

***Human herpes virus-6 ; Its Relation To
Febrile Convulsions And Spectrum Of
Organ Affection In Pediatric Age Group***

Thesis

Submitted for partial fulfillment
Master Degree in Pediatrics

By

Katia Kamal Ishak

M. B., B.Ch.

Supervised By

Prof. Dr. / Mohamed Mohamed Farid

Professor of Pediatrics

Faculty of Medicine - Ain Shams University

Dr./ Hesham Abd El Samie Awad

Assistant Prof. of Pediatrics

Faculty of Medicine - Ain Shams University

Dr. / Azza Sadek El Danasouri

Lecturer of Clinical Pathology

Faculty of medicine - Ain Shams University

Acknowledgment

First , thanks are all to God for blessing this study until it has reached its end as a little part of his generous help throughout my life .

*I find no words by which I can express my extreme thank fullness, appreciation and profound gratitude to my **Prof. Dr. Mohamed Farid**, Professor of Pediatrics, Faculty of Medicine. Ain Shams University, for his generous help, guidance, kind encouragement and great fruitful advice during supervision of this work.*

*I am greatly honoured to express my sincere thanks to **Dr. Hesham Awad** , assistant prof. of Pediatrics . Faculty of Medicine . Ain Shams University , by whom I was very much impressed for his sincere guidance, noble character, generous attitude and great help. No words can be sufficient to express my gratitude and indebtedness .*

*I wish to express my sincere appreciation and gratitude to **Dr. Azza Sadek El-Danasouri** Lecturer of Clinical Pathology . Ain Shams University for her sincere encouragement and facilities offered through the study .*

To My Family

Contents

Subjects	Page
* Introduction and Aim of the Work	1-3
*Review of Literature	4 -50
Human herpes virus 6	64 -19
Roseola Infantum	20 -36
(Exanthem Subitum)	
Febrile Convulsions	37-50
*Subjects and Methods	51-58
*Results	59-75
* Discussion	76-86
* Recommendations	87
* Summary	88-89
* References	90 -111
* Arabic Summary	

List of Abbreviations

- AIDS : Acquired Immuno Deficiency Syndrome .
- C.B.C : Complete Blood Count .
- C.M.V : Cytomegalovirus .
- E.B.V : Epstein Barr virrus.
- E.S : Exanthem Subitum.
- E.S.R : Erythrocyte Sedimentation Rate .
- F.C : Febrile Convulsion.
- HBL -V : Human B lymphotropic virus .
- HIV- type I : Human immuno deficiency virus .
- HHV - 6 : Human herpes virus -6 .
- HSV : Herpes simplex virus .
- N.C.P.P : National Cooperative Perinatal Project.
- V.Z.V : Varicella Zoster virus.

List of Tables

Table 1 : Frequency of signs and symptoms in infants with virologically confirmed Exanthem Subitum.

Table 2 : Characteristics of fever in infants with Primary HHV-6 infection.

Table 3 : Time of onset and duration of skin rashes.

Table 4 : Characteristics of edematous eyelids .

Table 5 : Characteristics of papules on the mucosa of the soft palate and the base of uvula.

Table 6 : Time of onset and duration of bulging fontanelle.

Table 7 : Time of onset and duration of convulsive seizures

Table 8 : Antibody index of patients with positive HHV-6 seroconversion.

Table 9 : The age and clinical picture of patients with positive HHV-6 seroconversion.

Table 10: E.S.R. and C.B.C. results of patients with positive HHV-6 seroconversion.

Table 11 : Creatinine and alanine transferase results of patients with HHV-6 seroconversion.

Table 12 : Age and clinical picture of patients with negative HHV-6 seroconversion.

Table 13 : E.S.R. and C.B.C. results of patients with negative HHV-6 seroconversion.

Table 14 : Comparison between positive and negative cases to HHV-6 infection as regards E.S.R . and C.B.C. results .

Table 15 : Comparison between positive and negative cases to HHV-6 infection as regards age and clinical picture .

List of Figures

Figure 1 : Comparison between mean values of E.S.R. between negative and positive groups .

Figure 2 : Comparison between mean values of W.B.C. between negative and positive groups .

Figure 3 : Comparison between mean values of absolute lymphocytic count between negative and positive groups .

Figure 4 : Comparison between mean values of % lymphocytic count between negative and positive groups .

Figure 5 : Comparison between mean values of age between negative and positive groups .

Figure 6 : Comparative study between incidence of cough in negative and positive groups .

Figure 7 : Comparative study between incidence of coryza in negative and positive groups .

Figure 8 : Comparative study between incidence of throat congestion in negative and positive groups.

Figure 9 : Comparative study between incidence of lymph node swelling in negative and positive groups .
