

Effect of Mandibular Fixation Upon the Muscles of Mastication

*Thesis submitted for partial fulfillment of the Master
Degree in General Surgery*

Presented by
KHALED MOHAMED EL-SHERBINY
M.B., B.Ch.

Under the supervision of

PROF. DR. **MUSTAFA MOHAMMED HEMEDA**
*Head of the Department of Plastic and Reconstructive
Surgery
Faculty of Medicine-Ain Shams University*

PROF. DR. **TAHA KAMEL TAHA**
*Assistant Professor of Neuropsychiatry
Faculty of Medicine-Ain Shams University*

PROF. DR. **AYMAN ABU EL-MAKAREM SHAKER**
*Assistant Professor of Plastic and Reconstructive Surgery
Faculty of Medicine-Ain Shams University*

FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY
1998

Acknowledgment

*I would like to present my profound and sincere gratitude to my supervisor, Professor Dr. **Mustafa Mohammed Hemeda**, Head of the Department of Plastic and Reconstructive Surgery, Faculty of Medicine, Ain Shams University for dedicating much of his valuable time to provide me a wide scope of knowledge in all the essential aspects of this study, he encouraged me very much, he suggested the subjects to setup the plan and offered brilliant ideas from the start to the end.*

*I greatly acknowledge Dr. **Taha Kamel Taha**, Assistant Professor of Neuropsychiatry, Faculty of Medicine, Ain Shams University who sacrificed a great deal of his valuable time in the correction of this work and for whom no words or praise are sufficient.*

*To Dr., **Ayman Abu El-Makarem Shaker**, Assistant Professor of Plastic and Reconstructive Surgery, Ain Shams University I wish to express many great thanks and deep appreciation to his effort and continuous supervision.*

List of Figures

Fig. (1): Mandible of human embryo

Fig. (2): Outer surface of mandible

Fig. (3): Inner surface of mandible

Fig. (4): Mandibular anatomy

Fig. (5): Masseter muscle

Fig. (6): Temporalis muscle

Fig. (7): Pterygoid muscles.

Fig. (8): Mandible at different periods of life.

Fig. (9): Anatomic regions of mandible and incidence of fractures.

Fig. (10): Mandibular classification.

Fig. (11): Favorable and unfavorable fractures.

Fig. (12): Load-deformation curve.

Fig. (13): Schematic representation of various loading modes.

Fig. (14): Panoramic roentgenogram.

Fig. (15): Teeth number according to International standards.

Fig. (16): Orientation of teeth in relation to dental arch midline.

Fig. (17): Right lower first molar.

Fig. (18): Normal and abnormal relationships of incisor teeth.

Fig. (19): Diagram of normal occlusion.

Fig. (20): Angle Classification.

Fig. (21): Modification of Dingman's technique.

Fig. (22): Direct interdental wiring.

Fig. (23): Essig's method of horizontal wire.

Fig. (24): Kazanjian button.

Fig. (25): Intermaxillary multiple loop wire.

Fig. (26): Wegeser's technique of loop wiring.

Fig. (27): Lag screw.

Fig. (28): Muscles exerting forces on the mandible to distract fractures.

Fig. (29): A= Favorable fracture; B= Unfavorable fracture

Fig. (30): Displacement of a condyle due to pull of lateral pterygoid muscle.

Fig. (31): Inferior displacement by suprahyoid musculature.

Fig. (32): Segmental fractures displaced medially.

Fig. (33): Degenerative changes due to lack of nutrition from synovial fluid.

Fig. (34): Intricate interaction between proteoglycan and collagen fibers.

Fig. (35): Effect of intermolecular cross-links.

Fig. (36): Loss of interfiber support leading to aberrant cross-links.

Fig. (37): EMG report

Fig. (38): Electromyography

Fig. (39): EMG procedure

Fig. (40): Template used for recognition of electrode position.

Fig. (41): Mean force acting on the mandible.

Fig. (42): Comparing affected and non-affected muscles of group I.

Fig. (43): Comparing affected and non-affected muscles

of group II.

Fig. (44): Comparing affected and non-affected muscles of group III.

Fig. (45): Comparing the muscles affected and non-affected at pre, 2, 6, 8 weeks.

Fig. (46): Comparing in group I the pre-value and value after 6 weeks of fixation.

Fig. (47): Comparing in group II the pre-value and value after 2 weeks of fixation.

Fig. (48): Comparing in group III the pre-value with values after 2 weeks of fixation.

Fig. (49): Comparing group I with the control group.

Fig. (50): Comparing group II with the control group.

Fig. (51): Comparing group III with the control group.

Fig. (52): Comparing group I with group II.

Fig. (53): Comparing group I with group III.
