

**Comparison of various imaging modalities in
patients with avascular necrosis of femoral head**

Essay

**Submitted for partial Fulfilment of the
master degree of radiodiagnosis**

By

Dr. Amany abd el - Fattah El-Sayed

والذين أتوا العلم منكم درجات .

صدق الله العظيم

Acknowledgment

It is a pleasant obligation to express my deepest thanks to Dr. Ahmed Talaat , professor of radiodiagnosis , Ain Shams University for his sincere guidance , valuable instructions , meticulous supervision and continuous encouragement throughout this work.

Much credit also goes to my colleagues who so willingly help me to achieve this work

Amany Abd El Fattah

Dedication

To soul of my father

&

To my Family

Contents

Introduction	
Aim of the work	
Review	
Anatomical structure of the hip joint	1
Pathology	15
Conventional plain X-ray of the hip Joint	35
C. T. examination of the hip Joint	49
MR Imaging of the hip Joint	60
Scintigraphy of avascular necrosis of femoral head	76
Discussion	92
Summary and conclusien	102
References	104
Arabic Summary	

Table of figures

Fig.	Page
1- Anatomy of head of femur	2
2- Sagittal section in hip joint	5
3- Comparison between normal and osteonecrotic femoral head	16
4- Coronal section of femoral head with osteonecrosis	16
5- Fatty marrow in normal and osteonecrotic femoral head	24
6- Core biopsy of osteonecrotic femoral head	24
7- Thromboembolism as etiological factor of osteonecrosis	26
8- Microscopic section of thrombus as etiological factor	26
9- Antero posterior view of normal hip joint.....	36
10- Stage II of osteonecrosis by X-ray.	38
11- The radiolucent crescent line (early diagnostic sign)	40
12- Stage IV of osteonecrosis by X- ray.	42
13- Stage IV of osteonecrosis "classic crescent sign"	45
14- Classic saddle shape (pathognomonic in X- ray)	47
15- Bite sign (radiographic finding) late sign	47
16- Different modalities to diagnose early osteonecrosis	50
17- Subchondral fracture and collapse in hip joint (different modalities). ..	52
18- Different modalities to diagnose early osteonecrosis	55
19- Different modalities to diagnose advanced osteonecrosis	57
20- Different modalities to diagnose advanced osteonecrosis	58

21- Coronal T1 weighted MRI stage (0) osteonecrosis	61
22- MRI findings in early osteonecrosis	63
23- Sagittal T1 weighted MRI , classic location of osteonecrosis	67
24- MRI findings in early osteonecrosis in Lt. hip	71
25- MRI findings in advanced osteonecrosis in Rt. hip	72
26- Stage I (photopenic region in femoral head)	82
27- Stage II (by X-ray and scintigraphy)	85
28- Stage III (by x-ray and scintigraphy)	85
29- Stage IV (by X- ray and scintigraphy)	88
30- Stage IV (by X- ray and scintigraphy)	88
31- Stage V (by X - ray and scintigraphy)	90
