ACKNOWLEDGMENT

The all thanks for **Allah**, the lord of all being.

The author wishes indebted with his utmost thanks to Professor Dr. ***A.A.El-Shazly*** and Professor Dr. ***B.A. Khalifa*** for continuous supervision, valuable suggestions and relevant recommendations in performing this work and interpreting the results.

Deepest gratitude to Dr. ***H.S.Metwally*** for his supervision.

The author wishes to thank Professor Dr. ***M.M.El-Nahass***, Professor Dr.***A.El-Falaky*** and Dr. ***D.Abd El-Hady*** for their valuable help and fruitful advice throughout this work.

The author wishes to express his sincere gratitude to Professor Dr. ***M.F.El-Sharkawy***, Head of Physics Department Faculty of **Science** Ain Shams University, for his rendering facilities.

Finally the assistance of the ***members*** of the ***Thin film laboratory*** is highly appreciated.

Abstract 11

Summary 12

Introduction 17

Chapter(I):

Literature Review And Theoretical Background 20

I.a) Literature Review 20

I.b) Theoretical Background 31

Chapter II : Experimental Techniques 52

II.1) Material Preparation 52

II.2) Preparation of In_2S_3 Thin Films 55

II.2.i) Cleaning of the Substrates 55

II.2.ii)Thermal deposition of In_2S_3 Thin Films 56

II.2.iii) Methods for Film Thickness Measurements 56

II.3) The energy despersive x-ray spectrometry (EDS) Technique 62

II.4) Structural Characterization Techniques 63

Central Library - Ain Shams University

II.5) Determination of the Optical Constants of Absorbing In_2S_3 Films Deposited on Nonabsorbing Substrates 73

II.6) Transport Properties of In_2S_3 Thin Films Measurements 83

Chapter (III)

Results and Discussion **88**

III.1) Structural Properties of In_2S_3 **88**

III.1.1) Energy Dispersive X-ray Spectrum (EDS) Analysis of In_2S_3 Thin Films. **88**
III.1.2) X-ray Diffraction Analysis of In_2S_3 **90**
 a) X-ray Analysis of In_2S_3 in Powder Form **90**
 b) Effect of Annealing Temperature on the Structure Characterization of In_2S_3 Thin Films **93**
 c) Effect of Annealing Temperature on the Crystallite Size of In_2S_3 Thin Films **96**
 d) Effect of Film Thickness on the Strucutre Characterization of In_2S_3 Thin Films **101**
 e) Effect of Film Thickness on the Crystallite Size of In_2S_3 Thin Films **101**
III.1.3) Electron Micrographs and Electron Diffraction Patterns for In_2S_3 Thin Films **108**
 a) Effect of Annealing Temperature on In_2S_3 Thin Films **108**
 b) Effect of Film Thickness on In_2S_3 Thin Films **110**
III.1.4) Differential Thermal Analysis of In_2S_3 in Powder Form **110**

Central Library - Ain Shams University

III.2) Optical Properties of In_2S_3 Thin Films **115**

III.2.1) The Spectral Distributions of the Transmittance T(λ) and Reflectance R(λ) of In_2S_3 Thin Films **116**

III.2.2) The Dispersion of Refractive Index n(λ) and Absorption Index k(λ) of In_2S_3 Thin Films **120**

III.2.3) Determination of the High Frequency Dielectric Constant ε_∞ (Permitivity) **120**

III.2.4) Determination of the Lattice Dielectric Constant ε_L of In_2S_3 Thin Films **125**

III.2.5) The Energy Gap of In_2S_3 Thin Films **127**

III.3) Tranport Properties of In_2S_3 Thin Films **129**

III.3.1) The Electrical Resistivity of In_2S_3. **129**

a) Thickness Dependence **129**

b) Annealing Effect. **131**

c) Temperarture Dependence **133**

III.3.2) Thermoelectric Power of In_2S_3 Thin Films **138**

III.4) Space Sharge Limited Currents in In_2S_3 Thin Films **144**

III.5) General Discussion And Conclusion **148**

References **158**

List of plates

		Page
Plate(1)	Schematic representation for the oscillatory furnace .	53
Plate(2)	Edward 306 A unit used for preparation In_2S_3 thin films.	57
Plate(3)	Thickness monitor (model FTM4, Edwards Co., England) used for the film thickness and the rate of deposition measurements of In_2S_3 thin films.	58
Plate(4)	(a)Schematic diagram of the interferometer used for thickness measurement. (b) The optical set-up for producing multiple beam Fizeau fringes at reflection. (c) Fizeau fringes.	61
Plate(5)	The x-ray diffractometer (Type PW 10100, Philips) used for the diffraction patterns measurement.	64
Plate(6)	Principle components diagram of DTA apparatus.	70
Plate(7)	Optical system of spectral reflectometry attachment (with incidence angle of 5°)	75
Plate(8)	Flow chart diagram of program used for n and k calculation.	79
Plate(9)	Flow chart diagram of steep length optimization technique	81
Plate(10)	Cryostat used for the resistivity measurement.	84
