AIN SHAMS UNIVERSITY
FACULTY OF ENGINEERING
IRRIGATION & HYDRAULICS DEPARTMENT

EFFECT OF DETACHED BREAKWATERS ON SHORELINE CHANGES

By

THARWAT EID ATTWA SARHAN

B.Sc. Civil Engineering , Suez Canal University.
M.Sc. Civil Engineering , Mansoura University.

*A thesis submitted in partial fulfillment for Ph.D.
in Hydraulics and Irrigation.*

Supervised by

Prof. Dr. ABDEL MOHSEN EL MONGY

Professor of Harbors&Coastal Engineering and Inland Navigation,
Irrigation & Hydraulics Department,
Faculty of Engineering,
Ain Shams University.

Dr. MAHMOUD SAMY ABDEL-SALAM MOHAMED

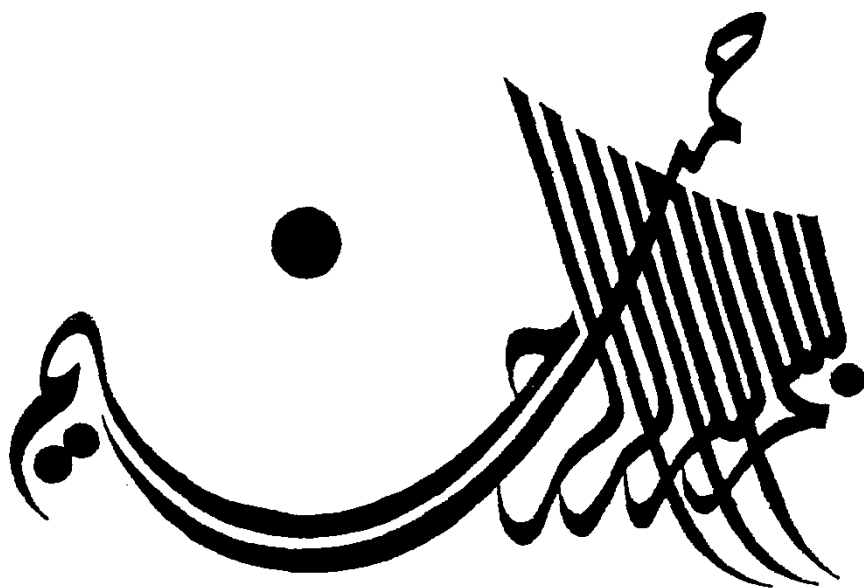

Ass. Proteessor of Hydraulics,
Irrigation & Hydraulics Department,
Faculty of Engineering,
Ain Shmas University.

Dr. HUSSEIN KAMEL MOSTAFA AHMED

Dpt. Head Coastal Eng. Division,
Suez Canal Research Center,
Suez Canal Authority.

1995

سُبْحَانَكَ اللَّهُمَّ لَنَا إِلَهًا وَنَا إِلَهًا
وَلَا إِلَهَ إِلَّا أَنْتَ يَا عَلِيمُ الْغُيُوبِ

صدق الله العظيم

The Examiners Committee

Name of Candidate : *Tharwat Eid Attwa Sarhan*

Title of Thesis : *"Effect of Detached Breakwaters on Shoreline Changes"*

The Examiners Committee :

Signature

1. Prof. Dr. Mahmoud Helmy Awad

**Advisor of Harbors Authority
Alexandria**

2. Prof. Dr. Abdel Fattah El Fiky

**Professor of Harbors, Coastal Engineering and Hydraulics,
Faculty of Engineering, Ain-Shams University.**

3. Prof. Dr. Abdel Mohsen El Mongy

**Professor of Harbors and Inland Navigation,
Faculty of Engineering, Ain-Shams University.**

ACKNOWLEDGEMENT

I wish to express my honest and the most sincere gratitude and whole appreciation to ***Prof. Dr. Abdel Mohsen El Mongy***, Professor of Harbors and Inland Navigation, Irrigation & Hydraulics Department, Faculty of Engineering, Ain Shams University, for suggesting the point, for his continuous help and superb way of supervision. His kindness and consideration with gratitude and his humanity with humility have been highly appreciated.

I would like to give my cordial thanks and respect to ***Dr. Mahmoud Samy Abdel-Salam***, Assistant Professor of Hydraulics, Irrigation & Hydraulics Department, Faculty of Engineering, Ain Shams University, for his continuous kind help, valuable advice and continuous encouragement, he kindly offered during the work.

I wish to express my sincere appreciation, gratitude and a special heartfelt dept to ***Dr. Hussein Kamel Mostafa***, Dpt. Head Coastal Engineering Division, Suez Canal Research Center, Suez Canal Authority, for his enthusiastic, valuable suggestions, precious time and sincere advice which were of invaluable help in the course of this work.

I am deeply grateful to ***Dr. Ibrahim El Awady***, Assistant Professor of Mathematics, Natural Science Department, Faculty of Engineering, Mansoura University, for help in solving many mathematic problems.

Special thanks to all the staff of the Suez Canal Research Center-Ismailia, to all the staff of the Irrigation & Hydraulics Department, Faculty of Engineering, Ain Shams University, and to all the staff of Irrigation & Hydraulics Department, Faculty of Engineering, Mansoura University.

Dedication

To my wife and my daughters, Hebah and Hadiel, without their help, patience and sacrifices this work would not be possible.

To my parents : my beloved mother and my dearest father, to my brothers and my sister, without whose love, encouragements, advice and prayers I could not have continued with this study.

Tharwat Sarhan

April, 1995.

LIST OF TABLES	xiv
NOTATIONS	xv

CHAPTER ONE

INTRODUCTION

1.1.Introduction	1
1.2.The Objective of The Study.....	3

CHAPTER TWO

LITERATURE REVIEW

2.1. Introduction	7
2.2. Detached Breakwater for Shore Protection	11
2.2.1. Introduction	11
2.2.2. Review of Literature on Detached Breakwaters	13
2.3. Wave Propagation on Coastal Area	19
2.3.1. Mild-Slope Equation	20
2.3.2. Derivation of Mild-Slope Equation by Berkhoff (1972)	21
2.3.3. Derivation of Mild-Slope Equation for Small- Amplitude Waves by Tanaka (1990)	22
2.3.4. Previous Application and Numerical Models which Handel The Mild-Slope Equation	28
2.4. Shoreline Theories	35
2.4.1. Introduction	35
2.4.2. One-Line Theory	36
2.4.3. Two-Line Theory	40

2.4.4. The Emperical Eigenfunction Analysis to The Prediction of Beach Evolution	43
2.5. Sediment Transport Calculations	43
2.5.1. Longshore Sediment Transport rates	44
2.5.2. The Cross-Shore Sediment Transport rate	44

CHAPTER THREE

WAVE PROPAGATION MODEL

3.1. Introduction	45
3.2. Wave Propagation Equation	45
3.3. Derivation of Wave Propagation Equation	46
3.3.1. Wave Transformation Outside Surf Zone	48
3.3.2. Wave Transformation Inside Surf Zone	49
3.4. Numerical Model of Wave Propagation	53
3.5. Solution Procedures	57
3.5.1. Grid System	57
3.5.2. Input Data	57
3.5.3. Model Construction	59
3.5.4. Steps of Solution	61
3.5.5. Boundary Conditions	63
3.6. Determination of Breaking Waves Behind Detached Breakwaters	64

CHAPTER FOUR

RESULTS AND ANALYSIS OF WAVE PROPAGATION MODEL

4.1. Introduction	71
4.2. Model Verification	72

4.3. Application of The Wave Model	78
4.3.1. Detached Breakwaters Inside the Surf Zone	82
4.3.2. Detached Breakwaters Outside the Surf Zone	84
4.3.3. Effect of Number of Breakwater Units on L_s/L_1 Ratio ..	127
4.3.4. Effect of Oblique Waves	132

CHAPTER FIVE

SHORELINE MORPHOLOGY MODEL

5.1. Introduction	135
5.2. Mathematical Approach	135
5.2.1. Governing Equations of Sediment Transport	136
5.2.2. Sediment Transport Rates	142
5.2.2.a. Longshore Sediment Transport rate	142
5.2.2.b. Cross-Shore Sediment Transport rate	144
5.3. Emperical Parameters	146
5.3.1. Depth of Longshore Transport	146
1- Sato & Tanaka's Equation	
2- Swart's Equation	
3- Rector's Equation	
4- Hallermeier's Equation (1983)	
5- Hallermeier's Equation	
5.3.2. Average Profile Shape and Slope	148
5.3.3. Depth of Closure	149
5.4. Sediment Numerical Model	149
5.5. Solution Procedures	154
5.5.1. Grid System	154
5.5.2. Input Data	155

<i>a) Sediment Properties</i>	155
<i>b) Sea Bed Characteristics</i>	156
<i>c) Wave Characteristics</i>	156
<i>d) Structure Configurations</i>	157
<i>e) Simulation Period and Time Step</i>	157
5.5.3. Model Construction	157
5.5.4. Steps of Solution	159
5.5.5. Boundary Conditions	163
<i>a) Longshore Conditions</i>	163
<i>b) Onshore-Offshore Boundary Conditions</i>	163
<i>c) The Structure Boundary Conditions</i>	164

CHAPTER SIX

RESULTS OF SHORELINE MORPHOLOGY MODEL AND APPLICATIONS

6.1. Introduction	165
6.2. Model Verification	166
<i>a) Sediment Properties</i>	
<i>b) Sea Bed Characteristics</i>	
<i>c) Wave Characteristics</i>	
<i>d) Structure Configurations</i>	
<i>e) Simulation Period and Time Step</i>	
6.3. Application of Shoreline Morphology Model	178
6.3.1. Effect of Detached Breakwater on Shoreline Morphology.....	184
6.3.1.a.Single Detached Breakwater	184
6.3.1.b.Two Detached Breakwaters	188

6.3.1.c.Three Deatched Breakwaters	188
6.3.2. Effect of Oblique Waves	194

CHAPTER SEVEN
