OPTIMUM UTILIZATION OF
WATER HYACINTH PLANTS IN
FEEDING RUMINANTS

BY

MOHSEN MAHMOUD SHOUKRY

B.Sc.(Agric., Animal Production), 1972

Ain Shams University

M.Sc.(Agric., Animal Nutrition), 1978

Ain Shams University

Thesis Submitted

TO

The Faculty of Agriculture, Ain Shams University

IN

Partial Fulfillment of the requirements *Ph D*

FOR

The Ph.D.DEGREE

(Animal Nutrition)

1982

Animal Nutrition Section *g*

APPROVAL SHEET

OPTIMUM UTILIZATION OF WATER HYACINTH

PLANTS IN FEEDING RUMINANTS

BY

MOHSEN MAHMOUD SHOUKRY

Thesis Submitted for the Ph. D. Degree

Approved by:

Khaled Haggag

Hatem Mohamed Ali

Ali El Ghalib

Committee in Charge

Date: 29 / 12 / 1982

LIST OF ABBREVIATION

ADF	Acid detergent fiber .
ADL	Acid detergent lignin .
BH	Barseem hay .
CF	Crude fiber .
CP	Crude protein .
C:F ratio	Concentrate: roughage ratio .
DGP	Digestible crude protein .
DM	Dry matter .
DP	Digestible protein .
EE	Ether extract .
GE	Gross energy .
ISDM	<u>In Situ</u> dry matter disappearance .
ISOM	<u>In Situ</u> organic matter disappearance .
IVDM	<u>In Vitro</u> dry matter disappearance .
N	Nitrogen .
Nbalance	Nitrogen balance .
NDF	Neutral detergent fiber .
NFE	Nitrogen free extract .
NP	Net protein nitrogen .
OM	Organic matter .
SE	Starch equivalent .
SV	Starch value .
TDN	Total digestible nutrients .
TN	Total nitrogen .
WFI	Water insoluble fiber .
WHF	Water insoluble hay .
WHD	Water insoluble digesta .

CONTENTS

Page

CHAPTER I :

INTRODUCTION.....	1
REVIEW OF LITERATURE.....	3-49
1. Description of water hyacinth (WH) plants..	3
2. The history and advent of WH to the Nile...	4
3. Productivity of WH (<u>E.crassipes</u>)	6
4. Factors limiting the utilization of fresh WH as a feed for ruminants.....	8
5. Methods of processing WH	10
5.1. Partial dewatering and drying.....	10
5.2. Ensiling procedures and silage additi- ves.....	12
6. Chemical composition of fresh and processed WH.....	16
6.1. Effect of location and season.....	16
6.2. Effect of processing method.....	22
7. Intake and acceptability of fresh and pro- cessed WH.....	27
7.1. Fresh, partially and completely dried WH.....	27
7.2. Ensiled WH.....	31
8. Digestibility and nutritive value of fresh and processed WH.....	33
8.1. Fresh, partially and completely dried WH.....	33

	Page
8.2. Ensiled WH.....	39
9. <u>In Vitro</u> and <u>In Situ</u> evaluation of WH....	41
10. Alkali treatment of poor quality roughages.	42
10.1. Effect of alkali treatment on chemical composition of the roughages.....	43
10.2. Effect of NaOH-treatment (spray) on <u>In Vivo</u> , <u>In Vitro</u> , <u>In Situ</u> nutrients disappearance and food intake of roughages.....	45

CHAPTER II :

GENERAL MATERIALS AND METHODS.....	50-59
1. Description and collection of WH plants.....	50
2. Processing of WH plants.....	51
2.1. As silage (WHS).....	51
2.2. As hay (WHH).....	52
3. Determination of IVDMI	53
4. Determination of <u>In Situ</u> DM, OM, N, NDF and GE disappearance.....	54
4.1. Animals used	54
4.2. Nylon bags.....	55
5. <u>In Vivo</u> experiments.....	56
5.1. Experimental animals.....	56
5.2. General management of the animals.....	56
5.3. Urine and faeces collection.....	57
5.4. Experimental rations.....	58

	Page
6. Chemical analysis.....	58
7. Calculations.....	59

CHAPTER III:

CHANGES IN CHEMICAL COMPOSITION AND POSSIBLY THE NUTRITIVE VALUE OF WH PLANTS ACCORDING TO THEIR LOCATION OR SEASON OF HARVESTING.....	60-80
--	-------

EXPERIMENT 1 : Effect of season and location on changes in chemical compo- sition, <u>In Situ</u> DM and OM disappearance and IVDMD of WH.....	60
--	----

CHAPTER IV :

UTILIZATION BY RUMINANTS OF WH PLANTS WHEN PRO- CESSED AS SILAGE	81-109
---	--------

EXPERIMENT 2 : Effect of soluble carbohydrate and type and level of ingredie- nts (roughages or concentrates) used in preparing WHS mixtures on their quality and nutritive value.....	81
---	----

EXPERIMENT 3 : Effect of urea inclusion and ensiling period on quality of WH silages and their nutri- tive value.	92
---	----

EXPERIMENT 4 : Effect of adding formic or propionic acid to WHS mixtures on their quality and nutritive value.....	104
---	-----

CHAPTER V :

UTILIZATION BY RUMINANTS OF WH PLANTS WHEN PROC- ESSED AS HAY	110-186
--	---------

EXPERIMENT 5: Effect of drying method and ext- raction of the juice on the che- mical composition and nutrients degradability of WHH (prepared from different parts of the plants) compared with BH.....	110
---	-----

EXPERIMENT 6: Food intakes and nutrients dig- estibility of WHH and BH given to water buffalo steers.....	145
---	-----

EXPERIMENT 7: Effect on feed intake and nutrients digestibility of feeding WHH along with either concentrates or good quality roughage (BH), to goats.....	152
--	-----

EXPERIMENT 8: Effect of alkali treatment (NaOH) on chemical composition <u>In Vitro</u> and <u>In Situ</u> nutrients disappearance of WHH.....	162
--	-----

EXPERIMENT 9:Utilization of alkali or/and urea treatment WHH by mature sheep.....	176
---	-----

CHAPTER VI :

GENERAL DISCUSSION	187-210
1. Changes in chemical composition and possibly the nutritive value of WH plants according to their location or season of harvesting.....	188
2. Utilization by ruminants of WH plants when processed as silage.....	190
3. Utilization by ruminants of WH plants when processed as hay.....	197
PRACTICAL APPLICATION.....	208
FUTURE STUDIES.....	209
SUMMARY AND CONCLUSIONS	211-224
REFERENCES	225-253
ARABIC SUMMARY	

LIST OF TABLES

Table No.	Page
1 Morphological measurements of WH plants collected from the same location (El-Alage waterway) during one year (January-December, 1980).....	63
2 Morphological measurements of WH plants collected from 4 different locations at the same time of the year (October 1980).....	64
3 Effect of season on chemical composition of different parts of WH plants.....	66
4 Effect of season on <u>In Situ</u> DM and OM disappearance (%) and IVDMD (%) of different parts of WH plants.....	70
5 ANOVA for <u>In Situ</u> DM and OM disappearance and IVDMD of different parts of WH plants collected from one location at different months.....	71
6 Effect of location on chemical composition of different parts of WH plants.....	74
7 Effect of location on <u>In Situ</u> DM and OM disappearance (%) and IVDMD (%) of different parts of WH plants.....	77

Table No.		Page
8	ANOVA for <u>In Situ</u> DM and OM disappearance and IVDMD of different parts of WH plants collected from 4 different locations at the same time of the year.....	78
9	Proximate composition, pH and lactic acid content of WHS mixtures.....	86
10	Dry matter intake, <u>In Vivo</u> and <u>In Vitro</u> digestibilities of WHS mixtures.....	88
11	Effect of urea and period of ensiling on the chemical composition of WHS	96-97
12	Effect of urea-treatment of WHS on DM intake and <u>In Vivo</u> nutrients digestibility.....	100
13	ANOVA for DM intake and <u>In Vivo</u> nutrients digestibility of WHS treated or untreated with urea, by sheep and water buffalo steers.....	101
14	Effect of formic (F) or propionic (P) acids addition to WHS mixtures (prepared from different parts of the plant) on their chemical composition and IVDMD.....	108

Table No.		Page
15	Gross chemical composition of WHH (different parts) and BH (aerial parts).....	114
16	<u>In Situ</u> DM, OM, N and NDF disappearance (%) of different samples of WHH and BH , at different incubation periods.....	122
17	Overall effect of type of plant on % disappearance of DM , OM,N and NDF of WHH (whole plant or aerial parts) and BH (aerial parts) all <u>not pulped</u> , at different intervals.....	123
18	Overall effect of type of plant on % disappearance of DM, N, NDF of WHH (whole plant or aerial parts) and BH (aerial parts) after being <u>pulped</u> , at different intervals.....	124
19	Overall effect of part of the plant and pulping on % disappearance of DM, OM and NDF of WHH at 24 and 48 hrs.....	125

Table No.		Page
20	Overall effect of method of drying on % disappearance of DM , OM, N and NDF, of WHH (prepared from whole plant, aerial parts, stems and leaves , all pulped or not pulped) at different intervals.....	126
21	Overall effect of method of drying on % disappearance of DM, OM, N and NDF of WHH (prepared from whole plant, aerial parts, stems and leaves, <u>not pulped</u>) at different intervals...	127
22	Overall effect of method of drying on % disappearance of DM and NDF of WHH (prepared from whole plant, aerial parts, stems and leaves, <u>all pulped</u>) at different intervals.....	128
23	Overall effect of method of drying on % disappearance of DM, OM, N and NDF of BH (prepared from aerial parts, intact or pulped) at different intervals.....	129
24	Overall effect of method of drying on % disappearance of DM, OM, N and NDF of BH (intact plant) at different intervals.....	130

Table No		Page
25	Overall effect of method of drying on % disappearance of DM, N and NDF of BH (pulped plant) at different intervals.....	131
26	Overall effect of pulping on DM, NDF disappearance (%) of WHH (whole plant, aerial parts, stems and leaves) at different intervals.....	132
27	Overall effect of pulping on DM and NDF disappearance (%) of WHH (whole plant, aerial parts, stems and leaves , <u>all sun dried</u>) at different intervals.....	133
28	Overall effect of pulping on DM and NDF disappearance (%) of WHH (whole plant, aerial parts, stems and leaves, <u>all oven dried</u>) at different intervals.....	134
29	Overall effect of pulping on DM, N and NDF disappearance (%) of BH (aerial parts) at different intervals.....	135
30	Overall effect of pulping on DM ,N and NDF disappearance (%) of BH (aerial parts , <u>sun dried</u>) at different intervals.....	136

Table No		Page
31	Overall effect of pulping on DM, N and NDF disappearance (%) of BH (aerial parts, <u>oven dried</u>) at different intervals.....	137
32	Comparative DM intake and <u>In Vivo</u> nutrients digestibility of WHH and BH when given to water buffalo steers.....	149
33	Chemical composition of feedstuffs used in digestion trial with goats.....	155
34	Mean values with their SE for DM and water intakes along with nutrients digestibility and N-balance of goats given WHH in rations containing BH or concentrate mixture.....	158
35	ANOVA for DM and water intakes and nutrients digestibility for goats given WHH in rations containing BH or concentrate mixture.....	159
36	Chemical composition of WHH treated or untreated with different levels of NaOH.....	166
