ACKNOWLEDGEMENT

First of all, thanks to ALLAH, the most beneficent and merciful.

Second, I wish to express my sincere gratitude to **Prof. Dr. Tawhida Yaseen Abd El-Ghaffar**, Assistant Professor of Pediatrics, Faculty of Medicine, Ain Shams University, who I had the privilege of doing this thesis under her supervision. My sincere thanks for her continuous guidance, and support, beneficial advice and valuable criticism during the whole research period.

I would like to offer sincere thanks to **Prof. Dr. Ekram Maher Fateen**, Ass. Prof. of Biochemical Genetics, National Research Center, for her enthusiastic help, supervision, continuous guidance and support during the whole of research period.

My sincere thanks and appreciation are due to **Prof. Dr. Eman Ahmed Zaky**, Ass. Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for her generous help, continuous encouragement and endless support in revision of the text, statistical part and support until the end of this thesis.

My deepest gratitude to the patients for their great assistance and co-operation.

Also, my deepest gratitude to my family and my wife for their great assistance and moral support until this work was finished.

Usama Galal Rakha

1998

CONTENTS

Subjects	Page
Introduction	1-3
Aim of the work	4
Review of literature	5-96
Chapter I: * Classification of inborn errors of metabolism	5-10
* Identification of child at risk	11-15
Chapter II: * Tyrosine metabolism	16-21
* Disorders of tyrosine metabolism	22-34
Chapter III: * Screening for tyrosinemia	35-46
Chapter IV: * Pathophysiology of HTI	47-57
Chapter V: * Clinical findings of HTI	58-75
Chapter VI: * Diagnosis and management of HTI	76-96
Subjects and Methods	97-102
Results	103-110
Discussion	111-125
Summary	126-128
Conclusion	129-130
Recommendation	131-132
References	133-155
Arabic summary	

ABBREVIATIONS

δ-ALA	Delta aminolevulinic acid.
δ-ALAD	Delta aminolevulinic acid dehydratase.
ALK.PH	Alkaline phosphatase.
ALT	Alanine transaminase.
AST	Aspartate transaminase.
ATP	Adenosine triphosphate.
CLD	Chronic liver disease.
DOPA	Dihydroxyphenylealanine.
FAA	Fumaryleacetoacetate acid.
FAH	Fumarylacetoacetate hydrolase.
HBV	Hepatitis B virus.
HCV	Hepatitis C virus.
HTI	Hereditary tyrosinemia type I.
IBM	Inborn error of metabolism
IGF-1	Insulin like growth factor-1.
MAA	Maleylacetoacetic acid.
NTBC	2-(Nitro-4-trifluoromethylbenzoyl)1,3-cyclohex- ane dione.
PHPPD	4-hydroxyphenylpyruvic acid dioxygenase.
SA	Succinyleacetone.
SAA	Succinylacetoacetate.
TAT	Tyrosine aminotranseferase.

LIST OF TABLES

Table	Title	Page
Table(1)	Variable presentations of some inborn errors of metabolism.	13
Table(2)	Normal levels of tyrosine in human biologic fluids.	19
Table(3)	Clinical criteria of the various types of albinism.	31
Table(4)	Description of our studied groups as regards sex distribution, consanguinity, family history of dead sibs, still births, other inborn errors of metabolism and of similar conditions	103
Table(5)	Aetiological diagnosis of our studied patients with CLD (group I)	104
Table(6)	Presenting complaints recorded among our patients with CLD (Group I)	105
Table(7)	Results of liver function tests of our studied patients with CLD (Group I)	106
Table(8)	Results of nitrosonaphthol test and porphobilinogen synthase screening test of our studied groups.	107
Table(9)	Results of urinary aminogram pattern of our nitrosonaphthol positive cases.	108
Table(10)	Clinical criteria of positive screened cases for HTI in our studied groups.	109
Table(11)	Laboratory findings of positive screened cases for HTI in our studied groups	110

LIST OF FIGURES

Figure	Title	Page
Figure (1)	Major pathway of tyrosine metabolism.	16
Figure (2)	Other pathways involving tyrosine metabolism.	27
Figure (3)	Interrelationship between hepatorenal tyrosinemia (HTI) and heme metabolism.	57

Introduction and Aim of the Work
