ARABIC SUMMARY	

List of Abbreviations

AAL :	Anterior axillary line
AP :	Anteroposterior
BMI :	Body mass index
CM :	Costal margin
CT :	Computerized tomography
ICS :	Intercostal space
MCL :	Midclavicular line
MHz :	Mega hertz
ML :	Midline
Mo :	Months
MRI :	Magnetic resonance imaging
P :	Probability
r :	Correlation coefficient
SD :	Standard deviation
S.D.S. :	Standard deviation score
US :	Ultrasound

List of Figures

	Page
Fig. 1: Variation in liver form in the anterior view	4
Fig. 2 : Variation in liver shape in the anterior hepatic scintiscan	5
Fig. 3 : Liver shape from front, above, behind, and position of the peritoneal reflection, the bare area and peritoneal ligaments	8
Fig. 4 : Segmental division of the liver : Right and left segmental fissures	9
Fig. 5 : Segmental division of the liver showing planes of division and eight segments of the liver	10
Fig. 6 : Sonographic liver size in centimeters versus height in inches in paediatric age group	32
Fig. 7 : US liver span measured in MCL	50

Fig. 8 :	Portal vein diameter measured at its entry into the liver at the porta hepatis	50
Fig. 9 :	Correlation between liver span and surface area	68
Fig. 10 :	Correlation between liver span and height	69
Fig. 11 :	Correlation between liver span and weight	70
Fig. 12 :	Correlation between portal vein diameter and height	71
Fig. 13 :	Correlation between portal vein diameter and weight	72
Fig. 14 :	Correlation between portal vein diameter and surface area	73

List of Tables

	Page
Table 1 : Approximate mean liver span of infants and children in MCL	24
Table 2 : Sonographic dimensions (mean \pm SD) of the liver in normal infants and children	34
Table 3 : Ranges and mean \pm SD of weight and height in all age groups	54
Table 4 : Mean \pm SD of SDS of weight and length / height in all age groups	55
Table 5 : Ranges and mean \pm SD of BMI and surface area in all age groups	56
Table 6 : Liver span (mean \pm SD, range) in different age groups	57
Table 7 : Portal vein diameter (mean \pm SD, range) in different age groups	58
Table 8 : Comparison between males and females	

	as regards liver span in different age groups	59
Table 9 :	Comparison between males and females as regards portal vein diameter in all age groups	60
Table 10 :	Correlation of liver span with body weight, height, BMI and surface area in all age groups of children under the study	61
Table 11 :	Correlation of portal vein diameter with body weight, height, BMI and surface area in all age groups of children under the stud.....	62
Table 12 :	Correlation of liver span and portal vein diameter with body weight, height, BMI and surface area in all children under study	63
Table 13 :	Mean \pm SD of weight, height, BMI and surface area of liver span and portal vein diameter in the 1 st 3 months	63
Table 14 :	Mean \pm SD of weight, height, BMI	

and surface area of liver span and portal vein diameter in the 3- 6 months age group.....	64
Table 15 : Mean \pm SD of weight, height, BMI and surface area of liver span and portal vein diameter in the 6- 9 months age group.....	64
Table 16 : Mean \pm SD of weight, height, BMI and surface area of liver span and portal vein diameter in the 9- 12 months age group	65
Table 17 : Mean \pm SD of weight, height, BMI and surface area of liver span and portal vein diameter in the 1- 2 years age group	65
Table 18 : Mean \pm SD of weight, height, BMI and surface area of liver span and portal vein diameter in the 2- 3 years age group	66
Table 19 : Mean \pm SD of weight, height, BMI and surface area of liver span and	

portal vein diameter in the 3- 4 years age group	66
Table 20 : Mean \pm SD of weight, height, BMI and surface area of liver span and portal vein diameter in the 4- 5 years age group	67
Table 21 : Difference in liver span as measured by the method used in this study and that used by Abou El- Magd et al. (1989)	78

INTRODUCTION

The aim of this work is to define accurate sonographic measurements of the normal liver in children 0- 5 years old and to study variables which would affect liver size as sex, body weight, body height, body mass index (BMI) and surface area.
