بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا سبحانك لا علم لنا

إلا ما علمتنا إنك أنت

العليم الحكيم

صدق الله العظيم

*To My Family*

# *Acknowledgment*

First, thanks are all due to **God** for blessing this work until it has reached its end, as a part of his generous help throughout my life.

I would like to express my deepest gratitude to **Prof. Dr. Ibrahim Abd El-Ghani Ramadan**, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his great support and continuous encouragement throughout this whole work. It is a great honor to work under his guidance and supervision.

I am truly grateful to **Ass. Prof. Dr. Seham Hussein Mohammed**, Assistant Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for her close supervision, sincere help, valuable suggestions and continuous encouragement throughout the whole work.

My deepest appreciation and grateful thanks are due to **Dr. Amr Essam El-Din El-Hennamy**, Lecturer of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his kind advice and his great efforts throughout this work.

*Ayman Abd El-Latif*

# **List of Contents**

<b>Introduction</b>	<b>1</b>
<b>Chapter (1): Overview of the Anatomy and Physiology</b>	<b>2 - 17</b>
• Cerebral blood supply	
• Cerebral metabolism	
• Cerebral blood flow	
<b>Chapter (2): CO<sub>2</sub> and Its Impact on Cerebral Circulation</b>	<b>18 - 51</b>
• Physiology	
• Mechanisms of CO <sub>2</sub> -induced alteration of cerebral vascular tone	
• Effect of CO <sub>2</sub> on cerebral vascular regulation	
• Effect of anesthetics on the CO <sub>2</sub> response of cerebral circulation	
• The potential interactions of CO <sub>2</sub> and other processes that regulate CBF	
• CO <sub>2</sub> monitoring	
<b>Chapter (3): Monitoring of CBF</b>	<b>52 - 60</b>
<b>Chapter (4): PaCO<sub>2</sub> Manipulation in Patient Care</b>	<b>61 - 70</b>
• CO <sub>2</sub> in the management of cerebral ischemia	
• Hyperventilation and ICP	
• Hyperventilation and subarachnoid hemorrhage	
• Intraoperative hyperventilation	
<b>Summary</b>	<b>71 - 73</b>
<b>References</b>	<b>74 - 86</b>
<b>Arabic Summary</b>	

## **List of Tables**

No.	Table	Page
Table (1):	"Normal" human values.	7
Table (2):	Summary of CO <sub>2</sub> and cerebral physiology.	42

## **List of Figures**

No.	Figure	Page
Figure (1):	The cerebral circulation.	3
Figure (2):	Circle of Willis with collateral pathways.	4
Figure (3):	Changes in CBF caused by independent alterations in PaCO <sub>2</sub> , PaO <sub>2</sub> , blood pressure.	9
Figure (4):	Idealized depiction of pressure autoregulation.	11
Figure (5):	Autoregulatory failure.	12
Figure (6):	Interaction of degree and duration of flow reduction on neurologic function.	13
Figure (7):	Altering the PaCO <sub>2</sub> changes the extracellular pH; the initial step leading to changes in (VSM) intracellular calcium concentration and vascular tone.	34
Figure (8):	The effect of prolonged hyperventilation on brain extracellular pH.	37
Figure (9):	Phases of a single breath gas washout.	45
Figure (10):	Capnographic waveform in a variety of conditions.	47
