Acknowledgment:

First of all I am forever grateful to GOD the most Gracious and most Merciful for all his blessings and for giving me the will and the strength to fulfill this work.

I would like to express my deep appreciation to Professor Dr. Amal Samy, Prof. of Epidemiology, National Cancer Institute, Cairo University, for his generous assistance, constant support, constructive criticism and valuable supervision.

I am also deeply indebted to Dr. Fatma Hamdy, Assistant Professor in Nursing Administration, High Institute of Nursing, Ain Shams University, for her precious help, moral support, fruitful advice and kind attitude.

I would like to express my great respect to Dr. Sohair Hassanin, Lecturer of Nursing Administration, High Institute of Nursing, Ain Shams University, for her limitless generosity in time and effort with me and her keen interest in completion of this work.

I am really thankful for all members in High Institute of Nursing at El-Mansoura University for their great help and encouragement.

Last, but by no means least, I wish to thank my husband for his co-operation, endless patience and tolerant understanding during the time away from home and employment.

Thanks and appreciation are also due to the Nursing Administration Department of El-Mansoura University Hospital, for their help and support. I am deeply grateful for the co-operation of all head nurses who had participated in this study.

This research is dedicated to my children and my parents for providing sustained support and love. I am much obliged to my family and relatives for their encouragement, assistance and unfailing support at all times.

Content :

1- Introduction	1
2- Aim of the study	5
3- Review of literature	
Definition of planning	6
Types of planning	7
Approaches to planning	9
Importance of planning	11
Primacy of planning	12
Advantages of planning	13
Potential disadvantages	14
Difficulties of planning	15
Barriers to effective planning	16
Steps in the planning process	17
Maximizing the effectiveness of the planning process	19
The planning spiral	21

Program development	49

4- Subjects and Methods	
Technical design -----	53
Operational design -----	58
Administrative design -----	68
Statistical design -----	69
5- Results -----	70
6- Discussion -----	147
7- conclusion and Recommendations -----	164
8- Summary -----	167
9- References -----	172
10- Appendices -----	195
- Pre test -----	App. I
- Post test -----	App. II
- Attitude Rating Scale -----	App. III
- Performance Observation checklist -----	App. IV
- The program -----	App. V
- Work sheet, Lectures, and transperencies -----	App. VI
12- Arabic Summary -----	

List of Tables

<u>Table</u>	<u>Page</u>
3.1 The time management process and the problem solving method -----	43
5.1 Distribution of years of experience of head nurses -----	72
5.2 Previous training programs attended by the Head Nurses -----	72
5.3 Sources of head nurses information related to planning function before the program -----	75
5.4 Years of experience in acceptance to educational program -----	75
5.5 Suitable time for attending educational program as reported by study subjects -----	77
5.6 Causes of none use and abuse of planning by the head nurses -----	77
5.7 Evaluation of knowledge of the 35 head nurses studied toward topics of planning function before and after the program and be- fore and follow up -----	80
5.8 Effect of the program on the knowledge of the 35 head nurses studied as regard items related to the topic of planning process before and after the program and before and follow up -----	83
5.9 Effect of the program on the knowledge of the 35 head nurses studied toward items related to the topic of role of the head nurs- es in planning function before and after the program and before and follow up -----	86
5.10 Effect of the program on the 35 head nurses' knowledge as re- gard items related to the topic of information needed for plan- ning before and after the program and before and follow up -----	88
5.11 Effect of the program on 35 head nurses' knowledge toward items related to the topic of assignment work sheet before and after the program and before and follow up -----	90
5.12 Effect of the program on 35 head nurses' knowledge toward items related to the topic of scheduling rotation before and after the program and after and follow up -----	91

5.13 Improvement in performance related to eight topics of planning function relative to initial level -----	102
5.14 Improvement in performance related to items of nursing plan relative to initial level -----	105
5.15 Improvement in performance related to items of chara. of plan relative to initial level -----	108
5.16 Improvement in performance related to items of chara. of time table relative to initial level -----	112
5.17 Improvement in performance related to items of content of time table relative to initial level -----	112
5.18 Improvement in performance related to items of chara. of sched- uling relative to initial level -----	115
5.19 Improvement in performance related to items of principles od scheduling relative to initial level -----	118
5.20 Improvement in performance related to items of chara. of assign- ment relative to initial level -----	121
5.21 Improvement in performance related to items of principles of as- signment relative to initial level -----	124
5.22 Improvement in performance related to items of nursing plan relative to initial level -----	130
5.23 Improvement in attitude related to four topics of planning func- tion relative to initial level -----	133
5.24 Improvement in attitude related to items of imprtance of plan- ning relative to initial level -----	136
5.25 Improvement in attitude related to items of top level encourage- ment function relative to initial level -----	139
5.26 Improvement in attitude related to items of accepting planning in her role relative to initial level -----	144
5.27 Improvement in attitude related to items of accepting rules rela- tive to initial level -----	144

List of figure

<u>Figure</u>	<u>Page</u>
3.1 Planning as a basic of organizing , directing and controlling -----	12
3.2 Managerial process for National Health Development -----	20
3.3 The planning hierarchy -----	25
3.4 Philosophy congruence in the planning hierarchy -----	28
3.5 Relationship between overall management system & subsystem - -----	30
3.6 The continuous planning process applied to management -----	38
4.1 Reliability of questionnaire (pre - post test) -----	61
5.1 Distribution of unnumber of nurses by years of experience -----	73
5.2 Previous training programs attended by head nurses -----	73
5.3 Frequency of acceptance of training programs in relation to years of experience-----	76
5.4 Suitable time for training programs preferred by head nurses -----	78
5.5 Causes of non or abuse of planning reported by head nurses -----	78
5.6 Improvement in knowledge related to the seven topics of plan- ning process relative to initial level -----	81
5.7 Improvement in knowledge related to the items of planning func- tion relative to initial level -----	84
5.8 Improvement in knowledge related to role of head nurses in plan- ning function relative to initial level -----	87
5.9 Improvement in knowledge related to the items of assignment work sheet relative to initial level -----	92
5.10 Improvement in knowledge related to the items of scheduling ro- tation relative to initial level -----	92
5.11 Improvement in knowledge related to the items of planning function relative to initial level -----	95
5.12 Improvement in knowledge related to the items of planning for emergency relative to initial level -----	99

- 5.13 Effect of the program on 35 head nurses' knowledge toward items related to the topic of planning for other ward activities before and after the program and before and follow up ----- 2
- 5.14 Effect of the program on 35 head nurses' knowledge toward items related to the topic of planning for emergency before and after the program and before and follow up ----- 1
- 5.15 Comparison between the mean score of head nurses' knowledge pre / post and follow up ----- 1
- 5.16 Evaluation of performance of the 35 head nurses studied toward topics of ward planning with comparison before and after the program and before and follow up ----- 2
- 5.17 Effect of the program on 35 head nurses' performance toward items related to the topic of ward nursing plan before and after the program and before and follow up ----- 1
- 5.18 Effect of the program on performance of 35 head nurses toward items related to the topic of characteristics of plan before and after the program and before and follow up ----- 1
- 5.19 Effect of the program on performance of 35 head nurses toward items related to the topic of characteristics of time table sheet before and after the program and before and follow up ----- 1
- 5.20 Effect of the program on 35 head nurses' performance toward items related to the topic of time table content before and after the program and before and follow up ----- 2
- 5.21 Effect of the program on performance of 35 head nurses toward items related to the topic of characteristics of scheduling before and after the program and before and follow up ----- 1
- 5.22 Effect of the program on 35 head nurses' performance toward items related to the topic of principles of scheduling before and after the program and before and follow up ----- 1
- 5.23 Effect of the program on 35 head nurses' performance toward items related to the topic of characteristics of assignment work sheet before and after the program and before and follow up ----- 1

5.24 Effect of the program on 35 head nurses'performance toward items related to the topic of principles of assignment work sheet before and after the program and before and follow up -----	123
5.25 Comparison between the mean scores of head nures'performance (pre / post and follow up) -----	126
5.26 Evaluation of attitude of 35 head nurses regard topics of paln-ning function before and after the program and before and fol-low up -----	129
5.27 Effect of the program on change in attitude of 35 head nurses to-ward items related to the topic of importance of planning before and after the program and before and follow up -----	132
5.28 Effect of the program on change in attitude of 35 head nurses to-ward items related to the topic of administrative team encourage the proper uses of planning before and after the program and before and follow up -----	135
5.29 Effect of the program on change in attitude of 35 head nurses to-ward items related to the topic of accepting and appreciating planning as a fundamental step in their role before and after the program and before and follow up -----	138
5.30 Effect of the program on change in attitude of the 35 head nurses toward items related to the topic of accepting rules, regulation and principles of planning before and after the program and before and follow up -----	142
5.31 Comparison between the mean scores of head nurses' attitude pre / post and follow up -----	143
5.32 Correlation Between Knowledge And Performance pre / post and follow up -----	146
