

ROLE OF TRANSCRANIAL DOPPLER ULTRASOUND IN ASSESSMENT OF CEREBRAL VASCULARITY

**Essay
Submitted for Partial Fulfillment
of the Master Degree in Radiodiagnosis**

سُبْحَانَكَ اللَّهُمَّ

قالوا سبحانك لا علم لنا إلا
ما علمتنا إنك أنت العليم
الحكيم

سورة البقرة - الآية ٣٢

Acknowledgment

First, thanks are all to *God* for blessing me this work until it reached its end, as a little part of his generous help throughout life.

I would like to express my sincere appreciation and deep gratitude to *Prof. Dr. Ahmed Kamal El-Dorry*, Professor of Radiodiagnosis, Faculty of Medicine, Ain Shams University, for his kind moral support and continuous encouragement; really, it is a great honor to work under his guidance and supervision.

Wael Ahmed Maher

List of Contents

	PAGE
Introduction and Aim of the Work	1
Chapter (1) : Anatomy of Cerebral Vessels	2 - 21
Chapter (2) : Pathology	22 - 52
Chapter (3) : Blood Flow Velocity Changes Under Physiological Variations	53 - 57
Chapter (4) : Techniques and Examinations	58 - 77
Chapter (5) : Transcranial Doppler Findings	78 - 93
Chapter (6) : Illustrative Cases	94 - 106
Summary	107 - 108
References	109 - 118
Arabic Summary	1

List of Figures

No.	Figure	Page
Figure (1) :	The arteries at the base of the skull.	3
Figure (2) :	Circle of Willis.	4
Figure (3) :	Segments of the internal carotid artery.	6
Figure (4) :	Branches of anterior cerebral artery and posterior cerebral artery.	9
Figure (5) :	Course and branches of middle cerebral artery.	11
Figure (6) :	The internal carotid and basilar arteries.	13
Figure (7) :	Basilar artery origin, course and branches.	15
Figure (8) :	Dural venous sinuses and their connection with superficial and deep veins.	18
Figure (9) :	Dural venous sinuses in sagittal plane.	20
Figure (10) :	Hemorrhagic cerebral infarction (Gross appearance).	25
Figure (11) :	Brain stem infarction (Gross appearance).	26
Figure (12) :	Giant posterior cerebral aneurysm (Gross appearance).	28
Figure (13) :	Intracerebral aneurysm (Msc appearance).	29
Figure (14) :	Anterior communicating aneurysm (Gross appearance).	31
Figure (15) :	Massive cerebral hemorrhage (Gross appearance).	34
Figure (16) :	Aneurysms near branching points (Gross appearance).	35
Figure (17) :	Ruptured aneurysm (Gross appearance).	36

No.	Figure	Page
Figure (18) :	Arteriovenous malformation (Gross appearance).	40
Figure (19) :	Meningioma (Gross appearance).	41
Figure (20) :	Acoustic schwannoma (Msc appearance).	42
Figure (21) :	Astrocytoma (Gross appearance).	44
Figure (22) :	Astrocytoma (Msc appearance).	45
Figure (23) :	Medulloblastoma (Gross appearance).	47
Figure (24) :	Medulloblastoma (Msc appearance).	49
Figure (25) :	Ependymoma (Gross appearance).	50
Figure (26) :	Ependymoma (Msc appearance).	51
Figure (27) :	Relationship of the ultrasound probes at the available acoustic windows.	61
Figure (28) :	Transorbital approach	62
Figure (29) :	A,B. Insonation of the ophthalmic artery and carotid siphon via the transorbital approach.	63
Figure (30) :	Transtemporal approach.	65
Figure (31) :	Available temporal acoustic windows and placement of the probe.	66
Figure (32) :	A,B. Transcranial Doppler sonography of the vertebral system via the suboccipital approach and representative insonation depths.	67
Figure (33) :	A,B. Suboccipital approach.	68
Figure (34) :	A,B. Transcranial Doppler sonography of the internal carotid artery via the submandibular approach and representative insonation depths.	71

No.	Figure	Page
Figure (35) :	A,B. Temporal placement of the probe and its relationship to the middle cerebral artery.	72
Figure (36) :	Transcranial color-coded Duplex scanning.	80
Figure (37) :	A,B. Transcranial color-coded Doppler imaging of cerebral hemorrhage and CT image of the lesion.	82
Figure (38) :	A,B. Imaging of intracerebral arteriovenous malformations by contrast enhanced Duplex.	86
Figure (39) :	Imaging of intracranial neoplasm by contrast enhancing Duplex.	90

List of Tables

No.	Table	Page
Table (1) :	Normal values of mean blood velocity (cm/s) for cranial arteries.	73
