ACKNOWLEDGMENT

It is a great pleasure to express my deepest appreciation and gratitude to Prof. Dr. Naglaa Aly Gadalla, Professor of Physical Medicine and Rehabilitation, Faculty of Medicine, Ain Shams University, for her generous advice, continuous encouragement, faithful guidance and keen supervision which made completion of this work possible.

I would like to express my sincere appreciation to Prof. Dr. Nadia Salah Kamel, Assistant Professor of Physical Medicine and Rehabilitation, Faculty of Medicine, Ain Shams University, for her valuable assistance, continuous advice and meticulous supervision.

Special thanks and appreciation for Dr. Hanaa Fathy Saad, Lecturer of Physical Medicine and Rehabilitation, Faculty of Medicine, Ain Shams University, for her kind advice, great support and valuable suggestions, she offered me a lot of her time and effort throughout the whole work.

Last, but not least, I would like to thank every patient accepted to be part of this work.

ENAS ABDALLAH MOHAMMED EL-ATTAR

CONTENTS

Subjects	Page
* Introduction And Aim Of The Work	1
* Review of Literature	3-
• Anatomy of the facial nerve	3
• Physiology of the facial nerve	10
• Histopathology	18
• Bell's palsy	19
• Clinical picture of Bell's palsy	27
• Testing facial nerve function	40
• General management of Bell's palsy	61
* Patient and Methods	71
* Results	85
* Discussion	130
* Summary	145
* Conclusion and Recommendation	148
* References	149
* Arabic Summary.	

LIST OF TABLES

Table No.	Title	Page
-----------	-------	------

Table in Patients and Methods:

1	Facial nerve grading system .	73,74
---	-------------------------------	-------

Tables in Results:

1	Descriptive data of patients group .	86
2	Comparison between the patient group and the control group as regard (age) .	86
3	Associated clinical symptoms with Bell's palsy .	88
4	Descriptive data of the control group as regards the range and mean amplitude of CMAP of Rt. and Lt. (OC, NA and OR) muscles .	89
5	Comparison between the males and females of the control group as regards the mean amplitude of CMAP of right and left sides of (OC, NA and OR) muscles .	91
6	Correlation between age of the control group and the amplitude of right and left sides (OC, NA and OR) muscles .	92
7	Comparison between the right and left sides of the control group as regards, the mean amplitude of CMAP of (OC, NA and OR) muscles .	93

LIST OF TABLES(Cont.)

Table No.	Title	Page
8	The range and mean amplitude of CMAP of (OC, NA and OR) muscles of the control group	94
9	Mean amplitude of CMAP of (OC, NA and OR) muscles of the healthy side of patients	95
10	Comparison between healthy side of the patient group and the control group as regards the mean amplitude of CMAP of (OC, NA and OR) muscles	96
11	Comparison between the co-effecient of variation (c.v) in the control group and the healthy side of the patietns	97
12	Range and mean amplitude of CMAP of the paralysed (OC) muscle at presentation and follow-up days	99
13	Range and mean amplitude of CMAP of the paralysed (NA) muscle at presentation and follow-up days	100
14	Range and mean amplitude of CMAP of the paralysed (OR) muscle at presentation and follow-up days	101
15	Comparison between the mean of ENoG for the 3 examined muscles (D/N of patient) and (D/N of normal)	102

LIST OF TABLES(Cont.)

Table No.	Title	Page
16	Comparison between the co-efficient of variation of ENoG calculated in reference to the normal side of the patient and that calculated in reference to the value obtained from the normal volunteers	103
17	ENoG mean and range of the (OC) muscle at presentation and follow-up days	104
18	ENoG mean and range of the (NA) muscle at presentation and follow-up days	105
19	ENoG mean and range of the (OR) muscle at presentation and follow-up days	106
20(a,b & c):	Association between the ENoG of (OC & NA), (OC&OR) and (NA & OR) at presentation	113
21(a,b & c):	Association between the ENoG of (OC & NA), (OC&OR) and (NA & OR) after 2 weeks .	114
22(a,b & c):	Association between the ENoG of (OC & NA), (OC&OR) and (NA & OR) at the end of the study	115

LIST OF TABLES(Cont.)

Table No.	Title	Page
23	Association of ENoG of OC, NA and OR muscles at presentation and the clinical grading of the patient	119
24	Association of ENoG OC, NA and OR muscles after 2 weeks with the clinical grading of the patient	120
25	Association of ENoG of OC, NA and OR muscles after 3 weeks with the clinical grading of the patient	121
26	Association of ENoG of OC, NA and OR muscles at the 4th week with the clinical grading of the patient	122
27	Association of ENoG of OC, NA and OR muscles at the 5th weeks with the clinical grading of the patient	123
28	Association fo ENoG of OC, NA and OR muscles at the 6th week with the clinical grading of the patient	124
29	Association of ENoG of OC, NA and OR muscles with clinical grading of the patient at the end of the study (12th week)	125
30	correlation between ENoG at presentation and the period of recovery in (weeks) for the OC, NA and OR muscles	126
