1999

Synthesis and Reactions of Some Organic Sulphur Heterocycles of Anticipated Biological Activity

Thesis Advisors

Prof. Dr. Mohamed T. Omar

Faculty of Science, Ain Shams University.

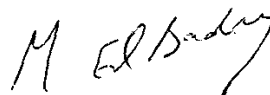

Prof. Dr. Mohamed E. Shaban

Faculty of Science, Ain Shams University.

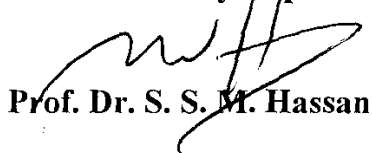

Dr. Nadia Kh. El-Aasar

Faculty of Science, Ain Shams University.

Approved

Head of Chemistry Department

Prof. Dr. S. S. M. Hassan

Acknowledgment

*The author wishes to express his deep thanks and sincere gratitude to **Prof. Dr. Mohamed T. Omar**, Professor of Organic Chemistry, Chemistry Department, Faculty of Science, Ain Shams University, for suggesting the problem, indispensable advice, valuable discussions and criticism.*

*The author is also too grateful to **Prof. Dr. Mohamed E. Shaban** Professor of Organic Chemistry, and to **Dr. Nadia Kh. El-Aasar**, Lecturer of Organic Chemistry, Chemistry Department, Faculty of Science, Ain Shams University, for the valuable assistance, guidance and continuous help during the progress of the work.*

SUMMARY	
INTRODUCTION	
Chemistry of 4-thiazolidinones.	1
<i>Types of formation of 4-thiazolidinones.</i>	2
<i>Type A₁₋₄ from dithiocarbamates.</i>	2
<i>Type A₅₋₉ from thioureas.</i>	6
<i>Type A₁₀ from thiosemicarbazides or thiosemicarbazones.</i>	10
<i>Type A₁₁ from thioamides.</i>	10
<i>Type A₁₂ from O-Methyl N-substituted imino thiocarbonate.</i>	11
<i>Type A₁₃ from N-substituted acetyl thioamides.</i>	12
<i>Type A₁₄ from 5-aryl-3-phenyl-imino- 1,3-dithioles.</i>	12
<i>Type B₁₋₄ from α-mercapto acids or esters.</i>	14
<i>Type B_{5,6} from α-mercaptopthiocarboxylic acid.</i>	17
<i>Type C from mercaptoacetamide.</i>	17
<i>Type D from liquid SO₂</i>	19
<i>Type E from thiocyanates.</i>	21
Synthesis of fused thiazolo derivatives.	22
<i>Synthesis of fused thieno thiazoles.</i>	22
<i>Synthesis of fused pyrrolo thiazoles.</i>	32
<i>Synthesis of fused furo thiazoles.</i>	33

Subjects	Page
Reactions of 4-thiazolidinones.	
<i>A- Reactions depending on the nucleophilicity of C-5 in 5-unsubstituted system.</i>	36
<i>B- Reactions depending on the nucleophilicity of 3-N atom in 3-unsubstituted compounds.</i>	43
<i>C- Reactions depending on the electrophilicity of C-2 and C-4.</i>	48
<i>D- Reactions depending on the electrophilicity of the β-terminal of the exo double bond in 5-substituted methylene derivatives.</i>	54
Biological activity of thiazole derivatives.	62
RESULTS AND DISCUSSION	
<i>1-Reactions of 3-substituted-5-(2-aryl-2-oxo-ethyl)-2-thioxo-4-oxo-1,3-thiazolidines and the respective 5-arylmethylene derivatives with cyanide and cyanate ions.</i>	64
<i>2-Reactions of 3-H-5-arylmethylene-2-thioxo-4-oxo-1,3-thiazolidines with cyanide and cyanate ions.</i>	92
<i>3-Attempted Reactions Depending on the existence of the 1,4-dioxo functionality in the starting materials.</i>	98
<i>i-Synthesis of spiro pyrrolo thiazolidines.</i>	98
<i>ii-Synthesis of fused thieno thiazoles.</i>	109
<i>iii-Attempted synthesis of fused furo thiazoles.</i>	116
Experimental	130
