

**ANOPHELES POPULATION DYNAMICS IN
RELATION TO MALARIA IN EL-FAIYUM
GOVERNORATE, EGYPT**

A THESIS

Submitted in partial fulfilment of the requirements for the
M.D. degree in
Medical Science (PARASITOLOGY)

By
IMAN MOAWAD A. EL-SHARKAWY
M.B., B.Ch., M.Sc.

Assistant Lecturer of Parasitology
FACULTY OF MEDICINE, Ain Shams University

59577

Supervisors

Prof. Dr. Tossou Ali Morsy
Prof. of Parasitology, Head Department
of Parasitology, Faculty of Medicine,
Ain Shams University.

Dr. Azza Abdel Salam El-Kadry
Assist. Prof. of Parasitology,
Faculty of Medicine
Ain Shams University.

Dr. Magdy Mohamed Salama
Assist. Prof. of Parasitology,
Faculty of Medicine,
Ain Shams University.

Dr. Abdel-Hamid Abdel Tawab Sabry
Assist. Prof. of Parasitology,
Faculty of Medicine,
Ain Shams University.

Acknowledgements

I am grateful to Prof. Dr. Tossou A. Morsy, Professor and Head Department, of Parasitology, Faculty of Medicine, Ain Shams University, for suggesting the subject, his direct supervision of the field work and for reading and correcting the manuscript.

I wish to express my gratitude to Dr. Azza A. El-Kadry, Assist. Prof. of Parasitology, Faculty of Medicine, Ain-Shams University, for her valuable advice, kind encouragement and reviewing the manuscript.

I am thankful to Dr. Magdy M.I. Salama Assist. Prof. of Parasitology for his valuable help, kind care and assistance in performing this work.

Thanks are also due to Dr. Abdel-Hamid A. Sabry Assist. Prof. of Parasitology, Faculty of Medicine, Ain-Shams University, for his various help throughout the field study.

Special thanks are due to the director and staff the Members of medical Laboratory, Forensic Department, Ministry of Justice, for participation and facilitation in

studying the host preference by the counter immunoelectrophoresis technique.

*I am thankful to **Dr. Mohamed M. Kotb**, Assist. Prof. of Community Medicine, Faculty of Medicine, Ain Shams University for carrying out the statistical evaluation of this work.*

I am also indebted to the staff and technicians of the Ain Shams Research And Training Center on Vectors of Diseases., Ain-Shams University., for providing some field facilities.

I am obliged to all staff members and technical staff, Parasitology Department, Faculty of Medicine, Ain - Shams University. where this work has been done

<i>I. INTRODUCTION.....</i>	<i>1</i>
<i>II. AIM OF THE PRESENT STUDY.....</i>	<i>3</i>
<i>III. LITERATURE REVIEW.....</i>	
<i>1- Classification.....</i>	<i>4</i>
<i>2- Geographical distribution of malaria.....</i>	<i>6</i>
<i>3- Life cycle and methods of reproduction.....</i>	<i>11</i>
<i>4- Biochemistry and metabolism of malaria parasites.....</i>	<i>16</i>
<i>5- Epidemiology of malaria</i>	<i>19</i>
<i>6-Diagnosis of malaria</i>	<i>24</i>
<i>7- Clinical picture of malaria.</i>	<i>26</i>
<i>8- Anopheline vectors of malaria.....</i>	<i>32</i>
<i>9- Biology of malaria vectors.....</i>	<i>40</i>
<i>10-Characteristics of anopheline breeding places</i>	<i>56</i>
<i>11- Vectorial capacity of malaria transmission.....</i>	<i>60</i>
<i>12- ABO blood group & mosquitoes feeding</i>	<i>64</i>
<i>13-Host preference.....</i>	<i>68</i>
<i>IV. MATERIALS AND METHODS.....</i>	
<i>1-Study area and period of study.....</i>	<i>70</i>
<i>2-Collection.</i>	<i>73</i>

	Page
<i>A. Larval collection.....</i>	<i>73</i>
<i>B. Adult collection.....</i>	<i>78</i>
<i>3- Methods of examination.....</i>	<i>88</i>
<i>A. Larvae</i>	<i>88</i>
<i>B. Adults</i>	<i>89</i>
<i>Dissection</i>	<i>89</i>
<i>4- Host blood Preference</i>	<i>91</i>
<i>5-Human survey for malaria.....</i>	<i>94</i>
<i>Key to identify larvae</i>	<i>97</i>
<i>Key to identify adults</i>	<i>98</i>
<i>V. RESULTS.....</i>	
<i>A. Adults.....</i>	<i>100</i>
<i>*Random spotlight survey.....</i>	<i>100</i>
<i>*Results of dissection of <u>Anopheles</u> females.....</i>	<i>108</i>
<i>*Seasonal activity of adults.....</i>	<i>112</i>
<i>-Indoors.....</i>	<i>113</i>
<i>-Outdoors.....</i>	<i>124</i>
<i>*Feeding habits and resting behaviour.....</i>	<i>143</i>
<i>*Host blood preference.....</i>	<i>148</i>
<i>B. Larvae:</i>	<i>149</i>

	Page
<i>*Random spotlight survey.....</i>	<i>149</i>
<i>*Characters of breeding places.</i>	<i>149</i>
<i>*Seasonal Study of <u>Anopheles</u> larvae.</i>	<i>150</i>
<i>C. Malaria infection rate amng humans</i>	<i>179</i>
<i>VI DISCUSSION</i>	<i>181</i>
<i>VII CONCLUSION.....</i>	<i>220</i>
<i>VIII SUMMARY.....</i>	<i>221</i>
<i>IX REFRENCES.....</i>	<i>227</i>
<i>X ARABIC SUMMARY.....</i>	

List of Figures

	Page
- Map of El Faiyum Governorate.....	71
1- Collection of larvae by dipping.	76
2- Collection of larvae by netting.	77
3- Diagram of light trap.....	79
4- Collection of adults by aspiration using human bait.....	81
5- Collection of adults by aspiration using animal bait.	82
6- Collection of adults from behind overhanging clothes.....	83
7- Collection of adults by flitting.	85
8- Diagram of paper cup used for transportation of adults.....	87
9- <u>Anopheles pharoensis</u> adult.....	102
10- <u>Anopheles sergenti</u> adult.	103
11- <u>Anopheles multicolor</u> adult.....	104
12- <u>Anopheles tenebrosus</u> adult.	105
13- The percentage of abundance of the 4 species of <u>Anopheles</u> adults collected from the different areas surveyed in El Faiyum from September 1991 to August 1992	107
14- Seasonal activity of <u>A. pharoensis</u> adults collected indoors in Zawia, Abheit and Tersa villages (El Faiyum Governorate) during the year 1993	116

	Page
15- Seasonal activity of <i>A. sergenti</i> adults collected indoors in Zawia, Abheit and Tersa villages during the year 1993.....	120
16- Seasonal activity of <i>A. multicolor</i> adults collected indoors in Abheit and Tersa villages during the year 1993.....	123
17- Seasonal activity of <i>A. pharoensis</i> adults collected outdoors in Abheit, Zawia and Tersa villages during the year 1993	127
18- Seasonal activity of <i>A. sergenti</i> adults collected outdoors in Abheit, Zawia and Tersa villages during the year 1993	131
19- Seasonal activity of <i>A. multicolor</i> adults collected outdoors in Abheit and Tersa villages during the year 1993.....	134
20- Different species of <i>Anopheles</i> adults collected indoors and outdoors from the 3 villages in Sinouris Centre during the year 1993	141
21- Plates of counter immunoelectrophoresis technique	149
22- Breeding places of <i>Anopheles</i> larvae (irrigation canal)	150
23- Breeding places of <i>Anopheles</i> larvae (small water collection)	151

	Page
24- Breeding places of <u>Anopheles</u> larvae (Large water collection).....	152
25- The percentage of abundance of <u>Anopheles</u> larvae collected from the different areas surveyed in El Faiyum from September 1991 to August 1992.....	154
26- <u>Anopheles pharoensis</u> larva.....	155
27- <u>Anopheles sergenti</u> larva.....	156
28- <u>Anopheles multicolor</u> larva.....	157
29- Seasonal abundance of <u>Anopheles</u> larvae in Abheit village during 1993.....	165
30- Seasonal abundance of <u>Anopheles</u> larvae in El-Zawia village during 1993.....	170
31- Seasonal abundance of <u>Anopheles</u> larvae in Tersa village during 1993.....	177
32- Blood film from a case of <u>vivax</u> malaria	181

List of Tables

	Page
1- The random spotlight survey of adult <i>Anopheles</i> species from the 5 selected areas in Faiyum Governorate from September 1991 to August 1992	101
2- The percentage of abundance of the four species of adult <i>Anopheles</i> in the different areas examined	106
3- The number of female <i>A. pharoensis</i> collected from the 5 selected areas and dissected for natural infection with malaria parasites (from Sept . 1991 to Aug . 1992).....	108
4- The number of female <i>A. sergenti</i> collected from the 5 selected areas and dissected for natural infection with malaria parasites (from Sept. 1991 to Aug. 1992).....	109
5- The number of female <i>A. multicolor</i> collected from the 5 selected areas and dissected for natural infection with malaria parasites (from Sept. 1991 to Aug. 1992).....	110
6- The number of female <i>A. tenebrosus</i> collected from the 5 selected areas and dissected for natural infection with malaria parasites (from Sept. 1991 to Aug. 1992).....	111
7- Seasonal activity of <i>A. pharoensis</i> collected indoors in Abheit during the year 1993	113

Page

8- Seasonal activity of <i>A. pharoensis</i> collected indoors in El-Zawia El-Khadra during the year 1993.....	114
9- Seasonal activity of <i>A. pharoensis</i> collected indoors in Tersa during the year 1993.....	115
10- Seasonal activity of <i>A. sergenti</i> collected indoors in Abheit during the year 1993	117
11- Seasonal activity of <i>A. sergenti</i> collected indoors in El- Zawia El- Khadra during the year 1993.....	118
12- Seasonal activity of <i>A. sergenti</i> collected indoors in Tersa during the year 1993.....	119
13- Seasonal activity of <i>A. multicolor</i> collected indoors in Abheit during the year 1993	121
14- Seasonal activity of <i>A. multicolor</i> collected indoors in Tersa during the year 1993.....	122
15- Seasonal activity of <i>A. pharoensis</i> collected outdoors in Abheit during the year 1993	124
16- Seasonal activity of <i>A. pharoensis</i> collected outdoors in El- Zawia El- Khadra during the year 1993	125
17- Seasonal activity of <i>A. pharoensis</i> collected outdoors in Tersa during the year 1993.....	126

	Page
18- Seasonal activity of <u>A. sergenti</u> collected outdoors in Abheit during the year 1993	128
19- Seasonal activity of <u>A. sergenti</u> collected outdoors in El- Zawia El- Khadra during the year 1993.....	129
20- Seasonal activity of <u>A. sergenti</u> collected outdoors in Tersa during the year 1993.....	130
21- Seasonal activity of <u>A. multicolor</u> collected outdoors in Abheit during the year 1993	132
22- Seasonal activity of <u>A. multicolor</u> outdoors in Tersa during the year 1993.....	133
23- Adult anophelines collected in Abheit in 1993	136
24- Adult anophelines collected in El- Zawia El- Khadra in 1993	137
25- Adult anophelines collected in Tersa in 1993.....	138
26- Adult anophelines collected in Abheit, Zawia and Tersa during 1993.....	139
27- The different species of <u>Anopheles</u> adults collected from the 3 villages in Sinouris Centre during the year 1993	140

Page

28- Total number of adult anophelines collected in the 3 villages during 1993 and its relation to climatic conditions and its statistical evaluation	142
29- The feeding and gravid stages of <u>A. pharoensis</u> females collected from 3 villages in Sinouris Centre during the year 1993	144
30- The feeding and gravid stages of <u>A. sergenti</u> females collected from 3 villages in Sinouris Centre during the year 1993	145
31- The feeding and gravid stages of <u>A. multicolor</u> females collected from 3 villages in Sinouris Centre during the year 1993	146
32- The feeding and gravid stages of <u>Anopheles</u> females collected from 3 villages in Sinouris Centere during the year 1993	146
33- The blood preference of the blood fed females as reported by the counter immunoel- ectrophoresis	148

34- The random spotlight survey of larvae of <u>Anopheles</u> species in the 5 selected areas in Faiyum Governorate from September 1991 to August 1992.....	153
35- Seasonal abundance of <u>A. pharoensis</u> larvae in Abheit village during 1993	159
36- Seasonal abundance of <u>A. sergenti</u> larvae in Abheit village during 1993	161
37- Seasonal abundance of <u>A. multicolor</u> larvae in Abheit during 1993	163
38- Seasonal abundance of <u>A. pharoensis</u> larvae in El-Zawia during 1993	166
39- Seasonal abundance of <u>A. sergenti</u> larvae in El- Zawia during 1993	168
40- Seasonal abundance of <u>A. pharoensis</u> larvae in Tersa during 1993	171
41- Seasonal abundance of <u>A. sergenti</u> larvae in Tersa during 1993	173
42- Seasonal abundance of <u>A. multicolor</u> larvae in Tersa during 1993	175
