ACKNOWLEDGEMENT.....	xi
LIST OF TABLES.....	xii
LIST OF FIGURES.....	xiv
AIM OF WORK.....	xxii

CHAPTER 1

1. INTRODUCTION

1.1. Separation and Preconcentration of Trace Elements.....	1
1.1.1. Importance of Preconcentration.....	1
1.1.2. Some Preconcentration Techniques.....	2
1.2. Macroreticular Resins.....	2
1.3. Ion Exchangers.....	3
1.4. Ion Exchange Technique.....	4
1.4.1. Definitions.....	4
1.4.2. Practical Parameters.....	7
1.4.3. Kinetic of Ion Exchange.....	9
1.4.4. Chromatographic Column Separations.....	10
1.5. Importance and Uses of Palladium.....	11
1.6. Radioactive Wastes.....	13
1.6.1. Origin of Radioactive Wastes.....	13
1.6.2. Types of Radioactive Wastes.....	14
1.6.3. Sources of Radioactive Wastes.....	14
1.6.3.1. Sources of radioactive liquid wastes.....	14
1.6.3.2. Sources of radioactive solid wastes.....	17

1.6.4. Waste Characteristics.....	18
1.6.4.1. Concentrates from aqueous wastes	18
1.6.4.2. Solid wastes	18
1.6.4.3. Special types of wastes	18
1.6.5. Waste Management.....	21
1.7. The Separation of Metal Ions.....	22
by Ion Exchange Technique	

CHAPTER 2

2. EXPERIMENTAL.....	29
2.1. Materials and Chemicals	29
2.1.1. General.....	29
2.1.1.1. Chemicals Used.....	29
2.1.2. Preparation of Mother Solutions.....	29
2.2. Liquid-Solid Exchange Investigations.....	31
2.2.1. Exchangers Used.....	31
2.2.2. Column Application.....	32
2.3. Instrumentation.....	33
2.3.1. General.....	33
2.4. Reproducibility.....	34

CHAPTER 3

3. RESULTS AND DISCUSSION.....	41
3.1. The Amberlite Resin IRA-410.....	41
3.1.1. Effect of Hydrogen Ion Concentration on the Uptake of the investigated Ions at Different Nitrate Concentrations	41
3.1.1.1. <i>Effect of hydrogen ion concentration at 0.1N NaNO₃.....</i>	42
3.1.1.2. <i>Effect of hydrogen ion concentration at 0.3N NaNO₃.....</i>	45
3.1.1.3. <i>Effect of hydrogen ion concentration at 0.5N NaNO₃.....</i>	47
3.1.1.4. <i>Effect of hydrogen ion concentration at 0.7N NaNO₃.....</i>	50
3.1.2. Effect Of Hydrogen Ion Concentration at Constant NaNO ₃ and Different EDTA Concentrations	53
3.1.2.1. <i>Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.1N nitrate and different EDTA concentrations.....</i>	55
3.1.2.1.1. <i>Effect of hydrogen ion concentration at 0.01N EDTA.....</i>	55

3.1.2.1.2. Effect of hydrogen ion concentration at 0.03N EDTA.....	58
3.1.2.1.3. Effect of hydrogen ion concentration at 0.05N EDTA.....	60
3.1.2.2. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.3N nitrate and different EDTA concentrations.....	63
3.1.2.2.1. Effect of hydrogen ion concentration at 0.01N EDTA.....	63
3.1.2.2.2. Effect of hydrogen ion concentration at 0.03N EDTA.....	65
3.1.2.2.3. Effect of hydrogen ion concentration at 0.05N EDTA.....	67
3.1.2.3. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.5N nitrate and different EDTA concentrations.....	70
3.1.2.3.1. Effect of hydrogen ion concentration at 0.01N EDTA.....	70
3.1.2.3.2. Effect of hydrogen ion concentration at 0.03N EDTA.....	72
3.1.2.3.3. Effect of hydrogen ion concentration at 0.05N EDTA.....	74
3.1.2.4. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.7N nitrate and different EDTA concentrations.....	76

3.1.2.4.1. Effect of hydrogen ion concentration at 0.01N EDTA.....	77
3.1.2.4.2. Effect of hydrogen ion concentration at 0.03N EDTA.....	79
3.1.2.4.3. Effect of hydrogen ion concentration at 0.05N EDTA.....	81
3.1.3. Effect Of Hydrogen Ion Concentration at Constant NaNO_3 and Different Chloroacetic Acid Concentrations	83
3.1.3.1. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.1N nitrate and different chloroacetic acid concentrations.....	85
3.1.3.1.1. Effect of hydrogen ion concentration at 0.1N $\text{C}_2\text{H}_3\text{ClO}_2$	85
3.1.3.1.2. Effect of hydrogen ion concentration at 0.3N $\text{C}_2\text{H}_3\text{ClO}_2$	87
3.1.3.1.3. Effect of hydrogen ion concentration at 0.5N $\text{C}_2\text{H}_3\text{ClO}_2$	89
3.1.3.2. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.3N nitrate and different chloroacetic acid concentrations.....	91
3.1.3.2.1. Effect of hydrogen ion concentration at 0.1N $\text{C}_2\text{H}_3\text{ClO}_2$	92
3.1.3.2.2. Effect of hydrogen ion concentration at 0.3N $\text{C}_2\text{H}_3\text{ClO}_2$	94
3.1.3.2.3. Effect of hydrogen ion concentration at 0.5N $\text{C}_2\text{H}_3\text{ClO}_2$	96

3.1.3.3. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.5N nitrate and different chloroacetic acid concentrations.....	98
3.1.3.3.1. Effect of hydrogen ion concentration at 0.1N $C_2H_3ClO_2$	98
3.1.3.3.2. Effect of hydrogen ion concentration at 0.3N $C_2H_3ClO_2$	100
3.1.3.3.3. Effect of hydrogen ion concentration at 0.5N $C_2H_3ClO_2$	103
3.1.3.4. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.7N nitrate and different chloroacetic acid concentrations.....	105
3.1.3.4.1. Effect of hydrogen ion concentration at 0.1N $C_2H_3ClO_2$	105
3.1.3.4.2. Effect of hydrogen ion concentration at 0.3N $C_2H_3ClO_2$	107
3.1.3.4.3. Effect of hydrogen ion concentration at 0.5N $C_2H_3ClO_2$	109
3.1.4. Effect of Inorganic Salts (KCl and K_2SO_4) of Different Concentrations.....	111
3.1.4.1. Effect of KCl concentrations on the uptake at different nitrate concentrations....	111
3.1.4.1.1. Effect of KCl concentrations at 0.1N $NaNO_3$	113
3.1.4.1.2. Effect of KCl concentrations at 0.3N $NaNO_3$	113

3.2.2. Effect Of Hydrogen Ion Concentration at Constant NaNO_3 and Different EDTA Concentrations.....	132
3.2.2.1. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.1N nitrate and different EDTA concentrations.....	132
3.2.2.1.1. Effect of hydrogen ion concentration at 0.01N EDTA.....	132
3.2.2.1.2. Effect of hydrogen ion concentration at 0.03N EDTA.....	135
3.2.2.1.3. Effect of hydrogen ion concentration at 0.05N EDTA.....	137
3.2.2.2. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.3N nitrate and different EDTA concentrations.....	140
3.2.2.2.1. Effect of hydrogen ion concentration at 0.01N EDTA.....	140
3.2.2.2.2. Effect of hydrogen ion concentration at 0.03N EDTA.....	142
3.2.2.2.3. Effect of hydrogen ion concentration at 0.05N EDTA.....	144
3.2.2.3. Effect of hydrogen ion concentration on the uptake of the investigated ions at constant 0.5N nitrate and different EDTA concentrations.....	146
3.2.2.3.1. Effect of hydrogen ion concentration at 0.01N EDTA.....	147
3.2.2.3.2. Effect of hydrogen ion concentration at 0.03N EDTA.....	149

3.4. Comparative Results	193
3.5. Comparative Discussion.....	198
3.5.1. General.....	198
3.5.2. Sequence in Nitrate System with IRA-410.....	201
3.5.3. Sequence in Nitrate System with IRA-900.....	206
3.5.4. Sequence in EDTA/Nitrate System with IRA-410....	209
3.5.5. Sequence in EDTA/Nitrate System with IRA-900....	212
3.5.6. Other Experimented Media.....	214
3.6. Separation of Strontium and Palladium	216
3.6.1. Separation of Sr^{2+}	216
3.6.1.1. Separation of Sr^{2+} by the batch technique	217
3.6.1.2. Separation of Sr^{2+} by the column technique.....	218
3.6.2. Separation of Palladium.....	219
3.6.2.1. Separation of Palladium by the Batch Technique.....	220
3.6.2.2. Separation of Palladium by the Column Technique.....	221
3.7. Separation Mechanism of Palladium.....	223

ARABIC SUMMARY	

ACKNOWLEDGEMENT

The author wishes to express his thanks to professor Dr. Mohamed F.El-Shahat, Prof. of Analytical and Inorganic Chemistry Faculty of Science, Ain Shams University, for sponsoring this work and for his kind help and contineous encouragement.

All thanks and gratitude to professor Dr. Hisham F.Aly, Prof. of Nuclear Chemistry and Deputy Chairman of Atomic Energy Authority (AEA), for suggesting the problem, supervision and help in all phases of this thesis.

I whould like to thank professor Dr. Salah M.Khalifa, Prof. of Radioinorganic Chemistry, Head of Chemistry Department of burnt Nuclear Feul, Hot Labs. Centre (AEA), for his supervision and contineous help throughout this study.

I ,also, like to thank Dr. Mohamed I.El-Dessouky for his co-operation and kind help. Thanks are due to Mr.Nessem A.El-said for his help during the final experimental part of this thesis.

I am deeply depted to Dr. Detlef Hentshel, Head of Analytical Laboratory, Germany, Karlsruhe for providing the instruments and chemicals requiered for the main experimental part of this thesis which carried out there.

Thanks to Mr. Mohamed M.Abdallah for typing the copy of this thesis.

Finally I would like to thank all my colleagues in the Hot Labs. Centre for their help and encouragement.

List of Tables

	Page
Table (1): Characteristics of the Principal Types of concentrate.....	19
Table (2): Characteristics of Typical Radioactive Wastes.....	20
Table (3): The Chemicals Used.....	30
Table (4): Standard Deviation Data for Each Single Determination (ΔK_d) and the Standard Deviation for the Average ($\Delta K'_d$) for the System: Sr^{2+} / $0.1\text{N C}_2\text{H}_3\text{ClO}_2$ / $[\text{H}^+] = 10^{-1}\text{M}$ / IRA-410	36
Table (5): Standard Deviation Data for Each Single Determination (ΔK_d) and the Standard Deviation for the Average ($\Delta K'_d$) for the System: Ca^{2+} / $0.3\text{N C}_2\text{H}_3\text{ClO}_2$ / $[\text{H}^+] = 10^{-5}\text{M}$ / IRA-900	37
Table (6): Standard Deviation Data for Each Single Determination (ΔK_d) and the Standard Deviation for the Average ($\Delta K'_d$) for the System: Ce^{3+} / 0.05N EDTA / $[\text{H}^+] = 10^{-3}\text{M}$ / IRA-900	38
Table (7): Standard Deviation Data for Each Single Determination (ΔK_d) and the Standard Deviation for the Average ($\Delta K'_d$) for the System: Pd^{2+} / 0.1N NaNO_3 / $[\text{H}^+] = 10^{-7}\text{M}$ / with IRA-900	39

Table (8): Standard Deviation Data for Each Single Determination (ΔK_d) and the Standard Deviation for the Average ($\Delta K'_d$) for the System: $\text{Ru}^{3+} / \begin{matrix} 0.5\text{N } \text{C}_2\text{H}_3\text{ClO}_2 \\ 0.1\text{N } \text{NaNO}_3 \end{matrix} / [\text{H}^+] = 10^{-2} \text{ M} / \text{IRA-410} \dots\dots\dots$	40
Table (9): Maximum Distribution Values of the Studied Ions at Different Nitrate Concentrations with IRA-410.	54
Table (10): Maximum Distribution Values of the Studied Ions at Different EDTA/Nitrate Concentrations with IRA-410....	84
Table (11): Maximum Distribution Values of the Studied Ions at Different Chloroacetic acid/Nitrate Concentrations with IRA-410.	112
Table (12): Maximum Distribution Values of the Studied Ions at Different KCl/Nitrate Concentrations with IRA-410. ..	116
Table (13): Maximum Distribution Values of the Studied Ions at Different K_2SO_4 /Nitrate Concentrations with IRA-410..	121
Table (14): Maximum Distribution Values of the Studied Ions at Different Nitrate Concentrations with IRA-900.....	131
Table (15): Maximum Distribution Values of the Studied Ions at Different EDTA/Nitrate Concentrations with IRA-900....	161
Table (16 a): Maximum Distribution Values of Pd^{2+} at Different Chloroacetic Acid and Sodium Nitrate Concentrations at $10^{-1}\text{M } [\text{H}^+]$	162
Table (16 b): Maximum Distribution Values of the Studied Ions at Different Chloroacetic acid/Nitrate Concentrations with IRA-900.	176

Table (17): Maximum Distribution Values of the Studied Ions at Different KCl/Nitrate Concentrations with IRA-900.1	1
Table (18): Maximum Distribution Values of the Studied Ions at Different K ₂ SO ₄ /Nitrate Concentrations with IRA-900...1	1
Table (19): Stability Constant of the Studied Metal Complexes (ML).....20	20
