ALL.</i>	36
<i>Figure (6): Peripheral blood and bone marrow film from a patient with MO AML.</i>	37
<i>Figure (7): Microfuge.</i>	72
<i>Figure (8): Thermal cycler</i>	74
<i>Figure (9): Vortex.</i>	75
<i>Figure (10): Biosafety cabinet.</i>	76
<i>Figure (11): Laminar flow and Polaroid camera.</i>	80
<i>Figure (12): PCR film showing positive control, positive samples, negative samples for PCR.</i>	83
<i>Figure (13): presence of hepatitis in cases infected with HHV in different studied groups</i>	105'
