

Duplex Doppler Sonographic Assessment of Portal Haemodynamics in Children with Chronic Liver Parenchymal Diseases

**Thesis
Submitted by**

**Sahar Mohamed Salem El-Fiky
For Partial Fulfilment of M.D. Degree
in Radiodiagnosis**

Supervisors

From Radiodiagnosis Department:

Prof. Dr. Zeinab Abdallah
Head of Radiodiagnosis department
Ain Shams University

Dr. Mohamed Aboul Hoda Darwish
Assistant Professor of Radiodiagnosis
Ain Shams University

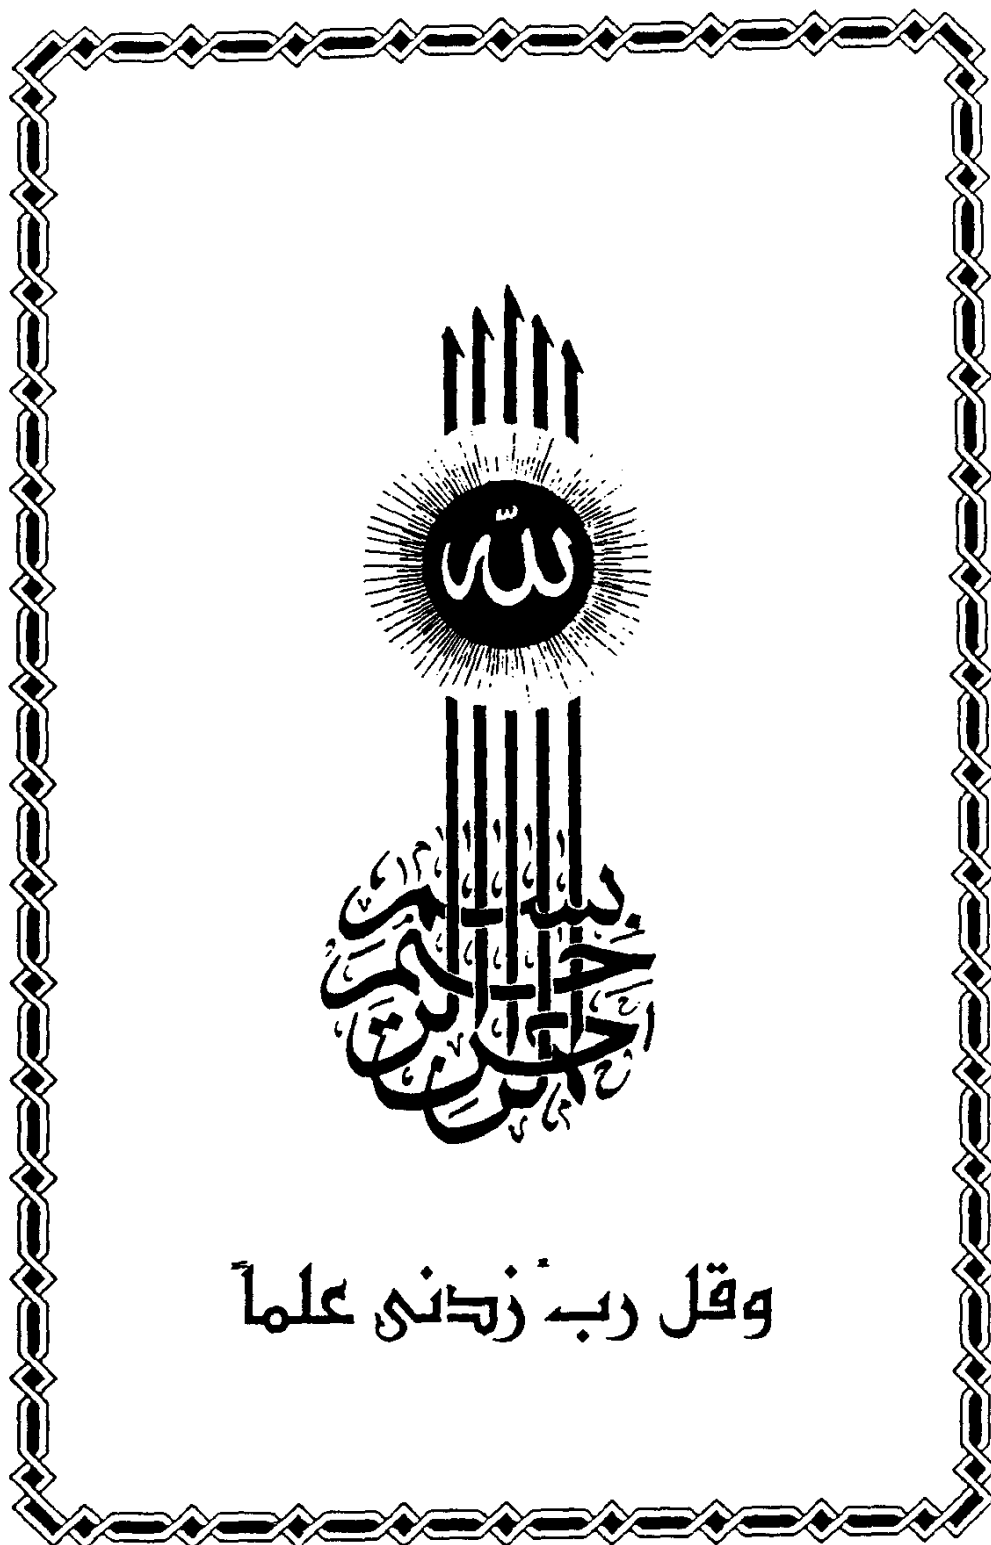

From Pediatric Department:

Prof. Dr. Ahmed Sami Khalifa
Professor of Pediatric
Ain Shams University

Prof. Dr. Sherine Abdel Fattah
Professor of Pediatric.
Ain Shams University

1994

Acknowledgment

I am greatly indebted to Prof. Dr. Zeinab Abdallah, Professor of Radiodiagnosis and head of Radiodiagnosis department, Ain Shams University, for detailed supervision, constructive encouragement, unfailing advices and guidance as well as her moral support throughout the whole work.

My sincere appreciations go to Prof. Dr. Ahmad Sami Khalifa, Professor of pediatrics, Ain Shams University, for his kind supervision, valuable advices and generous help that were essential for this study to be achieved.

My deepest gratitude also extends to Prof. Dr. Sherine Abdel Fattah, Professor of pediatrics, Ain Shams University, for helping me in collecting the cases, without her effort I could never accomplish this thesis.

My great thanks are to Dr. Mohamed Aboul Hoda Darwish, Assistant Professor of Radiodiagnosis, Ain Shams University for his sound advice and kind supervision.

I am very grateful to my husband, Dr. Amir Salah for his sincere help, sacrifice and understanding.

My warm thanks is to my family, every one helped me to accomplish this work.

Last, but not least, I would like to thank the teaching staff and all my colleagues in the Radiagnosis department.

Contents

| | PAGE |
|---|---------|
| - Introduction and aim of the work | 1 |
| - Anatomy of the liver and its vessels | 2–25 |
| - Pathology of chronic liver parenchymal diseases in children . . | 26–38 |
| - Physical principles of duplex Doppler sonography | 39–54 |
| - Material and methods | 55–63 |
| - Results | 64–75 |
| - Illustrative cases | 76–112 |
| - Discussion | 113–122 |
| - Summary and conclusion | 123–126 |
| - References | 127–141 |
| - Arabic summary | |

List of Tables

| | PAGE |
|---|------|
| Table I : Chronic liver parenchymal diseases in children. | 26 |
| Table II : Characteristics data of control and patients groups, age in years, weight in kilograms, height in cm and haemoglobin in gm%. | 65 |
| Table III: Liver and spleen size in cm in control and patients groups. | 67 |
| Table IV : Portal vein diameter in mm and congestion index of portal vein in cmxsec in control and patients groups. | 68 |
| Table V : Direction of blood in main portal vein expressed as % of group number. | 70 |
| Table VI : Maximum velocity in main portal vein, in right portal vein and in left portal vein in control and patients groups. | 72 |
| Table VII: Comparison between the duplex Doppler sonographic parameters in thalassaemic and non thalassaemic patients in the three groups. | 74 |

List of figures

| | PAGE |
|--|-------------|
| Fig. 1 : Diagram of inferior and posterior surfaces of the liver. | 2 |
| Fig. 2 : Diagram of the sectors, fissures and segments of the liver. | 4 |
| A & B | |
| Fig. 3 : Diagram showing the veins of the liver. | 8 |
| Fig. 4 : Diagram showing the usual relationship of structures in the free edge of lesser omentum. | 8 |
| Fig. 5 : Transverse sonogram showing the normal liver parenchyma. | 11 |
| Fig. 6 : Longitudinal and transverse scans showing the intrahepatic A & B vessels. | 13 |
| Fig. 7 : Transverse sonogram showing the main portal vein, right portal vein and left portal vein. | 14 |
| Fig. 8 : Transverse sonogram showing the hepatic veins. | 14 |
| Fig. 9 : Transverse sonogram showing the normal gall bladder. | 16 |
| Fig. 10 : Diagram demonstrating time velocity spectra in different hepatic vessels. | 18 |
| Fig. 11 : Duplex Doppler sonogram of the portal vein. | 19 |

| | PAGE |
|---|-------------|
| Fig. 12 : Duplex Doppler sonogram of the superior mesenteric vein. | 20 |
| Fig. 13 : Duplex Doppler sonogram of the splenic vein. | 20 |
| Fig. 14 : Duplex Doppler sonogram of the hepatic artery. | 22 |
| Fig. 15 : Duplex Doppler sonogram of a hepatic vein. | 22 |
| Fig. 16 : Color duplex Doppler sonogram of the left portal vein. | 24 |
| Fig. 17 : Diagram of acoustic wave. | 39 |
| Fig. 18 : Diagram demonstrating Doppler effect. | 41 |
| Fig. 19 : Diagram showing continuous-wave and pulsed-wave Doppler signals. | 44 |
| Fig. 20 : Duplex Doppler sonogram of the inferior vena cava. | 46 |
| Fig. 21 : Color flow Doppler mapping of the liver. | 48 |
| Fig. 22 : Velocity traces showing difference in signal and data for A & B different angles between acoustic axis and vessel axis for the same vessel and gate size. | 50 |
