THE USE OF GAMMA RADIATION IN PREPARING RUBBER MATERIALS FOR PURIFICATION OF WASTE WATER

By

MEDHAT MOHAMED HASSAN ABDEL- HAMID
(B.Sc - Chemistry)

A THESIS

**Submitted in Partial Fulfillment of
The Requirements for the Degree of
Master of Science
in
Environment Sciences
(Dept, of Biological and Physical Science)**

Under Supervision

Prof.Dr. M. S. Abdel Mottaleb,

**Prof. Of Inorganic Chemistry, Faculty of Science, Ain Shams
Universsity**

Prof.Dr. E. M. Dessouki,

**Prof. of Radiation Chemistry, Head of Industrial Irradiation
Division, (NCRRT).**

Prof.Dr. E. M. Abdel-Bary,

**Prof. Of Polymer Chemistry, Faculty of Science, Mansoura
University,.**

APPROVAL SHEET

**THE USE OF GAMMA RADIATION IN
PREPARING RUBBER MATERIALS FOR
PURIFICATION OF WASTE WATER**

BY

MEDHAT MOHAMED HASSAN ABDEL-HAMID

(B. Sc - Chemistry)

Ain Shams University (1982)

**This thesis for M. Sc of science degree has been
approved**

by

Prof. Dr. M. S. Abdel Mottaleb

Prof. of Inorganic chemistry, faculty of science, Ain
Sahms University

Prof. Dr. A. M. Dessouki

Prof. of Radiation chemistry , Atomic Energy Authority

Prof. Dr. A. M. Zahra

Prof. of Physical chemistry. Faculty of Education - Ain
Shams University

Prof. Dr. E.A. Hegazy

Prof of Radiation chemistry , Atomic Energy Authority

The Use of Gamma Radiation in Preparing Rubber Materials for Purification of Waste water

Thesis
Submitted to
Environmental Studies and Research Institute
Ain Shams University

For
M.Sc. Degree of Environmental Science
(Chemistry)
Department of Biological and Physical Science

By
Medhat Mohamed Hassan Abdel-Hamid
(B.Sc. - Chemistry)
Ain Shams University
National Center for Radiation Research and Technology
Atomic Energy Authority

Cairo - Egypt
1996

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

The Use of Gamma Radiation in Preparing Rubber Materials for Purification of Waste water

Thesis Advisors:

Prof. Dr. M.S. Abdel Mottaleb

Prof. Dr. A.M. Dessouki

Prof. Dr. E.M. Abdel Bary

Approved

My Parents, My Wife,
My Brothers and
My Children

Acknowledgement

The author would like to thank **Professor Dr.M.S. Abdel Mottaleb**, Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University for supervision, encouragement, support and interest in the work. The author is greatly indebted to Professor **Dr. A.M. Dessouki**, Head of Industrial Irradiation Division, National Center for Radiation research and Technology (NCRRT), to **Professor Dr. E.M. Abdel-Bary**, Professor of Polymer Chemistry, Faculty of Science, Mansoura University, and to Dr. E.M. El-Nesr (NCRRT) for suggesting the topic of research, supervision, continuous guidance and valuable discussions throughout this work.

My best thanks to Professor **Dr. A.Z. El-Bahey**, Chairman of NCRRT and to Professor **Dr. E.A. Hegazy**, Head of the Departement of Radiation Chemistry of Polymers for encouragement and care.

My best thanks to the Chemistry Departement, Faculty of Science, Mansoura University for their helps in atomic absorption measurements.

My sincere thanks to Professor **Dr. A.Yassin**, Dean of Institute of Environmental studies and Research, Ain Shams University and Professor **Dr. Abdalla Ibrahim**, Head of Department of Biological and Physical Science for their valuable help and interest. Also, my best thanks extend to all my colleagues in the department and the NCRRT.

AIM OF THE WORK	
CHAPTER I	
I - INTRODUCTION.....	1
I-1 Types of rubber Wastes.....	2
1-1-1 Wastes from tyre manufacture :(Rubber Compounds).	2
1-1-2 Wastes from the tyre-rebuilding industry.....	2
1-1-3 Wastes from reclaim production.....	2
1-1-4 Wastes from the rubber -mechanical goods industry and rubber foot wear production	2
I-2 Reuse of rubber waste.....	3
1-2-1 Reclamation of vulcanized rubber Wastes.....	3
1-2-2 Processes of grinding rubber wastes.....	4
1-2-3 Cryogenic grinding of cured rubbers.....	4
I-3 Application of rubber Waste.....	5
1-3-1 Uses in asphalt, paving, roofing and road surfaces.....	5
1-3-2 Uses in building materials	6
1-3-3 The use of rubber scraps in manufacture of different rubber composites.....	6
1-3-4 Uses in coatings and lamination.....	7
1-3-5 Miscellaneous applications of rubber waste.....	7
I-4 Modification of rubber Waste.....	8
I-5 Interaction of gamma rays with matter.....	8
I-6 Effect of gamma -rays on polymeric materials.....	9
1-6-1 Effect of gamma-rays on rubber.....	9
1-6-2 Effect of gamma radiation on waste rubber.....	10
I-7 The different methods of radiation grafting.....	12
I-8 Grafting of rubber.....	13
I-9 Water and environmental pollutions.....	14
I-10 General methods of water purification.....	16
I-11 Ion exchangers used for water purification.....	17
CHAPTER II	
II - LITERATURE REVIEW.....	19
II-1 Waste rubber disposal.....	19
II-2 blending of reclaimed rubber with other materials.....	21
II-3 Utilization of reclaimed waste rubber:	22

	II-3-1	In asphalt	2
	II-3-2	In Paints.....	2
	II-3-3	In building.....	2
II-4		Bio-chemical processing of waste tyre rubber.....	2
II-5		Radiation graft modification of rubber.....	2
II-6		Possibility of using grafted waste rubber.....	3
II-7		Ion exchangers used for treatment of wastewater.....	3
II-8		Removal of hazardous metals from waste water.....	3

CHAPTER III

III - EXPERIMENTAL.....		31
III-1	Materials and Techniques.....	31
III-1-1	Materials.....	31
III-1-2	Techniques.....	31
III-1-2-1	Gamma radiation source.....	31
III-1-2-2	Graft copolymerization.....	31
III-1-2-3	Preparation of the sodium salt of grafted polyacrylic acid	39
III-1-2-4	Preparation of amidoxime rubber powder.....	40
III-1-2-5	Reaction between waste rubber grafted with PAAm and hydroxyl amine.....	40
III-1-2-6	Methods used for adsorption studies.....	40
III-1-2-6-1	Equilibrium Studies (Batch Experiments)	40
III-1-2-6-2	Columnar chelating of copper from copper sulphate solution.....	41
III-1-2-7	Ultra violet spectroscopy.....	41
III-1-2-8	Atomic absorption measurments.....	41
III-1-2-9	Scanning electron microscopy.....	42

CHAPTER IV

CHAPTER IV		
IV - RESULTS AND DISCUSSION.....		44
IV-1	Graft copolymerization of waste rubber.....	44
IV-1-1	Effect of inhibitor concentration.....	44
IV-1-2	Effect of monomer concentration.....	49
IV-1-3	Effect of radiation dose.....	49
IV-1-4	Effect of solvent composition for grafting of AN.....	52
IV-1-5	Recovery of copper ions	54
IV-1-6	Some parameters affecting the metal ions recovery.....	58

(ii)

	Page
IV-1-7 Effect of temperature.....	58
IV-1-8 Recovery of lead ions.....	60
IV-1-9 Recovery of cobalt ions.....	60
IV-1-10 Recovery of nickel ions.....	70
IV-1-11 Recovery of phenol.....	75
IV-1-12 Effect of the type of Monomer Grafted onto RP.....	81
IV-1-13 Scanning electron microscopy.....	84
IV-1-14 Practical application.....	84
SUMMARY AND CONCLUSIONS.....	88
REFERENCES.....	91
ARABIC SUMMARY	

List of Figures:

	<u>Page</u>
Fig.(1) Effect of Mohr's salt concentration on the graft yield of AAm at radiation dose 20 kGy.	45
Fig.(2) Effect of FeCl_3 concentration on the graft yield of AAc at radiation dose 20 kGy.	47
Fig.(3) Effect of FeCl_3 concentration on the graft yield of AN at 20 kGy.	48
Fig(4) Effect of monomer concentration on the graft yield of investigated monomers, (□) AAm; (■) AAc; (Δ) AN.	50
Fig(5) Effect of irradiation dose on the graft yield of investigated monomers; (□) AAm, 25 wt.%; (■) AAc; 50 wt.%; (Δ) AN, 50 wt%.	51
Fig(6) Effect of solvent composition on the graft yield of AN (50 wt.%) at 20 kGy.	53
Fig.(7) Standard calibration curve for copper ions	55
Fig.(8) Copper ions uptake of grafted waste rubber, (□) RP; (■) RP-g-PAAc; (Δ) RP-g-PAANa; (•) RP-PAAm.	56

Fig.(9)	Copper ions uptake of grafted waste rubber, (□) RP; (■) RP-g-PAN; (Δ) RP-g-PAO.	57
Fig(10)	Copper ions uptake of waste rubber powder grafted with AAm at different tempratures: (□) 30°C; (■) 40°C(Δ) 50°C; (▲) 60°C.	59
Fig.(11)	Copper ions uptake of waste rubber grafted with AN at different temperaures: (□)30°C; (■) 40°C(Δ) 50°C; (♦) 60°C.	61
Fig.(12)	Copper ion uptake of rubber grafted with AO at different temperatures: (□) 30°C; (■) 40°C(Δ) 50°C; (▲) 60°C.	62
Fig.(13)	Lead ions uptake of grafted rubber powder; (□) RP; (■) RP-g-PAAm; (Δ) RP-g- PAAc ; (▲) RP-g-PAANa; (◇) RP-g- PAN; (◆) RP-g-PAO.	63
Fig.(14)	Standard calibration curve for cobalt ions	64
Fig.(15)	Cobalt ions uptake of grafted waste rubber powder (□) RP; (■) RP-g-PAAm; (Δ) RP-g-PAAc ; (▲) RP-g-PAN.	65
Fig.(16)	Cobalt ions uptake for grafted waste rubber powder; (□) RP; (■) RP-g-PAAc; (Δ) RP-g-PAANa .	69
