# CYTOGENETIC STUDIES AND CYTOPHOTOMETRIC DNA ANALYSIS IN HUMAN BRAIN MENINGIOMAS WITH CLINICOPATHOLOGICAL CORRELATES

مناقشة

## THESIS

Submitted for Partial Fulfillment of  
The M.D. Degree in  
**Neurosurgery**

By

**Salah Abd El Khalek Ibrahim**  
M.B. B.Ch, M.Sc.

S. A

*Supervisors* 53324

Prof. Dr.  
**Mamdouh M. Salama**  
Professor of Neurosurgery  
Faculty of Medicine  
Ain Shams University

Prof. Dr.  
**Alaa El Din Abd El Hay**  
Professor of Neurosurgery  
Faculty of Medicine  
Ain Shams University

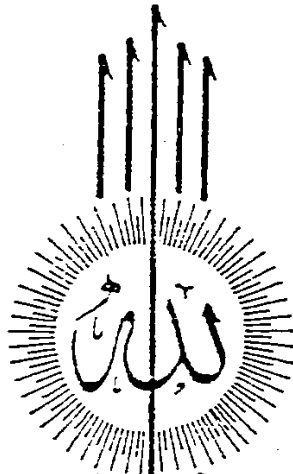

Prof. Dr.  
**Sohair Shoman**  
Professor of Cytogenetics and Chromosomes  
National Cancer Institute

**FACULTY OF MEDICINE  
AIN SHAMS UNIVERSITY  
1997**

# **Acknowledgment**

*I would like to express my utmost gratitude to Prof. Dr. Mamdouh M. Salama, Prof. of Neurosurgery, Faculty of Medicine, Ain Shams University, for his sincere, encouragement, valuable criticism and kind guidance throughout the performance of this work.*

*Specific acknowledgment and deepest thanks to Prof. Dr. Alaa Abd El-Hay, Prof. of Neurosurgery, Faculty of Medicine, Ain Shams University, not only he has been a steady source of encouragement, but he has also given me creative thoughts, patience and splendid efforts throughout the entire work.*

*Special thanks to Prof. Dr. Sohair Shoman, Prof. of Cytogenetics and Chromosomes, Faculty of Medicine, Cairo University, without her close and continuous supervision and her keenness for high standard of performance this work would have never achieved whatever positive aspects it has got.*

*Special thanks and gratefulness to Prof. Dr. Saad Eissa, Prof. of Pathology, Faculty of Medicine, Cairo University, for his valuable suggestions, kind assistance and generous help.*

*To all my Professors, Senior Staff, and colleagues in Department of Neurosurgery, Ain Shams University, a meaningful message of gratitude for their sympathetic help all over years.*

# CONTENTS

	<b>Page</b>
* Introduction and Aim of the work .....	1
* Review of Literature:	
I- Anatomy of the meninges .....	3
II- Pathology of meningiomas .....	18
III- Etiology of meningiomas .....	48
IV- Meningioma and brain oedema .....	52
V- DNA cytometry and meningiomas .....	59
VI- Genetics and chromosomal Aberrations in meningiomas .....	67
VII- Recurrent and aggressive meningiomas .....	74
VIII- Clinical presentation of meningiomas .....	82
IX- Imaging of meningiomas .....	93
X- Management of meningiomas .....	113
* Patients and Methods .....	124
* Results .....	128
* Discussion .....	163
* Summary and Conclusion .....	171
* References .....	173
* Arabic summary .....	---

# LIST OF TABLES

No.	Title	Page
<b>Tables in the Review of Literature</b>		
1	Arterial blood supply to the dura	16
2	Nerve supply to the dura	17
3	Russel and Rubinstein classification of meningiomas	23
4	WHO classification of meningiomas	24
5	Helsinki grading system of meningiomas	26
6	Typical angiographic features of meningiomas	97
7	General information provided by diagnostic angiography	97
8	Blood supply to meningioma based on site	98
9	Preoperative considerations for patients with meningiomas	113
<b>Tables in the Results</b>		
10	The incidence of visual manifestations	132
11	Clinical presentations of patients	132
12	Correlation between radiological aggressiveness and recurrence	139
13	The relation between aggressiveness and recurrence	142
14	The relation between histopathological types and recurrence of meningiomas	144
15	The relation between histopathological types and aggressiveness of meningiomas	144
16	The relation between aggressiveness and sex of the patients	146
17	The relation between recurrence and sex of the patients	146
18	Flow cytometry results, histopathology and recurrence of the patients	149
19	Recurrence and ploidy	152
20	Aggressiveness and ploidy	152
21	The relation between recurrence and synthetic phase	154
22	The relation between aggressiveness and synthetic phase	154
23	Recurrence and karyotyping	159
24	Aggressiveness and karyotyping	159
25	Karyotyping and sex of the patients	159

# LIST OF FIGURES

No.	Title	Page
1	Embryologic development of the meninges	4
2	Dural reflections and venous sinuses	8
3	Fine structure of the meninges	11
4	Arachnoid granulations	15
5	Gross pathology of meningiomas	21
6	Meningotheliomatous meningiomas	29
7	Fibroblastic meningiomas	29
8	Transitional meningiomas	29
9	Psammomatous meningiomas	31
10	Cell cycle and histogram	64
11	A- CT and MRI of a parasagittal meningioma .....	100
	B- Cerebral angiogram of the case .....	100
	C- Cerebral angiogram of the case .....	101
	D- Cerebral angiogram and sinogram of the same case ...	101
12	A- Non contrasted CT of convexity meningiomas.....	104
	B- Contrasted CT of the same case .....	104
13	CT brain showing bony changes in meningiomas	105
14	A,B- Noncontrasted MRI of convexity meningioma .....	111
	C- Contrasted MRI of convexity meningioma	112
15	Age incidence at surgery	129
16	Sex incidence at surgery	130
17	Distribution of the clinical presentation	133
18	A- Preoperative CT of olfactory groove meningioma .....	134
	B- Post operative CT of the same patient .....	134

(Continue)

19	A- Preoperative CT axial cuts of tent meningioma .....	135
	B- Coronal cuts of the same patient .....	135
	C- Post operative CT after 1 year .....	136
	D- Post operative CT after 2 years .....	136
20	A- Non contrasted MRI of sphenoid wing meningioma ...	137
	B- Contrasted MRI of the same patient .....	137
	C- Post operative CT of the same patient .....	138
21	Distribution of the histopathological diagnosis	141
22	Relation between recurrence and aggressiveness	143
23	Relation between recurrence and pathological type	145
24	Relation between sex and recurrence	147
25	Relation between sex and aggressiveness	148
26	Histogram of diploid tumor	151
27	Histogram of aneuploid tumor	151
28	The relation between aggressiveness and ploidy	153
29	Relation between synthetic phase and aggressiveness	155
30	Relation between synthetic phase and recurrence	156
31	Karyotyping of a patient with monosomy 22	158
32	Karyotyping of a patient with deletion of 1 part of the chromosome 1 (1 p)	158
33	The relation between karyotyping and recurrence	160
34	The relation between karyotyping and aggressiveness	161
35	The relation between karyotyping and sex of the patients	162
