SITE ASSESSMENT FOR DISPOSAL OF LOW AND INTERMEDIATE LEVELS RADIOACTVE WASTES AT INSHAS AREA

A thesis

Submitted for the degree of doctor of philosophy
in
applied geophysics
to
Faculty of science-Ain Shams University

551
M. A
5957

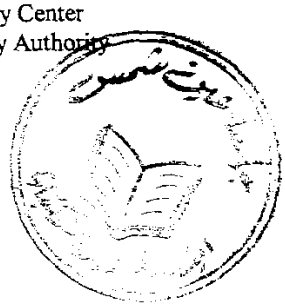
By

MOHAMED ABD EL-HALIM ABD EL-AZIZ
M.Sc in Geophysics in 1992

Under the Supervision of

Prof.Dr. Ahmed S.A. Abu El-Ata
Prof. of Geophysics, Geophysics Dept.
Faculty of Science,
Ain ShamsUniversity

Prof. Dr. Mohammed R.M. El-Sourougy
Prof. of Nuclear Chemical Engineering
Hot Labratory Center
Atomic Energy Authority



Cairo, 1996

Central Library - Ain Shams University

ACKNOWLEDGMENT

First of all, I would like to express my deepest thanks to Prof. Dr. Hesham Fouad, Chairman of Atomic Energy Authority (AEA) for his interest in the point of research, facilitate and solving the problems of financial supports.

Also, the author would like to express his gratitude to Prof. Dr. Ibrahim El-Dakhly Abdel -Razek, Head of the Second Research Reactor, (AEA), for his financial support for conducting geophysical surveys and drilling program.

I would like to express my deepest gratitude and appreciation to my supervisor Prof. Dr. Ahmed Sayed Ahamed Abu El-Ata, Professor of Geophysics, Geophysics Department, Faculty of Science, Ain Shams University, for his good approaching for the plan of the work, unlimited help, fruitful discussion, close and useful supervision and reviewing the language and scientific material of all work.

The author is also greatly indebted to my supervisor, Prof. Dr. Mohamed Rashad Metwally El-Sourougy, Hot Lab. Center, (AEA), for his suggesting the point of the work, interest, fruitful discussion throughout the work.

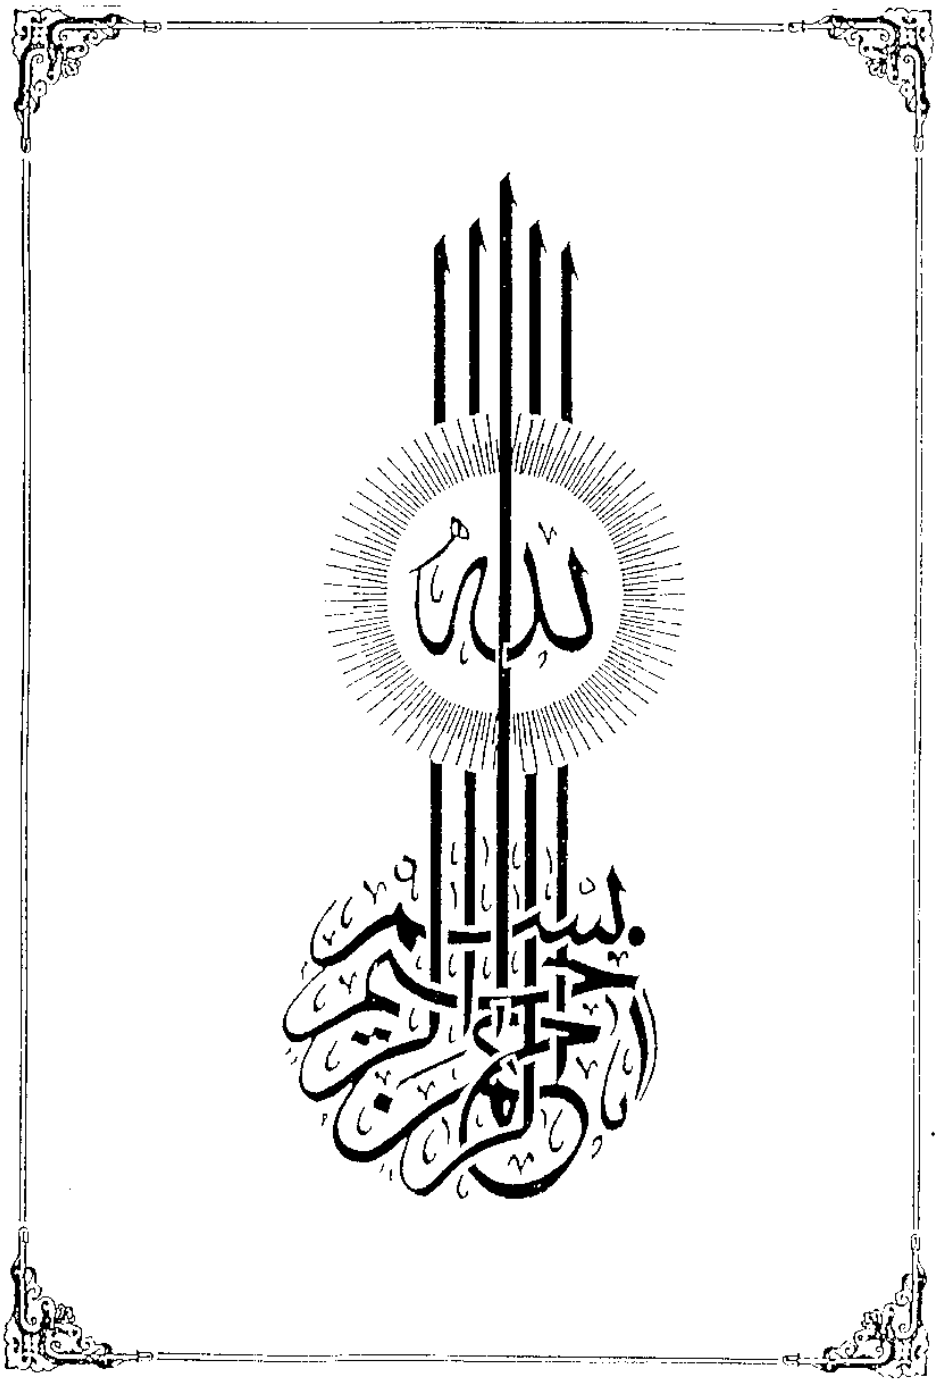
special thanks are offered to Dr. Leonello Serva and his colleagues, Head of the Hydrogeological Parameters Branch, National Agency for Protection of Environment (ANPA), Rome, Italy for his follow me up and supervision on chapter V, concerning the tectonic and seismic hazard analysis, during my training in Italy.

Deep thanks to Prof. Dr. Mokhtar S.A.Hamza, Vice Chairman, Radiation Control Division, National Center for Nuclear Safety and Radiation Control, (AEA), for his help to overcome the problems that I met throughout the work.

I wish to express my thanks to Prof. Dr. Aly I. M. Aly, Head of the Siting and Environmental Department, National Center for Nuclear Safety and Radiological Control, (AEA), for his interest and continuous encouragement.

I am also indebted to Dr. Ahmed Sewedan, Projects Manager, General Geological Survey Authority and Mineral Resources, for facilitating the field work.

Central Library - Ain Shams University



Central Library - Ain Shams University

I would like to thank my colleagues Prof. Assist. Dr. Mostafa Awad and Dr. Mostafa Abdel Hamid Sadek, Dr. Mohamed Reda ,Siting and Environmental Department, (NCNSRC), for their sincere help in the chemical analysis and interpretation of the water samples.

Another thanks are directed to Dr. Sayed Aly El-mongy, Central lab., (NCNSRC), for his kind help in the radiological measurements and interpretation of soil, water and rock samples.

Finally, a special word of thanks to my wife for understanding the nature of my work and prepare a confortable and suitable environment until this thesis is brought forth to light.

ABSTRACT	
CHAPTER I: SITE CHARACTERISTICS	
I-1 INTRODUCTION	1
I-2 RADIOACTIVE WASTE	2
I-2-1 Definition of Radioactive Waste	
I-2-2 Sources of Radioactive Wastes	
I-3 DISPOSAL	4
I-3-1 Definition of Disposal	
I-3-2 Wase Categories and Disposal System	
I-3-3 Shallow Ground Disposal	
I-3-4 Main Disposal Objectives	
I-4 GUIDANCE AND CRITERIA FOR SITE SELECTION PROCESS	7
I-4-1 Geography and Demography	
I-4-2 Ecology	
I-4-3 Meteorology	
I-4-4 Geology	
I-4-5 Hydrogeology	
I-4-6 Geochemistry	
I-4-7 Tectonic and Seismicity	
I-4-8 Radiological Characteristics	
I-4-9 Geotechnical properties	
CHAPTER II: PHYSICAL SETTING	
II-1 INTRODUCTION	12
II-2 SITE LOCATION AND SITE CHARACTERISTICS	12
II-3 POPULATION DISTRIBUTION	13
II-4 NATURAL ENVIRONMENT LAND AND WATER USAGE	13
II-5 NEARBY INDUSTRIES, TRANSPORT AND MILITARY FACILITIES	17
II-5-1 Nearby Industrial Facilities	
II-5-2 Nearby Military Facilities	
II-5-3 Nearby Transport Facilities	
II-6 RADIOLOGICAL IMPACT	17
II-7 METEOROLOGY	17
II-8 ADAPTABILITY OF THE PHYSICAL SETTING FOR SITE LOCATION	18
CHAPTER III: GENERAL GEOLOGIC SETTING	
III-1 INTRODUCTION	20

Central Library - Ain Shams University

III-2 REGIONAL GEOLOGY 20
III-2-1 Stratigraphy
III-2-2 Regional Structure Geology
III-3 NEAR SITE GEOLOGY 31
III-3-1 Geomorphology
III-3-2 Stratigraphy
III-3-3 Near Site Structure Geology
III-4 SITE GEOLOGY 40
III-4-1 Geomorphological Aspects
III-4-2 Stratigraphical Aspects
III-4-3 Structural Aspects
III-5 ADAPTABILITY OF THE GEOLOGY FOR SITE LOCATION 64

CHAPTER IV: TOTAL INTENSITY MAGNETIC 69
IV-1 INTRODUCTION 69
IV-2 MAGNETIC SURVEY 69
IV-3 MAGNETIC DATA 70
IV-4 DIGITIZATION 70
IV-5 REDUCTION TO THE POLE MAGNETIC TECHNIQUE
IV-5-1 The Concept of the Reduction to the Pole
IV-5-2 Application of the Reduction to the Pole
IV-6 QUALITATIVE INTERPRETATION OF THE REDUCED TO THE POLE MAP 73
IV-6-1 Magnetic Separation
Iv-6-2 Results of the Application of Griffin's Technique
IV-7 QUANTITATIVE INTERPRETATION OF THE MAGNETIC DATA 78
IV-7-1 Spectral Analysis Method
IV-7-2 Application of the Spectral Analysis Technique
IV-8 ADAPTABILITY OF THE STRUCTURE FOR SITE LOCATION 83

CHAPTER V: TECTONIC AND EARTHAQUE HAZARD 91
V-1 INTRODUCTION 92
V-2 REQUIRED INFORMATION AND INVESTIGATION
V-2-1 Regional Scale data
V-2-2 Near Region Investigation
V-2-3 Site Vicinity Investigation
V-2-4 Site Detailing
V-2-5 Historical Earthquake Data
V-2-6 Instrumental Earthquake Data
V-2-7 Paleoseismological Data
V-3 NEO-TECTONIC OF EGYPT 93
V-4 THE METHODS USED IN SEISMIC HAZARD ANALYSIS 102
V-4-1 Deterministic Seismic Hazard Analysis
V-4-2 Probabilistic Seismic Hazard Analysis
V-5 APPLICATION OF DETERMINISTIC METHOD 109
V-5-1 Input and Issues
V-6 APPLICATION OF PROBABILISTIC METHOD 119

Central Library - Ain Shams University

V-6-1 Application of Gutenberg-Richter Relationship
V-6-2 Application of the Extreme Value Approach
V-6-3 Application of the Analytical Method
V-7 ADAPTABILITY OF THE SEISMICITY FOR SITE LOCATION 148

CHAPTER VI: SHALLOW SEISMIC REFRACTION
VI-1 INTRODUCTION 149
VI-2 PROFILE LAYOUT 149
VI-3 INSTRUMENTION 150
VI-4 GENERATION OF SEISMIC WAVES 150
VI-4-1 Longitudinal Waves (P-Waves)
VI-4-2 Transverse Waves (S-Waves)
VI-5 DATA ANALYSIS 153
VI-5-1 Mathematical Analysis for Three Dipping Layers
VI-6 RESULTS AND INTERPRETATION 158
VI-6-1 Profile I
VI-6-2 Profile II
VI-6-3 Profile III
VI-7 DETERMINATION OF COMPETENCE PARAMETERS OF FOUNDATION MATERIAL 173
VI-7-1 Elastic Moduli
VI-7-2 Standard Penetration Test
VI-7-3 Material Competence Scale
VI-7-4 Foundation Material Bearing Capacity
VI-8 RESULTS OF THE DETERMINATION OF COMPETENCE PARAMETERS OF THE SURFACE LAYER IN THE SITE DETAILING AREA 178
VI-8-1 Physical Parameters
VI-8-2 Elastic Moduli
VI-8-3 Standard Penetration Test (N-Value)
VI-8-4 Material Competence Scale
VI-9 GEO-SEISMIC CROSS SECTION 186
VI-9-1 Geo-seismic Cross Section along Profile F-F'——F"
VI-9-2 Geo-seismic Cross Section along Profile G-G——G"
VI-9-3 Geo-seismic Cross Section along Profile H-H'——H"
VI-10 LABRATORY TESTING FOR PHYSICAL AND MECHANICAL PROPERTIES 194
VI-11 ADAPTABILITY OF THE PHYSICAL AND GEOTECHNICAL PROPERTIES OF HOST ROCK FOR SITE LOCATION 203

CHAPTER VII: ELECTRICAL RESISTIVITY
VII-1 INTRODUCTION 204
VII-2 PRINCIPALS OF RESISTIVITY METHODS 204
VII-3 ELECTRODE ARRANGEMENTS AND FIELD PROCEDURES 207
VII-3-1 Wenner Arrangement
VII-3-2 Schlumberger Array
VII-3-3 Dipole-Dipole Array
VII-3-4 Pole-Dipole Array
VII-4 FIELD WORK 209

Central Library - Ain Shams University

VII-5 INTERPRETATION OF FIELD DATA 210
VII-5-1 Qualitative Interpretation of Field Data
VII-5-2 Quantitative Interpretation of Field Data
VII-6 RESULTS OF THE QUANTITATIVE INTERPRETATION 229
VII-6-1 Geo-electric Cross Section
VII-7 ADAPTABILITY OF THE RESULTS OF ELECTICAL SURVEY FOR SITE LOCATION 250

CHAPTER VIII: HYDROGEOLOGICAL AND HYDROCHEMICAL ANALYSIS
VIII-1 INTRODUCTION 251
VIII-2 REGIONAL HYDROGEOLOGY OF INSHAS AREA 252
VIII-2-1 Source of Groundwater
VIII-2-2 Groundwater Occurrences
VIII-2-3 Natural Discharge Area
VIII-2-4 Direction of Groundwater Flow
VIII-2-5 Estimates of Groundwater Velocity
VIII-3 NEAR SITE HYDROGEOLOGY 253
VIII-3-1 Groundwater Occurrence
VIII-3-2 Direction of Groundwater Flow 261
VIII-4 HYDROCHEMICAL ANALYSIS
VIII-4-1 Sample collection
VIII-4-2 Results and Discussion
VIII-5 ADAPTABILITY OF HUDROGEOLOGY AND HYDRO-CHEMISTRY FOR SITE LOCATION 267

CHAPTER IX: NATURAL RADIOACTIVITY MEASUREMENTS
IX-1 INTRODUCTION 273
IX-2 INSTRUMENTATION 273
IX-2-1 Specification of the System
IX-3 METHODS OF SAMPLING 273
IX-3-1 Soil Sampling
IX-3-2 Water Sampling
IX-4 SAMPLING COLLECTION AND SAMPLING PREPARATION 275
IX-5 CALCULATION 276
IX-6 INTERPRETATION 277
IX-7 ADAPTABILITY OF THE RADIOLOGICAL MEASUREMENTS 279
