ACKNOWLEDGMENT

I wish to express my deep thanks and sincere gratitude to **Professor Moustafa Kamel** Professor of Neuropsychiatry, Faculty of Medicine, Ain Shams University, for his valuable guidance, instructive supervision and continuous encouragement throughout the whole work.

I am sincerely indebted to **Professor Laila Faris** Professor of Nuclear Medicine for her continuous support, which without this work would have never been accomplished.

I am sincerely indebted to **Professor Mohamed Ghanem** Professor of Neuropsychiatry, Faculty of Medicine, Ain Shams University, for giving me his great support, valuable experience and supervision.

My deep thanks to **Dr. Safia Effat** Assistant Professor of Neuropsychiatry, Faculty of Medicine, Ain Shams University, for her kind help and great encouragement.

Last but by no mean least, I would like to thank all **my colleagues** in psychiatry department, for their cooperation without which this work would not have been possible.

Mona Reda

LIST OF TABLES

No		Page
I	Content of OCD in different countries.....	10
II	Structural imaging in OCD patients.....	33
III	Functional imaging: response to challenge.....	38
1	Comparison of Patient and control groups regarding family history.....	68
2	Descriptive data of patients group.....	69
3	Maxi-Mini. Range of cerebral blood perfusion of patients.....	73
4	Maxi-Mini. Range of cerebral blood perfusion of control.....	74
5	Maxi-Mini. Range of cerebellar blood perfusion of patients.....	75
6	Maxi-Mini. Range of cerebellar blood perfusion in control.....	76
7	Comparison between patients group and control group regarding right side cerebral perfusion....	77
8	Comparison between patients group and control group regarding left side cerebral perfusion.....	79
9	Comparison between patients group and control group regarding right side cerebellar perfusion.	81
10	Comparison between patients group and control group regarding left side cerebellar perfusion....	82
11	Comparison between right and left side of patients group regarding cerebral perfusion....	84
12	Correlation co-efficiency of age and blood perfusion in the regions of interest.....	86
13	Correlation co-efficiency between duration and blood perfusion in the regions of interest.....	87
14	Correlation co-efficiency between severity and blood perfusion in the regions of interest.....	88

15	Correlation co-efficiency between Y-BOCS subscale (obsessive) and blood perfusion in the regions of interest.....	89
16	Correlation co-efficiency between Y-BOCS subscale (compulsions) and blood perfusion in the regions of interest.....	90
17	Correlation co-efficiency between Right Parietal lobe and blood perfusion in the regions of interest.	91
18	Correlation co-efficiency between Left Parietal lobe and blood perfusion in the regions of interest.	92
19	Correlation co-efficiency between Right Inferior Frontal lobe and blood perfusion in the regions of interest	93
20	Correlation co-efficiency between Left Inferior Frontal lobe and blood perfusion in the regions of interest.	94
21	Correlation co-efficiency between Right Temporal lobe and blood perfusion in the regions of interest.	95
22	Correlation co-efficiency between Left Temporal lobe and blood perfusion in the regions of interest.	96
23	Correlation co-efficiency between Right Basal Ganglia and blood perfusion in the regions of interest.	97
24	Correlation co-efficiency between Left Basal Ganglia and blood perfusion in the regions of interest.	98
25	Comparing cerebral perfusion in moderate and severe patients assessed by Y-BOCS.....	100
26	Comparing cerebellar perfusion in moderate and severe patients assessed by Y-BOCS.....	101

27	Comparing obsessive and compulsive predominant Y-BOCS subscale in cerebral blood perfusion.	102
28	Comparing obsessive and compulsive predominant Y-BOCS subscale in cerebellar blood perfusion.	103
29	Comparing compulsive and mixed predominant Y-BOCS subscale in cerebellar blood perfusion.	104
30	Comparing compulsive and mixed predominant Y-BOCS subscale in cerebral blood perfusion...	105
31	Comparing obsessive and mixed predominant Y-BOCS subscale in cerebral blood perfusion...	106
32	Comparing obsessive and mixed predominant Y-BOCS subscale in cerebellar blood perfusion.	107

LIST OF FIGURES

No		Page
1	Mean Age in both patients and control group.....	65
2	Sex distribution in both patients and control group.....	66
3	Education, stress and F.H. in the studied cases...	67
4	Predominant complaint of the patients... ..	71
5	Severity of Y- BOCS in the studied patients.....	72
6	Right cerebral blood perfusion in both patients and control group.....	78
7	Left cerebral blood perfusion in both patients and control group.....	80
8	Comparison between right and left side in the patients group regarding cerebral perfusion.....	85
9	Correlation between left basal ganglia and right basal ganglia in studied patients	99

MZ	monozygotic
OC	obsessive compulsive
OCD	obsessive compulsive disorder
OCPD	obsessive compulsive personality disorder
PET	positron emission tomography
r-CBF	regional cerebral blood flow
Rt.B.G.	right basal ganglia
Rt.C.	right cerebellum
Rt.I.F	right inferior frontal
Rt.O.	right occipital
R.O.I.	region of interest
Rt.P.	right parietal
Rt.S.F.	right superior frontal
Rt.T.	right temporal
r.TMS	regional transcranial magnetic stimulation
SD	standard deviation
SPET	single photon emission tomography
SPECT	single photon emission computed tomography
STS	sulfotransferases
Tc-99	technetium 99
TRH	thyroid releasing hormone
TS	tourette syndrome
USA	united states of america
VBR	ventricular brain ratio
Xe	xenon
Y-BOCS.	Yale – brown obsessive compulsive scale.
