

METHODS OF EPIDEMIOLOGICAL STUDIES IN NEUROPSYCHIATRIC DISORDERS

Thesis

Submitted for partial fulfillment
of Master degree in Neuropsychiatry

BY

Ahmed Abd El-Monem Gaber

M.B., B.Ch

Supervised by

Prof. Dr. Moustafa Kamel Ismail

Prof. of Psychiatry

Head of Neuropsychiatry Department

Faculty of Medicine, Ain Shams University

Prof. Dr. Ahmed Sherif Hafez

Prof. of Public Health

Vice - Dean of Faculty of medicine for

Community Service and Environmental Development Affairs

Faculty of medicine, Ain Shams University

Prof. Dr. Mohammed Hassan El-Banouby

Prof. of Neurology

Head of Geriatric Medicine Department

Faculty of Medicine, Ain Shams University

بسم الله الرحمن الرحيم

"وَاللَّهُ أَخْرَجَكُمْ مِنْ بُطُونِ أُمَّهَاتِكُمْ لَا

تَعْلَمُونَ شَيْئًا وَجَعَلَ لَكُمُ السَّمْعَ وَالْأَبْصَارَ وَالْأَفْئِدَةَ

لَعَلَّكُمْ تَشْكُرُونَ"

صدق الله العظيم

الاحل - الآية ٧٨

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

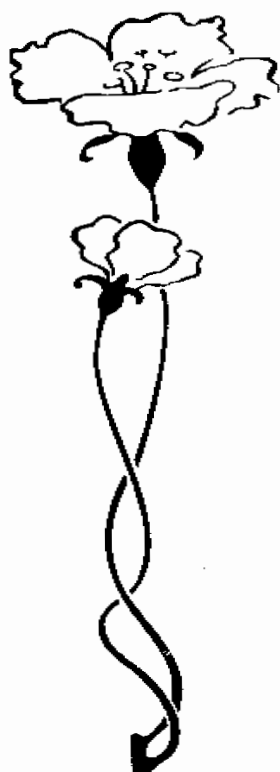

The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

*My mother
And
To
My father,
The for-life
Indebtedness*

ACKNOWLEDGEMENT

First , and foremost , I feel always indebted to Allah. The most kind and the most merciful .

Thanks to Allah who have lightened my path to become a humble student of a noble profession and granted me the ability to accomplish this work .

Words can never express my hearty thanks and indebtedness to Professor Dr. Moustafa Kamel Ismail for his generous advice continuous encouragement and faithfully fatherly guidance .

I would like to express my deepest gratitude and great appreciation to Professor Dr. Ahmed Sherif Hafez for the intensive support and faithful guidance .

I also wish to express my sincere thanks and gratitude to Professor Dr. Mohammed Hassan El-Banouby for his close supervision and motivation throughout this work .

I have to say thank you heartily to Assist. Prof. Dr. Safia Mahmoud Effat and Professor Dr. Mohammed Reffat El-Feky for their limitless guide and kind supervision which were indispensable to complete this work .

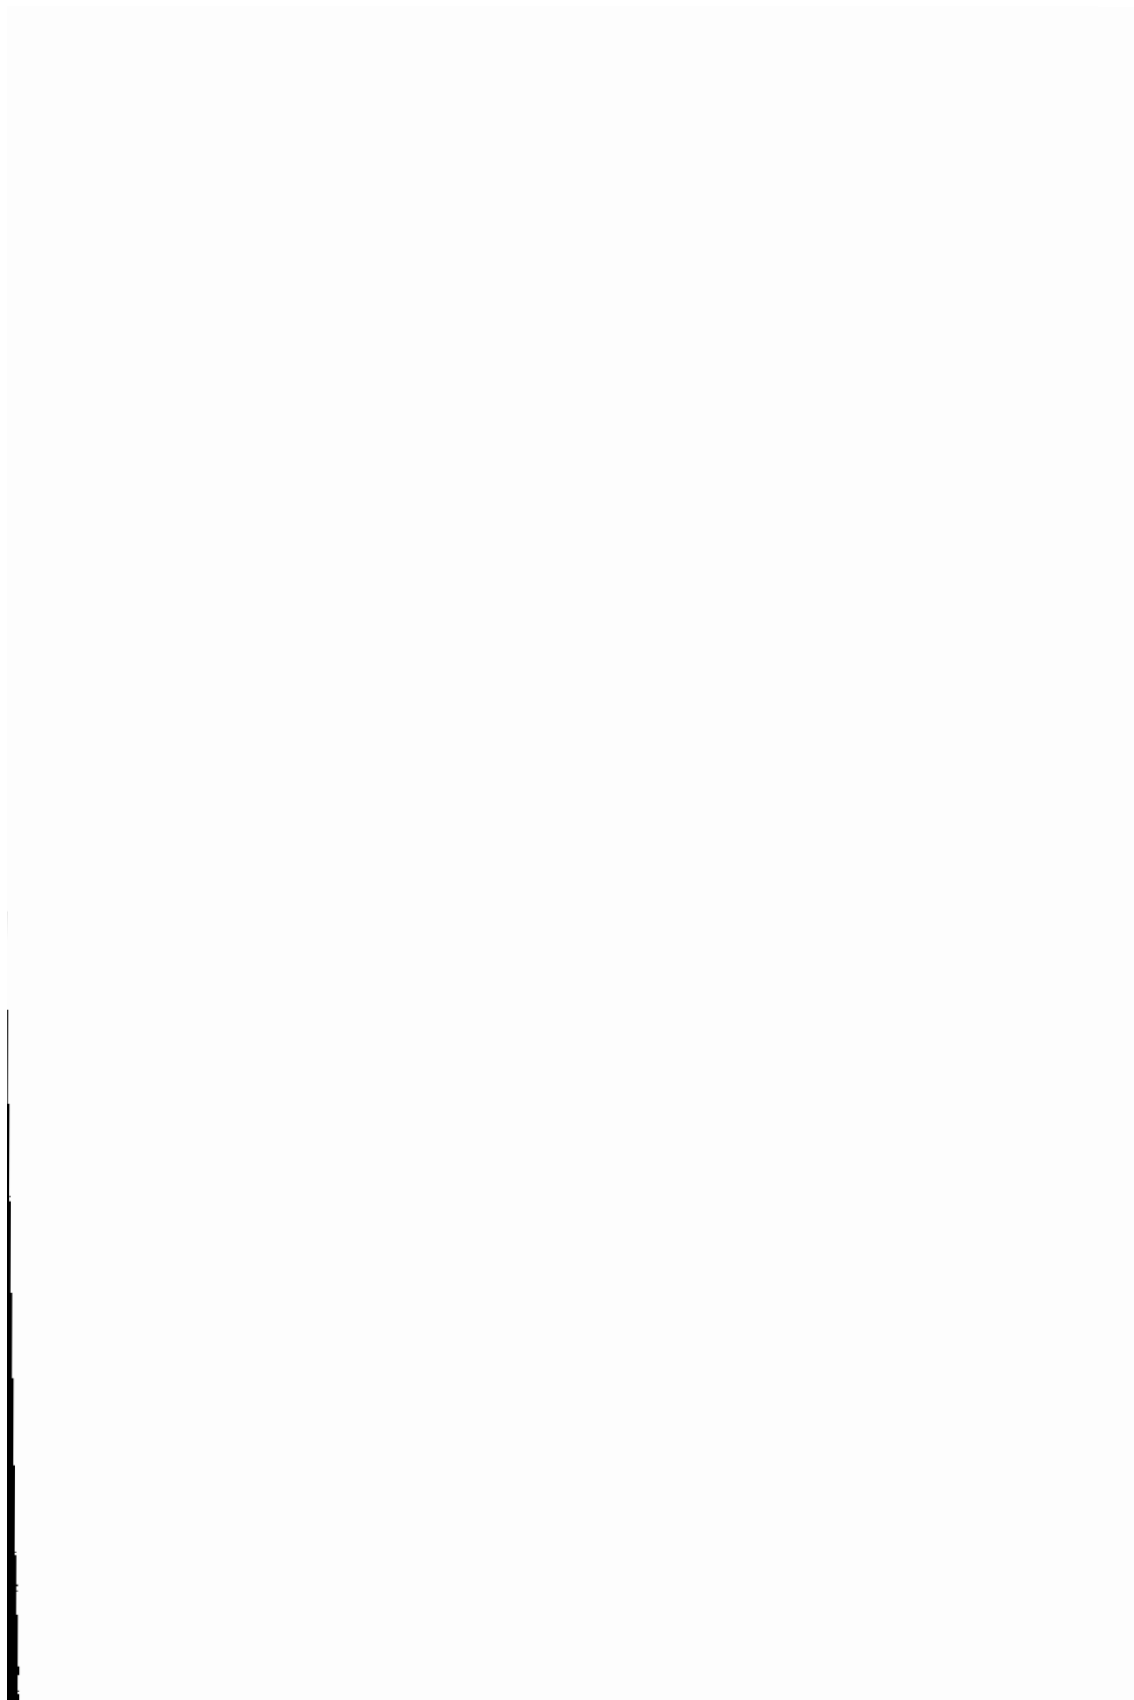

Finally, I cannot forget the kind help and valuable cooperation of my colleagues in Neuropsychiatry Department of Ain -Shams University .

Without them , this work would not have come reality , and I hope only that this essay justifies their efforts and their faith.

Contents

Introduction
Aim
Chapters:	
1- Understanding Epidemiology	1
2- Basic Statistics	36
3- Research Design	80
4- Methods Of Genetic Epidemiology In Neuropsychiatry	91
5- Clinical Trials In Neuropsychiatry	110
6- Measurement In Psychiatry	120
7- Principles Of Psychiatric Epidemiology	158
8- Epidemiological Methods Of Neuropsychiatric Disorders In Elderly	223
9- Epidemiological Methods Of Neurological Disorders	235
Discussion and Conclusion	276
Recommendations	304
Summary	310
References	316
Arabic Summary

List of Tables

Table No.		Page
1-1:	Guidelines for causation	5
1-2:	Relative ability of different types of study designs to prove causation	5
1-3:	Applications of different observational study designs	24
1-4:	Advantages and disadvantages of different observational study designs	25
6-1:	2 x 2 table for analysis of reliability	125
6-2:	Assessment of validity of an instrument	127
6-3:	Diagnostic instruments	138
6-4:	Diagnostic instruments (continued)	139
6-5:	Diagnostic instruments (continued)	140
6-6:	The CIDI and its versions	144
6-7:	The SCAN and its versions	146
6-8:	Rating scales using broad concept of mental disorders	147
6-9:	Global symptoms rating scales	149
7-1:	Five levels and four filters for detection of mentally ill patients	173
8-1:	Standardized interview procedures for diagnostic assessment of psychogeriatric disorder	229
9-1:	Reproducibility of components of neurologic examination (Mathew's Scale)	248
10-1:	Measures of disease frequency	278
10-2:	Analytic studies	280
10-3:	Experimental studies	281
10-4:	Errors in epidemiological studies	281
10-5:	Tests of statistical significance	283
10-6:	Types of clinical trials in neuropsychiatry	288

List of Figures

Figure No.	Page
1-1: Establishing the cause of the disease	4
1-2: Design of a case control study	18
1-3: Design of a cohort study	21
1-4: Design of clinical trials	26
1-5: Design of a field trial	27
2-1: Relationship between target population, study population and study sample	37
2-2: Pie chart	41
2-3: Bar chart	41
2-4: Histogram	42
2-5: Frequency polygon	42
2-6: The normal distribution curve	48
2-7: Areas under the normal curve (Z test)	53
7-1: Percent prevalence of mental disorders at different levels	174
9-1: Incomplete cross over design	267
9-2: Double blind design with an open therapeutic control	268
