

AIN SHAMS UNIVERSITY
FACULTY OF ENGINEERING

BEHAVIOR OF LARGE CIRCULAR SYPHONS BORED IN SOFT SOILS
UNDER
DIFFERENT LOADING CONDITIONS

BY
AYMAN ZAKARIA AWAD
M. Sc. Civil Engineering
Irrigation & Hydraulics Department

A Thesis
Submitted in fulfillment for the
requirements of the Degree of Doctor of Philosophy
in Civil Engineering
Irrigation & Hydraulics Department

Supervised by

Prof. Dr. Mohamed El-Niazi Aly Hammad
Professor of Irrigation Designs
Irrigation & Hydraulics Department
Faculty of Engineering, Ain Shams University

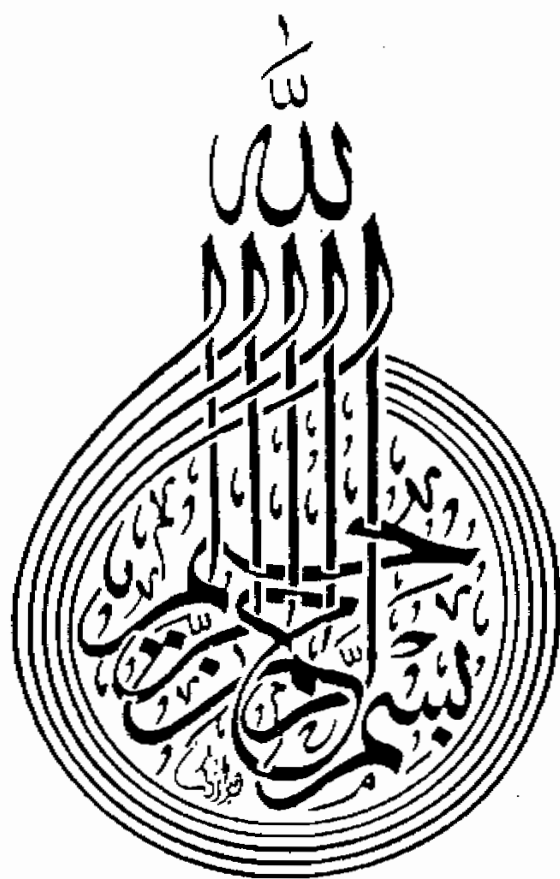

Prof. Dr. Essam El-Din Aly Abdel Hafiz
Professor of Irrigation Designs
Irrigation & Hydraulics Department
Faculty of Engineering, Ain Shams University

Dr. Essam El-Din Soliman Aguib
Associate Professor
Structural Engineering Department
Faculty of Engineering, El-Mansoura University

1997

624-19
A-2

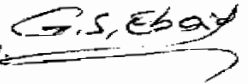

Examiners Committee

- 1- Prof. Dr. Ahmed El-Amia El-Neur, Prof in Soil Mechanics and Foundation Department, Faculty of Engineering, Mansoura University.

- 2- Prof. Dr. Gamal S. Ebid Prof. in Irrigation & Hydraulics Department, Faculty of Engineering, Ain Shams University.

- 3- Prof. Dr. Mohamed El-Niazi Aly Hammad, Prof. in Irrigation Designs, Irrigation & Hydraulics Department, Faculty of Engineering, Ain Shams University.

- 4- Prof. Dr. Essam El-Din Soliman Aguib, Associate Professor, Structural Engineering Department, Faculty of Engineering, El-Mansoura University.

STATEMENT

This dissertation is submitted to Ain Shams University for the degree of DOCTOR OF PHILOSOPHY in Civil Engineering

The work included in this thesis was carried out by the author in the Department of Irrigation &Hydraulics, Ain Shams University from October 1995 to 1997.

No part of this thesis has been submitted for a degree or a qualification at any other University or Institution.

Name : Ayman Zakaria Awad El-Sayed

TABLE OF CONTENTS

LIST OF FIGURES.....	I
LIST OF SYMBOLS	X
 CHAPTER (1) EL-SALAM TUNNEL PROJECT AND INTRODUCTION	1
A- EL-SALAM TUNNEL PROJECT.....	1
1-1 General	1
1-2 Hydraulic Data	2
1-3 Tunnel Lining	3
1-4 Tunneling Execution Technology.....	5
B- INTRODUCTION	11
1-5 Aim of This Thesis	11
 CHAPTER (2) LITERATURE REVIEW	14
2-1 General.....	14
2-2 Convergence-Confinement Approach.....	14
2-2-1 Convergence curve for the ground	17
2-2-2 Confinement curve for the support	17
2-3 Methods Based on Limit-Equilibrium Theory	21
2-4 Methods Based on Subgrade Reaction Approach	21
2-5 Methods based on The Finite Element Approach	26
2-6 Methods Based on The Observational Approach	27
 CHAPTER (3) TUNNELING SHIELDS	28
3-1 Introduction.....	28
3-2 Tunnel- Boring Machines	28

3-3	Structure of Shield Machines	29
3-4	Classification of Shield Machines	29
3-4-1	Manual shield	31
3-4-2	Partially mechanical shield	31
3-4-3	Mechanical shield	31
3-4-3-1	Classification by rotating way	34
3-4-3-2	Classification by the shape of cutter head	34
3-4-4	Blind shield	35
3-4-5	Confined soil shield	35
3-4-6	High density slurry shield	35
3-4-7	Slurry shield	38
3-5	Advancement of Shield Machines in Soft Ground	38
3-6	Size of Shield Machines	41
3-7	Assessment and Discussion	42
3-8	Method of Construction	42

CHAPTER (4) MONITORING SYSTEM AND GEOLOGY OF PROJECT

	SITE	48
4-1	Introduction	48
4-2	Monitoring of Tunnels	48
4-3	Construction Technology	49
4-4	Details of Instruments	52
4-4-1	Settlement point	52
4-4-2	Inclinometric column	53
4-4-3	Multipoint extensometer	53
4-4-4	Convergence measuring device	55
4-4-5	Piezometers	55

4-5	Layout of Test Sections	58
4-6	Geology of Project Site	60
4-7	Summary of Field Data	62
4-7-1	Introduction.....	62
4-7-2	Subsurface settlement records	62
4-7-3	Convergence bolts	66
4-8	Cement (Fly Ash Grouting)	66

CHAPTER (5) HYBRID FINITE ELEMENT FOR SOIL-STRUCTURE INTERACTION68

5-1	Introduction.....	68
5-2	Hybrid Stress Model	69
5-3	The Behavior of Concrete under Compression Load	70
5-3-1	Biaxial behavior of concrete	70
5-4	Failure Behavior of Concrete	72
5-4-1	Tensile cracking failure	72
5-4-2	Shear failure.....	74
5-5	Hypoelastic Failure Model for Concrete	74
5-6	Stress-Strain Relations	74
5-7	Nonlinear Analysis of Stress and Strain in Soils.....	75
5-8	Behavior of Soil under Stresses	78
5-8-1	Nonlinear elastic model	78
5-8-2	Plasticity models	78
5-8-2-1	Huber-Von Mises model	78
5-8-2-2	Drucker-Prager elastic-perfectly plastic model.....	80
5-8-2-3	Iiyushin elasto-plastic model	81
5-9	Failure Criteria of Soils.....	82

5-9-1 Failure surfaces in three dimensions	82
5-9-2 Strength models.....	85
5-10 Gap- Contact Surface	87
5-10-1 Introduction	87
5-10-2 Hybrid technique for gap-contact surface	88
5-10-2-1 The hybrid techniques.....	88
5-10-3 Gap definition	89
5-10-4 Contact definition	91
5-10-5 Gap elements	93
5-10-5-1 Two nodal gap element	93
5-11 The Solution of Nonlinear Model	93
5-11-1 Initial control techniques	94
5-11-2 Iteration solution methods	96
5-11-2-1 Newton-Raphson scheme	98
5-11-2-2 Modified Newton-Raphson scheme	98
5-11-3 Termination scheme	99

CHAPTER (6) APPLICATIONS TO THE TUNNEL PROBLEM101

6-1 Introduction.....	101
6-2 Comparison Between Finite Element Model and other Theories.....	102
6-3 The Excavation Machine Cycle and its Effect on the Ground Displacement	108
6-4 Effect of Using different Elements Models for the Lining on the Surface Subsidence.....	117
6-5 Effect of the Shape of the Interface Element	129

CHAPTER (7) THREE DIMENSIONAL ANALYSIS AND COMPARISON WITH THE FIELD DATA.....	144
7-1 Introduction.....	144
7-2 Nonlinear Analysis for the Soil- Lining Interaction and the Comparison with the Field Data (Short Term Displacement).....	145
7-3 The complete Model Taking The secondary Lining in the Model with Interface Element for one Tunnel.(Long Term Displacement).....	157
7-4 Analysis of Face Stability -Three dimensional Modeling	182
7-5 Effect of Excavation of One Tunnel on the Other Tunnels.....	192
CHAPTER (8) CONCLUSION	216
REFERENCES	219
APPENDIX (A)	A-1
APPENDIX (B)	B-1
