

**The Role of Computerized Tomography
in
Diagnosis of Petrous Temporal Bone
Lesions**

Essay

*Submitted in Partial fulfillment of
Master Degree in Radiodiagnosis*

ACKNOWLEDGEMENT

I'd like to thank

Prof. Dr Jannette Boushra Hanna

Professor of Radiodiagnosis

Faculty of Medicine, Ain Shams University

for her guidance & support. Without her helpful advices and conscientious efforts, this work would not have reached its present form.

I'd also like to thank

Prof. Dr Feinab Abdallah

Head of Department of Radiodiagnosis

Faculty of Medicine, Ain Shams University

for making this department an excellent place to learn and work in.

CONTENTS

	Page
1. Introduction & Aim of the work	1
2. Normal CT Anatomy of the Petrous Temporal bone	2
3. Pathological lesions of the Petrous Temporal bone	66
4. Technique of Computerized Tomographic examination of the Petrous Temporal bone	98
5. CT Manifestations of Pathological lesions of the Petrous Temporal bone	111
6. Summary & Conclusion	178
7. References	186
8. Arabic Summary	

LIST OF DIAGRAMS

	Page
Diagram (1)	
Embryological development of the external auditory canal	3
Diagram (2)	
Embryological development of the tympanic cavity	5
Diagram (3)	
Embryological development of the ossicles	7
Diagram (4)	
Embryological development of the membranous labyrinth (otocyst)	9
Diagram (5)	
Embryological development of the bony labyrinth (otic capsule)	10
Diagram (6)	
The petrous bone	18
Diagram (7)	
The sinus tympani	18
Diagrams (8, 9 and 10)	
The structures of the inner ear	29 and 31
Diagrams (11 and 12)	
The circulation of the endolymph	32 and 34
Diagram (13)	
The facial nerve	36
Diagram (14)	
The fundus of the internal auditory canal	36
Diagram (15)	
The orientation of ear structures	38

LIST OF FIGURES

	Page
(Fig. 1, 2)	Petrous apex pneumatization 12, 14
(Fig. 3)	Petrous bone anatomy 16
(Fig. 4)	The Lateral wall of the tympanic cavity 20-21
(Fig. 5)	The ossicles 24
(Fig. 6)	The Medial wall of the tympanic cavity 27
(Fig. 7 - 7)	Sequential axial CT images 42-50
(Fig. 18 - 28)	Sequential coronal CT images 52-58
(Fig. 29 - 37)	Sequential Sagittal CT images 60-64
(Fig. 38 - 39)	High Resolution CT temporal bone 101-103
(Fig. 40)	CT Air meatogram 107
(Fig. 41 - 42)	Microtia 112
(Fig. 43)	Otic capsule malformation 116
(Fig. 44)	Michel deformity 118
(Fig. 45)	Giant vestibular aqueduct 118
(Fig. 46)	Absent caratid canal 120
(Fig. 47)	Aberrant carotid 121
(Fig. 48)	Dehiscent jugular foramen 122
(Fig. 49)	Longitudinal fracture 125
(Fig. 50 - 51)	Transverse fractures 125, 127
(Fig. 52 - 54)	Comminuted fractures 128-129
(Fig. 55)	Apical petrositis 132
(Fig. 56)	Labyrinthitis ossificans 134
(Fig. 57 - 58)	Malignant otitis externa 135

List of Figures

	Page
