Acknowledgment

I wish to extend my great thanks to Professor Dr. Hadry Mahmoud Hefny Prof. Head, of Department of psychology Inst. Post. Grad. Child Studies Ain Shams University.

I am profoundly grateful to Professor Dr. Abdel Latif Moussa Osman Prof. Head, of Department of Neurology Faculty of Medicine Al-Azhar University for suggesting the topic of this thesis, his enthusiastic support, encouragement and supply of recent literature.

My sincere thanks and appreciation goes to Professor Dr. Afaf Hamed Khalil Prof of Psychiatry, Faculty of Medicine Ain-shams University for her motherly support, guidance and supply of recent literature and for her kindly follow up and encouragement in each step of the thesis.

I feel indebted to Dr. Fuzan El Kholy, consultant psychologist, and her colleagues and my other colleagues at the Neuropsychiatric Department, Ain Shams University for their help and support during this work.

That is with great pleasure that I acknowledge the kind assistance and help of Dr. Maged Abdel Keim, Lecturer, Maha Gaafary and Khaled Mahmoud, Assistant lectures in Community Medicine, Ain Shams University for their help in the statistical work in this thesis.

Last but not least, my deepest love, appreciation and admiration goes to my family for their support throughout this work.

Contents

- Acknowledgment.	1
- Introduction.	2
- Aim of the work.	2

Review of Literature :

(1)	- Epileptic children; cognitive functions & Behaviour	3
	- Cognitive functions	
	- Effect of Epilepsy on Memory	
	- Behaviour	
(2)	- Relation between childhood epilepsy and cognitive deterioration.	21
(3)	- Anxiety, Mood changes & Epilepsy	23
(4)	- The effect of anticonvulsant drugs on mood and cognitive functions.	26
	- The effect of type of therapy on Cognitive function	
	- The effect of type of therapy on behaviour changes.	
(5)	- Antiepileptic drugs and performanc	35
(6)	- Childhood Epilepsy & education	3

(7)

- *Assessment of cognitive function in epileptic patients* 42
(Methods & problems).
- *Assessment of Behaviour disorders in epilepsy.*

(8)

- *Electroencepholozaphic parameters.* 56
- *Other Investigations*
- *Subjects & Methods.* 64
- *Results* 80
- *Discussion* 258
- *Summary and Conclussions* 326

LIST OF TABLES

I GENERALLY

1) PSYCHODEMOGRAPHIC PROFILE

I- COMPARISON BETWEEN GME, TLE & CONTROL GROUPS CONCERNING:

<i>(Table 1) SOCIO-ECONOMIC FACTORS</i>	<i>80</i>
--	------------------

2) ILLNESS PROFILE

II - COMPARISON BETWEEN GME, TLE & CONTROL GROUPS CONCERNING THE FOLLOWING :

<i>(Table 2) ONSET OF SEIZURES</i>	<i>81</i>
<i>(Table 3) FREQUENCY OF SEIZURES :</i>	<i>82</i>
<i>(Table 4) DURATION</i>	<i>83</i>
<i>(Table 5) STATUS EPILEPTICUS , FAMILY AND PAST HISTORY.</i>	<i>84</i>
<i>(Table 6) PERI-ICTAL CHANGES</i>	<i>85</i>
<i>(Table 7) CAUSES.</i>	<i>86</i>
<i>(Table 8) PSYCHIATRIC MORBIDITY</i>	<i>87</i>
<i>(Table 9) ORGANIC DISEASES, PREGNANCY TROUBLES, LABOUR TROUBLES AND NEUROTIC TRAITS HISTORY</i>	<i>88</i>

3) THERAPEUTIC ISSUES

III- COMPARISON BETWEEN GME, TLE & CONTROL GROUPS CONCERNING THE FOLLOWING:

(Table 10) DIFFERENT TYPES OF THERAPY	89
(Table 11) SIDE EFFECTS / EACH DRUG	90
(Table 12) AMOUNT OF DRUG INTAKE / EACH DRUG .	91
1) MONOTHERAPY	
2) POLYTHERAPY	
(Table 13) DURATION OF DRUG INTAKE	92
(Table 14) COMPLIANCE, SEIZURE CONTROL, SIDE EFFECTS AND HIGH SERUM LEVEL	93
(Table 15) COMPLIANCE, SEIZURE CONTROL, SIDE EFFECTS AND HIGH SERUM LEVEL	94

4) INVESTIGATIONS

A) PSYCHOMETRY

1) ASSESSMENT OF COGNITIVE

FUNCTIONS:

(Table 16) CODING TEST	95
(Table 17) DIGIT SPAN TEST	96
(Table 18) SIMILARITIES	97

IV- COMPARISON BETWEEN GME, TLE & CONTROL GROUPS IN :

(Table 19) CANCELLATION LETTERS TEST (ERRORS)	98
(Table 20) CANCELLATION LETTERS TEST (TIME)	99
(Table 21) MACHING FAMILIAR FIGURE TEST 0 TOTAL ERRORS (MFFI)	100
(Table 22) MACHING FAMILIAR FIGURE TEST – MEAN TIME (MFFT)	101

(Table 23)	MACHING FAMILAIAR FIGURE TEST – TOTOAL TIME (MFFT)	102
------------	---	-----

II)ASSESSMENT OF MOOD:

(Table 24)	F, MEAN AND SD OF DIFFERENT GROUPS OF (CDI)	103
------------	--	-----

(Table 25)	F, MEAN AND SD OF DIFFERENT GROUPS OF (CAS)	103
------------	--	-----

III)ASSESSMENT OF PERSONALITY:

(Table 26)	JENIOR EYSENK PERSONALITY QUESTIONNAIRE (JEPO)	106
------------	---	-----

B) EEG

(Table 27)	ELECTRO ENCEPHALO GRAM (EEG) (COMPARISON BETWEEN DIFFERENT PSYCHOLOGICAL & COGNITIVE SCALES THROUGH EEG FINDINGS)	107
------------	--	-----

II) IN DETAILS

1) PSYCHODEMOGRAPHIC PROFILE

*1 - COMPARISON BETWEEN GME & TLE GROUPS
CONCERNING THE FOLLOWING:*

Socio-Economic Factors

1)SEX:

(Table 28) - MALE 109

(Table 29) - FEMALE: 109

2)FAMILY SIZE:

(Table 30) - < 4 110

(Table 31) - > 4 110

3)SIB ORDER:

(Table 32) - FIRST TWO 111

(Table 33) - MORE 111

4) ROOMS:

(Table 34) -1-2 112

(Table 35) - MORE 0 112

5) WATED:

(Table 36) - YES 113

(Table 37) - NO 113

6)CLASS

(Table 38) - *RURAL* 114

(Table 39) - *URBAN* 114

7) PARENTAL SEPARATION

(Table 40) - *YES* 115

(Table 41) - *NO* 115

8) FAMILY INCOME:

(Table 42) - *HIGH* 116

(Table 43) - *LOW* 116

9) EDUCATED PARENTS:

(Table 44) - *YES* 117

(Table 45) - *NO* 117

EXPLANATION OF PSYCHODEMOGRAPHIC

PROFILE TABLES (121 - 133)

2) ILLNESS PROFILE

**II- COMPARISON BETWEEN GME & TLE GROUPS
CONCERNING :**

1) AGE OF ONSET :

(Table 46) < 2 YEARS 118

(Table 47) (2- 4) YEARS 118

(Table 48) > 4 YEARS 119

2) TYPES OF ONSET :

(Table 49) *ABRUPT* 120

(Table 50) *GRADUAL (WITH PRECIPITATING
FACTORS)* 120

**III- COMPARISON BETWEEN GME & TLE GROUPS
CONCERNING:**

3) FREQUENCY

1) PAST SEIZURE FREQUENCY :

(Table 51) FREQUENT / DAY 135

(Table 52) FREQUENT / WEEK 135

(Table 53) FREQUENT / MONTH 136

2) CURRENT SEIZURE FREQUENCY :

(Table 54) FREQUENT / DAY 137

(Table 55) FREQUENT / WEEK 137

(Table 56) FREQUENT / MONTH 138

(Table 57) NONE 138

4) DURATION

1) DURATION OF ILLNESS:

(Table 58) < 6 MONTHS 139

(Table 59) (6 MONTHS – 2 YEARS) 139

(Table 60) (2 YEARS – 5 YEARS) 140

(Table 61) > 5 YEARS 140

2) LONGEST SEIZURE FOR PERIOD :

(Table 62) < 6 MONTHS 141

(Table 63) (6 MONTHS – 2 YEARS) 141

5) STATUS EPILEPTICUS, POSITIVE

FAMILY AND POSITIVE PAST HISTORY

1) STATUS EPILEPTICUS HISTORY

(Table 64) WITH 142

(Table 65) WITHOUT 142

2) POSITIVE FAMILY HISTORY :

(Table 66) WITH 143

(Table 67) WITHOUT 143

3) POSITIVE PAST HISTORY :

(Table 68) WITH 144

(Table 69) WITHOUT 144

6) PATIENTS WITH ORGANIC DISEASE, PREGNANCY AND LABOUR TROUBLES

1) WITH ORGANIC DISEASE:

(Table 70) - YES 145

(Table 71) - NO 145

2) PREGNANCY TROUBLES:

(Table 72) - YES 146

(Table 73) - NO 146

3) LABOUR TROUBLES:

(Table 74) - YES 147

(Table 75) - NO 147

4) NEUROTIC TRANITS:

(Table 76) - YES 148

(Table 77) - NO 148

IV- COMPARISON BETWEEN GME & TLE GROUPS CONCERNING:

7) PERI-ICTAL CHANGES

1) PRODRIMA :

(Table 78) - WITH 149

- WITHOUT

2) AURA:

(Table 79) - WITH 150

- WITHOUT

3) ICTAL CHANGES:

(Table 80) - WITH 151

- WITHOUT

4) POST ICTAL CHANGES :

(Table 81) - WITH 152

- WITHOUT
