I don't have words enough to show my deep felt gratitude for Professor. Afaf Hamed, Professor of Psychiatry, Ain Shams University, who knew always how and when to push the right button to challenge all my potentials for bettering my performance. This research would not have seen the light without

her spontaneous, sincere and generous tenderness towards me, not only so but her meticulous and constructive criticism put the final touches to it.

I can only give him very sincere thank you for all the modifications he made. I thank him truly for his help in clarifying the mysteries of the various statistical calculations used and in turn how to interpret them.

Dr. Wagdi Guirgis, Consultant Psychiatrist in the UK, who provided me with training in his eating disorder unit in the UK and followed all

the steps of the present work with very generous intentions all through to give any needed help.

Mrs. Geylan Riad, Assistant lecturer of Psychology, Helwan University & Dr. Manal Omar, Specialist of Psychiatry, the institute of Psychiatry, Ain Shams University. My deep felt gratitude is extended to my brother Ahmed for his kind help and support.

Last but not least I can find no words that could ever express my, sincere everlasting gratitude & love for my Parents. Their generous love, care and support existed long ago even before I ever came into life and are still going strong. May God bless them.
