ACKNOWLEDGEMENT

First, I would like to express my deepest gratitude and thanks to ALLAH whose magnificent help was the main factor in accomplishing this work.

I would like to commence this acknowledgmet with a work from the heart expressed to Prof. Dr. Magdi Abd El Mageed Awadallah, Professor of Prosthodontics, Faculty of Dentistry, Alexandria University, to whom I owe a great deal in making this thesis possible. His impeccable ideas, unfailing encouragement, and above all his endowing knowledge guided me throughout this work.

I would like to express my feelings of gratitude and appreciation to Prof. Dr. Elsayed Nawar, Professor of Prosthodontics, Faculty of Dentistry, Alexandria University, for his kind guidance, and valuable scientific view. His constructive criticism was of essential help to me since the writing of protocol to the end of the work.

My sincere appreciation and deep thanks to Prof. Dr. Hany Anwar, Professor of Oral Surgery, Faculty of Dentistry, Alexandria University, for his extensive, dynamic help and valuable cooperation in

prosecuting this research. And whose effort in following up and reading were greatly profitable.

I am deeply thankful to Prof. Dr. Ahmed El-Mehallawi, Professor of Oral Surgery, Faculty of Dentistry, Alexandria University, who was sincerely devoted and did a great job especially in the surgical part of this work.

I wish to express my sincere appreciation to Prof. Dr. Sayed Abboudy, Professor of Physics, Faculty of Science, Alexandria University, for his close supervision, precious comments during construction of Bite forcemeter.

My special thanks to Dr. Amr Swelem, Lecturer of Physics, Faculty of Science, Alexandria University, for his generous effort and honest help in construction of the Bite forcemeter and for his close supervision throughout the technical work of biting force measurements.
