ACKNOWLEDGEMENT

The author gratefully acknowledges his indebtedness to Prof. El-Sadek Amin Kandil for his invaluable guidance and encouragement throughout the course of this research work.

The author wishes to express his deep and sincere gratitude to his supervisors Dr. Talat El-Tablawy for his enlightened supervision ,kind assistance ,encouragement and constructive suggestion throughout the course of this research work.

Thanks is due to Dr.Adel A.E.M.S.Ahmed for his valuable assistance discussions and many help.

The author is grateful to the head and all members of Electrical Power & Machines Department in the Faculty of Engineering ,Ain-Shams University .

My thanks and gratitude for Dr.A.Attalha for his help during the early part of in the work.

Finally ,tanks for my colleagues again ,New And Renewable Energy Authority "NREA" ;my parents and my family for help and cooperation.
