ACKNOWLEDGMENT

First and foremost, thanks to Allah "The Most Merciful".

I would like to express my utmost gratitude to Dr. Khaled Salah Awwad, Assistant Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for giving me the privilege of working under his meticulous supervision, and for his constant support, enthusiastic guidance and encouragement.

I owe my deep thanks and gratitude to Dr. Zeinab Awad El-Sayed, Assistant Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for her great support, patience and fruitful comments without which this work would have never been accomplished.

My sincere thanks and appreciation are also due to Dr. Nashwa Ahmed Adel El-Badawi, Assistant Professor of Clinical Pathology, Faculty of Medicine, Ain Shams University, for her great help in the laboratory part of this work

To the team of the Pediatric Allergy and Immunology Unit, to my colleagues, my patients and their parents, and to everyone who participated in one way or another in this work, I owe my thanks and appreciation.

ARABIC SUMMARY	

LIST OF ABBREVIATIONS

ANA	Antinuclear antibody
ASOT	Antistreptolysin O titre
CBC	Complete blood count
CCII	Chicken type II collagen
CRP	C-reactive protein
EBV	Ebstein-Barr virus
ESR	Erythrocyte sedimentation rate
Hb	Haemoglobin
HLA	Human leucocytic antigen haemoglobin
IBD	Inflammatory bowel disease
Ig	Immunoglobulin
INS	Idiopathic nephrotic syndrome
JRA	Juvenile rheumatoid arthritis
KD	Kawasaki disease
LIF	Leucocyte inhibitory factor
MIF	Migration inhibitory factor
MTX	Methotrexate
NSAIDs	Non-steroidal anti-inflammatory drugs
RA	Rheumatoid arthritis
RFA	Rheumatic fever arthritis
RF	Rheumatoid factor
ROC	Receiver operating characteristic curve
SA	Septic arthritis
SLE	Systemic lupus erythematosus
TNF α	Tumour necrosis factor alpha
WBCs	White blood cells

LIST OF TABLES

	Page
Table (1): Classification and causes of childhood arthritis:	5
Table (2): Clinical and laboratory data of patients with active juvenile rheumatoid arthritis.	40
Table (3): Clinical and laboratory data of patients with quiescent juvenile rheumatoid arthritis.	41
Table (4): Clinical and laboratory data of patients with active rheumatic arthritis.	42
Table (5): Clinical and laboratory data of patients with rheumatic arthritis in remission.	43
Table (6): Clinical and laboratory data of septic arthritis patients.	44
Table (7): Laboratory data of the control group.	45
Table (8): Laboratory data of JRA patients versus controls.	46
Table (9): Comparison of the laboratory data of patients with rheumatic arthritis (all cases, in activity, in quiescence) and controls.	48
Table (10): Laboratory data of patients with septic arthritis versus controls.	49
Table (11): Laboratory data of patients with juvenile rheumatoid arthritis versus patients with rheumatic fever arthritis.	50
Table (12): Comparison of the laboratory data of patients with JRA and rheumatic arthritis versus those with septic arthritis.	51
Table (13): Laboratory data of patients with active JRA versus those with quiescent JRA.	53
Table (14): Laboratory data of pauciarticular JRA versus polyarticular JRA.	53
Table (15): Rheumatoid factor positive versus rheumatoid factor negative JRA.	54

	Page
Table (16): Comparison of the laboratory data of JRA patients with positive CRP versus those with negative CRP.	55
Table (17): Effect of lines of therapy on different laboratory parameters of the study.	56
Table (18): Comparison of the laboratory data of patients with RFA in activity versus those in remission.	57
Table (19): Comparison of the laboratory data of RFA patients with cardiac lesion versus patients without cardiac lesion.	57
Table (20): Comparison of the laboratory data of RFA patients with positive CRP versus those with negative CRP.	58
Table (21): Correlation of fucose level with various laboratory data in patients with JRA, RFA and SA.	59
Table (23): Diagnostic reliability of fucose at different decision levels in JRA.	60
Table (24): Diagnostic reliability of fucose at different decision levels in RFA.	60
Table (25): Diagnostic reliability of fucose at different decision levels in SA.	60
