

A COMPARATIVE STUDY ON GROWTH AND MEAT PRODUCTION
AMONG NATIVE AND FOREIGN BREEDS OF CHICKENS
AND THEIR CROSSES

By

FAROUK HASSAN ABDOU

B.Sc. (Agric.), Alexandria University, 1959.

M.Sc. (Agric.), Alexandria University, 1964.

Thesis

Submitted in partial fulfilment of the requirements

for the Degree of

"DOCTOR OF PHILOSOPHY"

in

Poultry Production

Faculty of Agriculture

ACKNOWLEDGEMENT

The writer wishes to express his deepest appreciations to Prof. S.S. Khishin, Head of the Anim. Prod. Dept., Ain Shams University for his supervision and encouragement.

I feel greatly indebted to Dr. H.F. Issawi, Prof. of Poultry Breeding for suggesting the problem, and his most helpful supervision.

I wish to express my deep sense of gratitude to Dr. M.E. Amer, Assistant Prof. of Poultry Production and Dr. M. Afifi, Assistant Prof. of Poultry Nutrition for their supervision and their valuable comments in the various phases of this work.

Thanks are also due to Dr. S. Galal, Lecturer of Animal Breeding for his assistance and valuable criticism.

Special thanks are extended to Prof. M.E. Lasheen, Dean of Faculty of Agric., Ain Shams University, Shebin El-Kom, for his encouragement and providing the necessary facilities.

INTRODUCTION	1
REVIEW OF LITERATURE	3
I- BODY WEIGHT AND RATE OF GROWTH:	
a) Effect of Crossbreeding on Body Weight and Rate of Growth	3
b) Seasonal Effect on Body Weight	10
II- CARCASS STUDIES:	
a) Meat Yields	11
b) Offals' Weights	19
III- PHENOTYPIC CORRELATIONS	26
IV- FEED EFFICIENCY	29
MATERIAL AND METHODS	36
RESULTS AND DISCUSSION	42
I- BODY WEIGHTS:	
1- Body Weight at 8 Weeks of Age	42
2- Body Weight at 12 Weeks of Age	44
3- Body Weight At 16 Weeks of Age	48
4- Seasonal Variations in Live Body Weight..	52
II- RATE OF GROWTH :	
a) Effect of Crossbreeding on Growth Rate...	55
b) Seasonal Effect on Rate of Growth	57

	Page
III- MEAT YIELD	
1) Carcass Studies	59
a) Effect of Crossbreeding on Carcass Weight at 12 Weeks of Age	59
b) Effect of Crossbreeding on Carcass Weight at 16 Weeks of Age.....	63
c) Seasonal Variations in Carcass Weight at 12 and 16 Weeks of Age.....	67
2) Eviscerated Studies	
a) Effect of Crossbreeding on Eviscerated Weight at 12 Weeks of Age	69
b) Effect of Crossbreeding on Eviscerated Weight at 16 Weeks of Age.....	71
c) Seasonal Variations in Eviscerated Weight at 12 and 16 Weeks of Age	74
3) Offals' Weights	
a) Blood Weights	76
b) Feather Weights	80
c) Shank Weights	84
4) Potence Ratio	89
5) Nichols Studies	92
IV- HYBRID VIGOR	94
V- PHENOTYPIC CORRELATIONS BETWEEN LIVE WEIGHT AND MEAT YIELD	96

Arabic Summary	

List of Tables

<u>Table No.</u>	<u>Page</u>
1 Number of chicks and season of hatch for the experimental birds.	113
2 Number of slaughtered chickens for all the experimental birds.	114
3 Means of live body weights, in grams, of different breeds and crosses at eight weeks of age. (Weighted means of males and females at different seasons) .	115
4 Analysis of variance of live body weight at 8 weeks of age during different seasons.	116
5 Comparisons between every two means of live body weights of the experimental chickens at eight weeks of age by Duncan's new multiple range test at different seasons.	117
6 Means of live body weights, in grams, of different breeds and crosses at eight weeks of age. (Males; at different seasons).	118
7 Means of live body weights, in grams, of different breeds and crosses at eight weeks of age. (Females; at different seasons).	119
8 Mean weights of live body and different parts of the body in grams at 12 weeks of age (1st year-averages).	120
9 Comparisons between every two means of live body, carcass and eviscerated weights at 12 weeks of age by Duncan's new multiple range test. (1st year-averages).	121
10 Percentage of different parts of the body in relation to live body weight at 12 weeks of age. (1st year-average).	122

<u>Table No.</u>	<u>Page</u>
11 Analysis of variance of body weight and different parts of the body at 12 weeks of age (<u>1st</u> year 1966).	123
12 Analysis of variance of relative weights of different body parts at 12 weeks of age (<u>1st</u> year 1966).	124
13 Means of live weight and different parts of the body at 12 weeks of age. (Males ; spring season 1967).	125
14 Percentage of different parts of the body in relation to live body weight at 12 weeks of age. (Males; Spring season 1967).	126
15 Means of live weight and different parts of the body in grams, at 12 weeks of age. (Females, Spring season 1967).	127
16 Percentage of different parts of the body in relation to live body weight at 12 weeks of age. (Females, Spring season 1967).	128
17 Means of live weights and different parts of the body at 12 weeks of age in grams. (Spring season 1967).	129
18 Comparisons between every two means of live body, carcass, and eviscerated weights at 12 weeks of age by Duncan's new multiple range test. (Spring season 1967).	130
19 Percentage of different parts of the body in relation to live body weight at 12 weeks of age. (Spring season 1967).	131
20 Analysis of variance of body weight and different parts of the body at 12 weeks of age (Spring season 1967).	132
21 Analysis of variance of relative weights of different body parts at 12 weeks of age (Spring season 1967).	133

<u>Table No.</u>	<u>Page</u>
22 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (<u>1st</u> year-averages).	134
23 Comparisons between every two means of live body, carcass and eviscerated weights at 16 weeks of age by Duncan's new multiple range test (<u>1st</u> . year-averages).	135
24 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (<u>1st</u> year-averages).	136
25 Analysis of variance of body weight and different parts of the body at 16 weeks of age (<u>1st</u> year 1966).	137
26 Analysis of variance of relative weights of different body parts at 16 weeks of age (<u>1st</u> year 1966).	138
27 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (Males; <u>2nd</u> year averages).	139
28 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Males; <u>2nd</u> year-averages).	140
29 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (Females; <u>2nd</u> year-averages).	141
30 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Females; <u>2nd</u> year-averages).	142
31 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (<u>2nd</u> year averages).	143
32 Comparisons between every two means of live body, carcass and eviscerated weights at 16 weeks of age by Duncan's new multiple range test. (<u>2nd</u> year-averages).	144

<u>Table No.</u>	<u>Page</u>
33 Percentages of the different parts of the body in relation to live body weight at 16 weeks of age. (Females; 2 nd year-averages).	145
34 Analysis of variance of body weight and different parts of the body at 16 weeks of age (2 nd year 1967).	146
35 Analysis of variance of relative weights of different body parts at 16 weeks of age (2 nd year 1967).	147
36 Mean weights of live body and different parts of the body in grams at 12 weeks of age. (Winter season 1966).	148
37 Comparisons between every two means of live body, carcass and eviscerated weights at 12 weeks of age by Duncan's new multiple range test (Winter season 1966).	149
38 Percentages of different parts of the body in relation to live body weight at 12 weeks of age. (Winter season 1966).	150
39 Analysis of variance of body weight and different parts of the body at 12 weeks of age (Winter season 1966).	151
40 Analysis of relative weights of different body parts at 12 weeks of age (Winter season 1966).	152
41 Mean weights of live body and different parts of the body in grams at 12 weeks of age. (Spring season 1966).	153
42 Comparisons between every two means of live body, carcass and eviscerated weights at 12 weeks of age by Duncan's new multiple range test, (Spring season 1966).	154
43 Percentages of different parts of the body in relation to live body weight at 12 weeks of age. (Spring season 1966).	155

<u>Table No.</u>	<u>Page</u>
44 Analysis of variance of body weight and different parts of the body at 12 weeks of age (Spring season 1966).	156
45 Analysis of variance of relative weights of different body parts at 12 weeks of age (Spring season 1966).	157
46 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (Winter season 1966).	158
47 Comparisons between every two means of live body, carcass and eviscerated weights at 16 weeks of age by Duncan's new multiple range test. (Winter season 1966).	159
48 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Winter season 1966).	160
49 Analysis of variance of body weight and different parts of body at 16 weeks of age (Winter season 1966).	161
50 Analysis of variance of relative weights of different body parts at 16 weeks of age (Winter season 1966).	162
51 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (Spring season 1966).	163
52 Comparisons between every two means of live body, carcass and eviscerated weights at 16 weeks of age by Duncan's new multiple range test. (Spring season 1966).	164
53 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Spring season 1966).	165
54 Analysis of variance of body weight and different parts of the body at 16 weeks of age (Spring season 1966).	166

<u>Table No.</u>	<u>Page</u>
55 Analysis of variance of relative weights of different body parts at 16 weeks of age. (Spring season 1966).	167
56 Mean weights of live body and different parts of the body in grams at 16 weeks of age. (Males; Winter season 1967).	168
57 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Males; Winter seasons 1967).	169
58 Mean weights of live body and different parts of the body in grams at 16 weeks of age (Females; Winter season 1967).	170
59 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Females; Winter season 1967).	171
60 Mean weights of live body and different parts of the body in grams at 16 weeks of age (Winter season 1967).	172
61 Comparison between every two means of live body, carcass and eviscerated weights at 16 weeks of age by Duncan's new multiple range test. (Winter season 1967).	173
62 Percentages of different parts of the body in relation to live body at 16 weeks of age. (Winter season 1967).	174
63 Analysis of variance of body weight and different parts of the body at 16 weeks of age (Winter season 1967).	175
64 Analysis of variance of relative weights of different body parts at 16 weeks of age (Winter season 1967).	176
65 Means of live weight, and different parts of the body at 16 weeks of age in grams (Males; Spring season 1967).	177

<u>Table No.</u>	<u>Page</u>
66 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Males; Spring season 1967).	178
67 Means of live weight, and different parts of the body at 16 weeks of age in grams (Females; Spring season 1967).	179
68 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Females; Spring season 1967).	180
69 Means of live weights, and different parts of the body at 16 weeks of age in grams. (Spring season 1967).	181
70 Comparisons between every two means of live body, carcass and eviscerated weights at 16 weeks of age by Duncan's new multiple range test. (Spring season 1967).	182
71 Percentages of different parts of the body in relation to live body weight at 16 weeks of age. (Spring season 1967).	183
72 Analysis of variance of body weight and different parts of the body at 16 weeks of age (Spring season 1967).	184
73 Analysis of variance of relative weights of different body parts at 16 weeks of age (Spring season 1967).	185
74 Means of live weight, and different parts of the body in grams of Nichols' chickens at different ages. (Winter season 1966).	186
75 Percentages of different parts of the body in relation to live body weight of Nichols at different ages. (Winter season 1966).	187
76 Rate of growth of the chickens of <u>1st</u> . year 1966.	188
77 Rate of growth of the chickens of Winter season 1966.	189
