SUPERVISORS

- 1- Prof. Dr. Abdalla M. Ibrahim**
Faculty of Science, Ain Shams University,
Department of Zoology.
- 2- Prof. Dr. Fouad Yousif**
Theodor Bilharz Research Institute,
Department of Malacology.
- 3- Assistant Prof. Dr. Nawal Haroun**
Theodor Bilharz Research Institute,
Department of Malacology.

THANKS

GOD

TO
MY HUSBAND
AND
MY SONS

ACKNOWLEDGMENTS

The authoress wishes to express her deep gratitude to Prof. Dr. Abdalla M. Ibrahim, Professor and Head of Zoology Department, Faculty of Science, Ain Shams University, for supervising the work, his valuable suggestions, continuous encouragement and for reading the final manuscript.

The authoress is greatly indebted to Prof. Dr. Fouad Yousif, Professor of Medical Malacology, Theodor Bilharz Research Institute, Imbaba, Egypt for his direct supervision, continuous guidance and his valuable help in kindly providing the snails and schistosome material and the preparation of the manuscript.

Deep thanks are due to Dr. Nawal Haroun, Assistant professor, Department of Medical Malacology, Theodor Bilharz Research Institute, Imbaba, Egypt, for her contribution in supervision and kind help during the performance of this study.

My thanks are also extended to Prof. Dr. Mohamed Ali Saber, Professor of Biochemistry, Theodor Bilharz Research Institute for his kind help in the electrophoresis study.

CONTENTS

	Page
Acknowledgments.....	A
Introduction.....	1
Review of Literature.....	4
Material and Methods.....	19
1- Gross anatomy of snails.....	20
2- Electrophoresis.....	22
3- Natural habitats of <u>Biomphalaria glabrata</u> ..	27
4- Maintenance of snails in the laboratory.....	28
5- Life table of snails.....	30
6- Exposure of snails to miracidia.....	33
7- Cercarial production.....	34
Results.....	35
Chapter 1- Morphological observations on <u>Biomphalaria alexandrina</u> and <u>Biomphalaria</u> <u>glabrata</u> from Egypt.....	35
1-1- Shell morphology.....	35
1-2- The radula.....	49
1-3- The renal ridge.....	53
1-4- Electrophoresis.....	55
Chapter 2- Occurance of <u>B. glabrata</u> in Egypt...	59

	Page
Chapter 3- Reproductive biology of snails.....	62
3-1- Growth.....	62
3-2- Survivorship and life span.....	75
3-3- Maturity and egg production.....	84
Chapter 4- Compatibility of snails to an Egyptian strain of <i>S. mansoni</i>	96
4-1- Survival rate at first cercarial shedding.....	97
4-2- Infection rate.....	98
4-3- Length of incubation period.....	98
4-4- Duration of cercarial shedding.....	99
4-5- Periodic cercarial production.....	106
4-6- Pattern of the shedding and cercarial production of snail.....	108
Discussion.....	123
Summary.....	134
References.....	146
Arabic Summary.....	

List of tables

Table No.		Page
1	Dimensions and number of whorls of <u>B. alexandrina</u> shells.....	38
2	Dimensions and number of whorls of <u>B. glabrata</u> shells.....	46
3	Comparison between the radula of <u>B. alexandrina</u> and <u>B. glabrata</u>	51
4	Main physical and chemical characters of canal water of <u>B. glabrata</u>	61
5	Growth of <u>B. alexandrina</u> reared in the laboratory.....	64
6	Growth of <u>B. glabrata</u> reared in the laboratory.....	67
7	Comparison between growth and life span of <u>B. alexandrina</u> and <u>B. glabrata</u> under laboratory conditions.....	74
8	Life table of <u>B. alexandrina</u> and <u>B.</u> <u>glabrata</u> snails reared in laboratory...	78

Table No.		Page
9	Life span of <u>B. alexandrina</u> and <u>B. glabrata</u> reared under laboratory conditions.....	82
10	Age and shell diameter at maturity of <u>B. alexandrina</u> and <u>B. glabrata</u> under laboratory conditions.....	87
11	Egg production of <u>B. alexandrina</u> snails reared under laboratory condition.....	88
12	Egg production of <u>B. glabrata</u> snails reared under laboratory conditions.....	89
13	Population parameter of <u>B. alexandrina</u> and <u>B. glabrata</u>	95
14	Infection of <u>B. alexandrina</u> with <u>S. mansoni</u> under laboratory conditions....	100
15	Infection of <u>B. glabrata</u> with <u>S. mansoni</u> under laboratory condition.....	101
16	Periodic cercarial cercarial production of various sizes of <u>B. alexandrina</u> and <u>B. glabrata</u>	107

Table No.		Page
17	Pattern of periodic cercarial production of various size groups of <u>B. alexandrina</u> infected with <u>S. mansoni</u> .	111
18	Pattern of periodic cercarial production of various size groups of <u>B. glabrata</u> infected with <u>S. mansoni</u>	113

List of figures

No. of figures		Page
1	Dimensions of <u>B. shell</u>	20
2	Photo of <u>B. alexandrina</u> and <u>B. glabrata</u> shells.....	36
3	Relation between shell height and shell diameter of <u>B. alexandrina</u> and <u>B. glabrata</u>	40
4	Relation between ratio of height and diameter (H/D) and shell (D) of <u>B. alexandrina</u> and <u>B. glabrata</u>	42
5	Relation between aperture length (L) and shell diameter (D) of <u>B. alexandrina</u> and <u>B. glabrata</u> ...	43
6	Relation between ratio of aperture width to aperture length (W/L) and shell diameter (D) of <u>B. alexandrina</u> and <u>B. glabrata</u>	44

No. of figures		Page
7	Relation between number of whorls and shell diameter of <u>B. alexandrina</u> and <u>B. glabrata</u>	45
8	Outline of the radula and drawings of separate teeth of <u>B. alexandrina</u> .	52
9	Outline of the radula and drawings of separate tuth of <u>B. glabrata</u> .	52
10	The renal ridge of a <u>B. glabrata</u> snail 12 mm in diameter from Mansoriya canal, Giza Governorate.....	54
11	Pattern of protein in the digestive gland of <u>B. alexandrina</u> and <u>B. glabrata</u>	57
12	Pattern of protein in the haemo lymph of <u>B. alexandrina</u> and <u>B. glabrata</u>	57

No. of figures		Page
13	Pattern of acid phosphatase in the digestive gland of <u>B. alexandrina</u> and <u>B. glabrata</u>	58
14	Pattern of acid phosphatase in the haemolymph of <u>B. alexandrina</u> and <u>B. glabrata</u>	58
15	Growth curves of <u>B. alexandrina</u> and <u>B. glabrata</u> reared in the laboratory under $26^{\circ}\text{C} \pm 1^{\circ}\text{C}$	71
16	Survivorship of <u>B. alexandrina</u> and <u>B. glabrata</u> reared under laboratory conditions ($26^{\circ}\text{C} \pm 1^{\circ}\text{C}$).....	83
17	Comparison between the total number of egg masses of <u>B. alexandrina</u> and <u>B. glabrata</u> under $26^{\circ}\text{C} \pm 1^{\circ}\text{C}$	92
18	Comparison between the total number of eggs of <u>B. alexandrina</u> and <u>B. glabrata</u>	93

No. of figures		Page
19	Egg production of <u>B. alexandrina</u> and <u>B. glabrata</u> under laboratory condition $26^{\circ}\text{C} \pm 1^{\circ}\text{C}$	94
20	Survival rate at first cercarial shedding of various sizes of <u>B. alexandrina</u> and <u>B. glabrata</u> exposed to an Egyptian strain of <u>S.</u> <u>mansoni</u>	102
21	Infection rates of various sizes of <u>B. alexandrina</u> and <u>B. glabrata</u> exposed to an Egyptian strain of <u>S.</u> <u>mansoni</u>	103
22	Incubation period of various sizes of <u>B. alexandrina</u> and <u>B. glabrata</u> exposed to an Egyptian strain of <u>S.</u> <u>mansoni</u>	104
23	Duration of cercarial shedding of various sizes of <u>B. alexandrina</u> and <u>B. glabrata</u> exposed to an Egyptian strain of <u>S. mansoni</u>	105
